Preface

Chapter 1: Ocean Wave and Power Harvesting

Wave Energy Generation Potential for a Point Absorber Type WEC on the Brazilian Coast R.C. Guimarães, P.H. Oleinik, E.d.P. Kirinus and W.C. Marques	3
Numerical Simulation of an Oscillating Water Column (OWC) Wave Energy Converter (WEC) on a Breakwater Using OpenFOAM® J.M.P. Conde and M.B.S.P. Condeço	12
Analysis of Geometric Variation of Three Degrees of Freedom through the Constructual Design Method for a Oscillating Water Column Device with Double Hidropneumatic Chamber Y.T.B. Lima, M.d.N. Gomes, C.F. Cardozo, L.A. Isoldi, E.D. Santos and L.A.O. Rocha	22
3-D Scale Model Study of Wave Run-Up, Overtopping and Damage in a Rubble-Mound Breakwater Subject to Oblique Extreme Wave Conditions J.A. Santos, F. Pedro, M. Coimbra, A. Figuero, C.J. Fortes, J. Sande, M. Körner, R. Lemos, A. Bornschein, J. Weimper, J. van den Bos, B. Dost, B. Hofland, R.F. Carvalho, A. Alvarellos, E. Peña, R. Pohl, N.B. Kerpen and M.T. Reis	32
Lagrangian Trajectory Simulation of Floating Objects in the State of São Paulo Coastal Region J. Lugon Junior, F.d.A. Kalas, P.P.G.W. Rodrigues, J.L. Jeveaux, H.G. Neto, M.M. Juliano and A.J. da Silva Neto	42
Analysis of Forces on a Submarine Outfall by a RANS-VoF Numerical Wave Tank E. Didier, M.G. Neves and P.R.F. Teixeira	50
Physical Modelling of Motions and Forces on a Moored Ship at the Leixões Port J.A. Santos, L.V. Pinheiro, H.S. Abdelwahab, C.J. Fortes, F.G.L. Pedro, R.P. Capitão, M.A. Hinostroza and C. Guedes Soares	60
Ocean Wave Energy as a Possible Power Source for the Brazilian Energy Matrix D.M. de Oliveira, L.A. Isoldi, E.D. Santos, L.A.O. Rocha and M.d.N. Gomes	70

Chapter 2: Diffusive and Advective/Convective Transport Problems

An ADMM-AHM Integrated Approach for Problems with Rapidly Oscillating Coefficients C.P. da Costa, A.M. Ferreira, L.D. Pérez-Fernández and J.B. Castillero	81
An Analytical Methodology to Air Pollution Modelling in Atmosphere R.S. Quadros, G.A. Gonçalves, D. Buske and G.J. Weymar	91
Performance Analysis of Stehfest and Power Series Expansion Methods for Solution to Diffusive and Advective Transport Problems C. Pilatti, B.D.d.A. Rodriguez and J.F. Prolo Filho	99
Oil Spill Simulations and Susceptibility in Coastal and Estuarine Areas C.B. Monteiro, P.H. Oleinik, B.V. Lopes, T.F. Leal, O.O. Möller Junior and W.C. Marques	109
Reproducibility of a Real Case of an Oil Spill during Vessel Supply Operation in an Estuarine Zone C.B. Monteiro, P.H. Oleinik, B.V. Lopes, T.F. Leal, D.V. da Silva, O.O. Möller Junior and W.C. Marques	121

Chapter 3: Heat Transfer

A Simplified Model for Particle Internal Temperature Calculation in Fluidized Bed R. Ferreira, J.A. Souza and R. Davesac	135
Evaluation of a Differential Evolution/Constructual Design Algorithm for Geometrical Optimization of Double T-Shaped Cavity Intruded into a Heat Generating Wall G.V. Gonzales, L.A. Isoldi, L.A.O. Rocha, A.J. da Silva Neto and E.D. Santos	145

Geometrical Evaluation of a Pair of Elliptical Tubes Subjected to a Flow with Forced Convection Heat Transfer

A.P. Del Aghenese, E.M. Heinemann, G.d.A. Barreto, F.B. Teixeira, L.A. Isoldi, L.A.O. Rocha and E.D. Santos

155

Geometry Evaluation of Heat Transfer by Mixed Convection in Driven Cavities with Two Inserted Fins

P.M. Rodrigues, C.C. de Escobar, L.A.O. Rocha, L.A. Isoldi and E.D. Santos

164

Chapter 4: Fluid Flow

Numerical Study of Newtonian Fluid Flows in T-Shaped Structures with Impermeable Walls

V.d.R. Pepe, L.A.O. Rocha, F.F. Zinani and A.F. Miguel

177

Application of the TELEMAC-2D Model in the Fluvial Hydrodynamics Simulation and Reproduction of Flood Patterns

A. Forster, J. Costi, W.C. Marques, A.G. Wormsbecher and A.R.R. Bendo

187

Wind Estimate by a Mesoscale Model

C.e.S. Gomes and N. Krusche

197
