

Table of Contents

Preface and Committees

Chapter 1: Civil Engineering

Dynamic Inversion Study of Soil Mechanical Parameters in Wuhan Metro Gold Garden Station Foundation Pit Y.F. Feng and H.Z. Zhang	3
Case Study of Ground Fissures Generated by Liquefaction Following the Wenchuan Earthquake F.H. Yang, W.J. Liu and X.L. Yang	12
Experimental Study on Concrete-Filled Glass Fiber Reinforced Gypsum Wall Panel Compression Members K.Z. Zhao, F. Wang and X.F. Bian	16
Mechanical and Acoustic Emission Characteristics of Limestone after High Temperature G. Wu and D.Y. Wang	23
Research on the Spatial Stress Analysis of a Large Underground Project W.M. Xiang, Z. Huang, W.W. Gao and X.C. Zheng	29
Soap-Free Emulsion Polymerization for New Building Sealant J.J. Li, G.Y. Gao, Y.F. Wang and L. Guo	35
Earthquake Damage Model of Concrete-Filled Rectangular Tubular Column R. Guo, S. Guo and R.X. Wang	39
Seismic Performance Analysis of Transmission Tower System Based on MATLAB Numerical Calculation Z.X. Cao and X.L. Cao	43
Investigation on Steel Staggered-Truss System RC Slab Q.S. Guo and Q.S. Yang	49
Elasto-Plastic Analysis of Large Span Reticulated Shell Structure under Multi-Support Excitations F.Y. Bai, J.Q. Liu and L. Li	54
Change Properties of Water Conductivity Height in Coal Roof Induced by Mining in Extra Thick Coal Seams under Influence of Complex Fissures Zone S.G. Sun, G.H. Li, J.X. Wang, H.Y. Zhao and S.J. Feng	59
Softening Curve of Dam Concrete by Inverse Analysis and Size Effect of Softening Curve Z.F. Zhao, Q.Y. Wang, Z.H. Yang and Y. Yang	64
Nonlinear Finite Element Modeling of Concrete-Filled Circular FRP Arch Tubes under Monotonic Loading Y. Wen, J.G. Teng, T. Yu and G. Lin	69
Dynamic Characteristics of Curing Agent Modified Saline Soil in Laboratory Tests Z.L. Sui, X.P. Wang, C.L. Qu and Z.G. Li	73
A New Method to Assess Ductility of CFT Box Columns with Binding Bars under Axial Compression Y.L. Long and J. Cai	78
Performance Analysis of Concrete-Filled Steel Tube Column and Reinforced Concrete Column under Axial Compression C. Du, X.M. Yang and N.L. Li	82
Crack Analysis of Reinforced Wooden Housing Model through Shaking Table Test in Villages and Towns J. Zhou, J. He, Y.H. Zhang and C.L. Zhou	86
Stability Study of Self-Balanced Prestressed Latticed Shell Structure with Large Span G.D. Li, Q.Q. Li and W.C. Liu	90
Comparisons of EWM and DSM for Load-Carrying Capacity of Cold-Formed Lipped Channel Columns under Axial Compression S.J. Zheng, Y.W. Yang and D.F. Sun	94

