## Preface

|                                                                                                                                                                                                                                                                                           |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>An Analytical Framework for the Study of Solid Body Cooling</b><br>I. Kopal, P. Košťál, Z. Jančíková, J. Valíček and M. Harničárová                                                                                                                                                    | 1   |
| <b>Experiments on Dissimilar Valve Lift (DVL) for Turbulence Increment on a Bi-Fuel Compressed Natural Gas (CNG) Engine</b><br>D. Ramasamy, K. Kadirgama, M.M. Noor and M.M. Rahman                                                                                                       | 19  |
| <b>Effects of Longitudinal Alignments on the Time-Mean Flow Structures of Side-by-Side Circular Cylinders of Diameter Ratio Two</b><br>S.Y. Tseng, S.W. Hsu and C.H. Kuo                                                                                                                  | 29  |
| <b>Optimized Pressure Determined in Accordance with Variable Plunger Stroke of Internal Injector NGV</b><br>K.S. Kim and D.S. Choi                                                                                                                                                        | 41  |
| <b>Dynamic Phenomena in Laser Processing - The Generation of the Surface Heat-Spot in the Sheet High-Speed Cutting with the Fiber Laser and Change of the Heating Domain</b><br>T. Arai                                                                                                   | 52  |
| <b>Measuring the Thermal Characteristics of Concretes Exposed to Extreme Conditions</b><br>M. Kušnerová, I. Kopal, V. Václavík, L. Gola, T. Dvorský, J. Valíček, M. Harničárová and V. Šimíček                                                                                            | 68  |
| <b>Analysis of Physical-Mechanical and Surface Properties of Wood Plastic Composite Materials to Determine the Energy Balance</b><br>M. Harničárová, Z. Mitaľová, M. Kušnerová, J. Valíček, D. Mitaľ, I. Kopal and V. Václavík                                                            | 78  |
| <b>Sliding Mode Control of a Water-Displacement Based Mechanism Applied to the Orientation of a Parabolic-Trough Solar Concentrator</b><br>J.A. Flores-Campos, J.A. Perrusquía Guzmán, J.A. Beltrán-Fernández and L.H. Hernández-Gómez                                                    | 90  |
| <b>Analysis of the Fluid Diffusion Characteristics in Platelet Pre-Mixer</b><br>B.X. Shen and W.Q. Liu                                                                                                                                                                                    | 98  |
| <b>Twice Optimized Evaporative Cooling System with Vortex Tube</b><br>G. Stanescu                                                                                                                                                                                                         | 103 |
| <b>The Thermophysical Bases of Monitoring of the Fireproof Lining Wear in the Blast Furnace Hearth</b><br>A.N. Dmitriev, M.O. Zolotykh, K. Chen and G.Y. Vitkina                                                                                                                          | 113 |
| <b>Numerical Analysis of the Oscillating Water Column (OWC) Wave Energy Converter (WEC) Considering Different Incident Wave Height</b><br>M.d.N. Gomes, E.A. Amado, E.D. Santos, L.A. Isoldi and L.A.O. Rocha                                                                             | 120 |
| <b>Estimate of the Wave Climate on the Most Energetic Locations of the South-Southeastern Brazilian Shelf</b><br>P.H. Oleinik, W.C. Marques and E.d.P. Kirinus                                                                                                                            | 130 |
| <b>Evaluation of the Seasonal Pattern of Wind-Driven Waves on the South-Southeastern Brazilian Shelf</b><br>P.H. Oleinik, W.C. Marques and E.d.P. Kirinus                                                                                                                                 | 141 |
| <b>Constructal Design of Double-T Shaped Cavity with Stochastic Methods Luus-Jaakola and Simulated Annealing</b><br>G.V. Gonzales, E.D. Santos, L.A. Isoldi, L.A.O. Rocha, A.J. da Silva Neto and W.R. Telles                                                                             | 152 |
| <b>Thermal Fatigue Analysis in a High Pressure Cooling System (HPCS) Nozzle of a Boling Water Reactor</b><br>L.H. Hernández-Gómez, B.L. Pérez-Escobar, J.A. Beltrán-Fernández, J.A. Flores-Campos, S. Pérez-Montejo, K.I. Jiménez-Santiago, P. Ruiz-López and G.M. Urriolagoitia-Calderón | 162 |
| <b>The Influence of Post-Heat-Treatments on the Tensile Strength and Surface Hardness of Selective Laser Melted AlSi10Mg</b><br>L. Hitzler, A. Charles and A. Öchsner                                                                                                                     | 171 |
| <b>Automatized Estimation of the Effective Thermal Conductivity of Carbon Fiber Reinforced Composite Materials</b><br>Z. Javanbakht, W. Hall and A. Öchsner                                                                                                                               | 177 |