Analysis on Flexural Capacity of FRP Reinforced Concrete Members C.X. Li, Z.S. Ding and S.L. Yan	98
Analytical Study of Seismic Progressive Collapse in a Steel Moment Frame Building N. Parsaeifard and F. Nateghi Alahi	102
Study on Steel Strand's Reasonable Tension Order of Reaction Wall D.G. Chen, Y. Yao and W. Gu	109
Reliability Analysis on Shear Capacity of Broad-Limb Special-Shaped Columns T.C. Wang, X.S. Chen and H.L. Zhao	114
Overall Stability Analysis of Dome Steel Structure on Dome Roof in Large Tanks Based on FEM J.F. Cao and C.H. Ji	121
Efficient Elastic Modulus Adjustment Procedure for Limit Analysis of Spatial Frame Structure B. Yu and L.F. Yang	126
Fuzzy Comprehensive Evaluation and Empirical Study of BT Mode Transaction Structure Scheme Design for College Campus Constructing C.Q. Yao, C. Wang and H.B. Ma	132
A Study on Elastic Input Energy Spectra Based on the Compound Intensity Indicator L. He and X.G. Ye	140
Finite Element Modeling and Structural Behavior of Stainless Steel Plates in Compression H.C. Zhu and J. Yao	146
Nonlinear Finite Element Analysis of Diamond Bird-Beak TX-Joints Z.Q. Zhu and S.L. Liu	151
Study on the Influencing Factors of Deflection-Span Ratio under Standard Load in Prestressed Concrete Hollow Slab X.Q. Cui, B. Guo and Y. He	156
Strain of High-Strength Concrete at Peak Compressive Strength Z.H. Lu, Y.G. Zhao and Z.W. Yu	161
An Investigation on the Interfacial Transition Zone in Concrete Using SEM H.C. Yang, M.Y. Cheng and J.P. Wang	166
Study on the Establishment of Integration Cost Dynamic Model of Construction Project Q.Y. Yu and H.Y. Qiu	171
Analysis on Orthogonal Test of L-Shaped Concrete-Filled Rectangular Composite Steel Tubular Columns J. Huang, S.B. Dai and Z. Peng	175
Effect of U-Bracket on the Structural Performance of Cold-Formed Steel Angle Connection A.L.Y. Ng and M. Chee Chiang	180
Simplified Design Method of Debris Arch Detention Dams Structure and Its Application in Highway Z. Li, Y.P. Zhu and X.R. Song	186
Research to Performance of Basalt Fibre Strengthen SBS Modified Asphalt Mixture Z.H. Liu, C.Y. Chen, R.J. Qin and X.T. Zou	191
Structural Damage Detection Based on the Wave Velocity Analysis Y.C. Guo and G.S. Hua	196
Non-Linear Finite Element Analysis on Composite Shear Wall with Opening T.M. Zhu, Y.H. Ye, W. Wei, W.Q. Liu and Z.J. Wang	203
Study on Large Air Cooled Thermal Power Structural Wind Properties under Different Wind-Break Wall Forms Z.L. Yao, F.N. Dang and G.L. Bai	208
Stability Analysis of Steel Pipe with Large Diameter under Radial Pressure during Deep Shaft Construction J.Z. Zhang	212
Effect of Strip Size on Neutral Angle during a Novel Semisolid Shearing-Rolling Process R.G. Guan, Z.Y. Zhao, R.Z. Chao, Q.S. Zhang and C.M. Liu	216
Progress of Building Materials and Foundation Engineering in Ancient Iraq A.T. Entidhar, A.A. Nadhir and S. Knutsson	220
Shaking Table Test of a Long-Span Continuous Girder Bridge Y.J. Chen, D.X. Zhou, W.M. Yan and Z.Y. Tang	242

Finite Element Analysis of Composite Volleyball Upright Structures L.Y. Shan and Y. Shan	247
Non-Structural Cracking Analysis of early Age of Reinforcement Concrete Wall T. Yao, J.Y. Zhang, J.P. Liu and Q. Tian	251
Analysis of Time Effects in Steel and Concrete Composite Beams Considering Relative Slippage Y.J. Yan and L.P. Qin	260
Experimental Study on the Interface Characteristics of Geogrid-Reinforced Fly Ash W. Shi, J. Han, Y.H. Jiang and Y.B. Li	264
Experimental Study on Seismic Stability of Shear Wall by Laying Insulated Shale Hollow Brick outside Y.H. Hao and L.J. He	269
Construction Monitoring Techniques for JU-MA River NO.3 Bridge Q. Du, Y.Z. Zhang and C.B. Song	274
Research on Mechanical Model and Fatigue Crack of Tubular Joint D. Yan	278
Large Deflection Analysis of 3D Steel Frame Using Finite Particle Method Y. Yu and Y.Z. Luo	283
Influence of the Temperature on GZO Film Deposited by DC Magnetron Reactive Sputtering S. Yu, H.D. Yang, B. Huang and J.S. Zhang	288
A Study on Additional Dynamic Effects after Members' Failure: Mechanism and Design Applications Y.H. Shi and Q. Lou	293
Experimental Study on Strength and AE Characteristics for PFRC with Different Fiber Content Y. Wang, Y. Wang, W.H. Xuan, G. Zheng and Y.Z. Chen	297
Study on Energy Dissipation of Shenzhen Baoan International Airport T3 Terminal Y.C. Yang, L. Gu, Z.Y. Zhu, K. Qin and L. Zhang	303
Behavior of GFRP Strengthened Reinforced Concrete Columns under Large Eccentric Compression Load J.Z. Wang, Y.F. Wang and S.Y. Wang	311
Preliminary Research on Effective Length of Concrete Filled Steel Tubular Columns in Sway Frame Y.L. Shi, F. Wang and W.D. Wang	318
Analysis on Surface Settlement Caused by Soil Pressure in the Chamber of Shield-Tunneling H.X. Sun, W. Zhao, Q. Zhou and Z. Zhang	322
A few Issues about Relieving Traffic Congestion of Cities by Improving Management Based on Foreign Mode Q.H. Li	326
Experimental Study of Bond Stress Distribution between Reinforcement and Different Strength Self-Compacting Concrete Bond under Dynamic Load S.R. Luo, J.P. Zhuang and Y. Wang	330
A Simplified Model of SSI Dynamic Analysis Z.Y. Zhang, Y. Li and Q. Sun	334
Relative Importance of Key Performance Indicators of Construction Projects towards Buildability at Design Stage M. Nourbakhsh, S.H. Mydin, R.M. Zin, S. Zolfagharian, J. Irizarry and M. Zahidi	340
Static Elasto-Plastic Analysis on Mega Steel Frame-Prestressed Composite Bracing Structure J.H. Shao, R.H. Xu and B.J. Tang	345
Optimal Design of Flat Tensegrity Structure Based on the Genetic Algorithm C.J. Lu, X.D. Wang and Z.F. Wu	349
Analysis of Common Defects for Rammed Earth Buildings Y.X. Zhang and L.P. Tong	353
A Simplified Numerical Method of Composite Foundation for the Circular Basis X.W. Liu and X.M. Geng	358

Nature Frequency Identification of Prestressed Concrete Beam with RBF Network R.G. Li and G.L. Yang	362
Nonlinear Mechanical Characters of Shallow Reticulated Spherical Shells with Initial Damage L. Li, J.P. Hao and Y. Huang	366
Experimental Study on Seismic Behavior of Steel-Plate Reinforced Concrete Shear Wall with Rectangular CFST Columns J.W. Zhang, W.L. Cao and H.Y. Dong	370
Shaking Table Test Study on Mid-Story Isolation Structures J.M. Jin, P. Tan, F.L. Zhou, Y.H. Ma and C.Y. Shen	378
Research on Dynamic Compressive Failure Criterion of Concrete at High Temperature Y. Li, J.L. Tao, F. Gao and K. Li	382
Pushover Analysis of Light-Weight Steel Portal Frame Structures under Strong Wind Loading S.F. Chen and Y. Gong	386
Analysis of the Damage of Decompression Cone's Column in the Silos Y.L. Wei	390
Application and Experimental Study on Seismic Behavior of Composite Core Walls with STRC Columns H.Y. Dong, W.L. Cao and J.W. Zhang	395
Geometric Parameter Design of Self-Locking Foldable Latticed Shells in Deployment Process C.J. Lu and H.B. Zhao	400
Construction of Four-Dimensional Disaster Prevention Space in Hilly Cities S.R. Qian and J.H. Li	404
Study on the Seismic Behavior of Buckling Restrained Braced Steel Frames G.Q. Liu and J. Song	409
Behaviour of Composite Beam of CFST Truss with Diagonal Web Members J.F. Wang, Z.M. Zheng, Z.L. Wu and J. Zhou	414
Experimental Study on Seismic Behavior of Small-Sized Fly Ash Hollow Block Wall M. Xu, Z. Peng, M.J. Chen and Z.F. Chen	418
Realization of Strong Column-Weak Beam Failure Mode for Concrete-Filled Square Steel Tubular Frame Structure J.B. Liu and X. Li	424
Structural Analysis and Internal Force Calculation of Variable Cross-Section Silo R.T. Ma	429
Research on Short Term Flexural Stiffness of Concrete Beams with High Strength Steel Bars J.M. Zhou, S. Chen, X.F. Wang, Y. Zhao and Y. Tan	435
Normal Section Bearing Capacity of Light Weight Aggregate Concrete Member with Circular Section under Eccentric Compression X.H. Liu, J. Cheng, I.Y. Jang, J.K. Park, F.P. Zhao, Y.H. Zhai, Y.F. Liu and Y.W. Yun	445
A New Method to Cable Performance Assessment X.Y. Sun, Z.Q. Wang, X.N. Meng and Z. Ju	450
Compound Modified Asphalt Performance Research W. Yi, H.W. Hu, Y.H. Wang and C.Z. Qu	454
Simplified Modeling Research of Reinforced Concrete Based on the Dynamic Stiffness Equivalence J. Hu, J.Q. Feng and X.N. Zhang	458
Axisymmetric Punching Capacity Analysis for Concrete Slabs X.R. Hu and X.M. Fan	463
Predictive Method for Concrete Dosage of High-Rise Shear-Wall Structure Residence Buildings J.J. Zhu, X. Lu and X.F. Hong	471
Structural Plane of Rock Mass Strength Characteristics and its Impact on Groundwater T.L. Xiao, X.P. Li and Y.N. Lu	476
Split Rigidity Method for Analysis of Double-Layer Space Grids Structure with Rectangular Shape W.Y. Liu and W.F. Zhang	480

Fracture Mechanism and Ductility Construction of Joints of H-Style Beam-Square Tubular Column	
Y.Q. Huang, W.Z. Wang, W.T. Wang and K.T. Tong	484
A Comprehensive Study of the Seismic Requirements for Bond between Concrete and Reinforcing Steel	
K.A.D.I. Bsisu and Y. Hunaiti	490
Study on Semi-Rigid Roadbase Material Diseases Damage	
F.C. Zhang	494
Nonlinear Analysis of Concealed Beam in Out-of-Plane Beam-Wall Joint	
J. Bai and G. Bai	498
Experimental Study on Seismic Performance of Frame Joints Strengthened by Self-Compacting Concrete Considering the Influence of Interface Treatments	
J.L. Zheng and W.D. Wu	502
Mix Ratio Test and Basic Property Analysis for Autoclaved Aerated Concrete (AAC) Block	
Z.W. Fu and S.H. Zeng	508
Research on the Ultimate Bearing Capacity Analysis of TK-Joints by Finite Element Analysis	
L.H. Cao, Y. Yu and Y. Zhang	513
Influence Analysis of the Concrete Temperature Field with Different Computed Methods	
Y.L. Lu, J.Q. Li and L. Wang	517
Experiment Study and Process Parameters Analysis on Turbo Air Classifier for Talc Powder	
Y. Yu, J.X. Liu and L.P. Gao	522
Case Analysis of Large Public Office Building Energy Saving	
C. Xiang	528
Finite Element Analysis for Unstiffened Overlapped CHS K-Joints Welded in Different Ways	
X.L. Wang, P. Chen and W.W. Yang	533
Kinetics of Nitrites Adsorption on AB2 Type Hyperbranched Poly(Amine Ester) Modified by Trichlorooctadecylsilan	
L.B. Bai, Y.N. An, A.Q. Wang, H.S. Zhang, X.X. Pan and X.W. Ba	537
Experimental Study of Concrete Early Creep Determination by Using Lying-Tensile Creep Device	
H.W. Liu and L. Ma	542
Application of Random Aggregate Model to the Problem of Concrete Penetration	
Y. Zeng, J.L. Tao, Y. Yao, X.L. Liu and Q.H. Ren	546
Reliability Analysis of Circular Concrete-Filled Steel Tube with Material and Geometrical Nonlinearity	
T.F. Xu, T.Y. Xiang, Y.L. Zhan and R.D. Zhao	550
An Identification Method for Damping Ratio of <i>In Situ</i> Building	
Z.Y. Zhang, Q. Sun and Z. Yang	556
Study on Bearing Capacity of Reinforced Concrete Columns Strengthened by Adding Wing Walls	
Y. Zhang, J. Guo, L. Cheng and R. Liu	561
Strain Mode Damage Detection in Reinforced Concrete Beams Application	
J.Q. Wu, J. Yao, H.Y. Li, L. Cao and K. Ma	566
Investigate the Statistical Damage Model of Transversely Isotropic Soil	
S.Y. Chen, Y.P. Zhu, Z. Li, T.Y. Zhang and X.F. Teng	572
On Buckling Loads of Timoshenko Columns with Elastically Supported Ends	
H. Zhang and X.F. Li	578
Research on Blasting Vibration Safety Assessment Parameters	
M. Chen, W.B. Lu and D.Q. Shu	582
Elasto-Plastic Design of Piled Raft Foundation	
A.H. Han and H.J. Zheng	588
Improved Knapsack Problem Algorithm Based on Greedy Strategy for Tower Nesting	
L.B. Cai, S. Wei, J.H. Yuan and L. Li	592
Study on Numerical Analysis of Tunnel Longitudinal Uneven Settlement Base on Elastoplastic Theory	
S.H. Wu, Z. Li and S.Y. Chen	596

Experimental Investigation of Ductility of Reinforced High Strength Concrete T-Section Beams Retrofitted with CFRP S.Y. Wang and Z.Y. Wang	601
Simplified Calculation Method of Optimal Centre Line of the Arch S.Z. Liu	611
Advanced Analysis of Staggered Truss of Steel Structure W.W. Yang and X.H. Zhou	615
Study on Aseismic Behavior of Shear Wall with Frame Column in the Large Thermal Power Plant Z.W. Shen, S.L. Wang and X. Zhao	621
Review of the Nonlinear Vibration Analysis of Simply Supported Beams W.B. Sun and W.Z. He	626
Research on Seismic Performance of Core Wall in Hybrid Structure H.Y. Cai, L. Guo and L.S. Chu	630
Influence of Coarse Aggregate Size on Softening Curve of Concrete Z.F. Zhao, X.J. Feng, Z.G. Zhao and L.J. Yang	636
Nonlinear Stability Analysis of Cylindrical Double-Deck Reticulated Shallow Shells under Wind Load J.C. Xu, Y. Li and C.Y. Ou	642
A Discussion about the Improvement of Finite Element Analysis Units of Castellated Beam D.B. Zhu, X.J. Cao, Y.S. Bai and Q.W. Zhang	648
Numerical Simulation of Effect of Fracture Distribution on Failure Mechanism of Tunnel R.H. Hwang, T.H. Yang, Q.L. Yu and P.T. Wang	652
Numerical Simulation Research about Group High-Rise Buildings around Wind Environment L. Huang and X.B. Liu	657
Experimental Study on Normal-Section Bearing Capacity of Steel Reinforced High-Strength Concrete L-Shape Short Pier Shear Wall Y.S. Su, J.Y. Quan, M. Cai, S.F. Zheng and Y.L. Wu	661
Reliability Analysis of Concrete-Filled Tube Column L.L. Liu	667
Experimental Research on Seismic Performance of Cast-In Situ RC Grillage Shear Walls Formed with Heat Preservation Hollow Blocks W.J. Zhang, Y.N. Du and J.R. Qian	672
Research on Serpiginous Bars Connectors of Steel-Concrete Composite Beams Q.N. Li, Z.Y. Zhang and W.S. Jiang	679
Seismic Behaviour of Reinforced Gangue Concrete Columns J.F. Wang, J. Wang and B.H. Wu	683
Nonlinear Finite Element Analysis for Compressive Capacity of Interior Constrained Square Concrete-Filled Steel Tube Column Q.S. Zhou, Y. Xu and Z.W. Yu	688
Different Design Parameters Analysis of Unbonded Precast Reinforced Concrete Frame Structure J.Q. Han, X.Y. Fu and J.M. Tang	695
Influences of Horizontal Strengthened Storey on Foundation Settlement in High-Rise Frame Tube Structure X.P. Liu	699
Experimental Research on the Durability of PVA Fibers Reinforced Concrete Y.D. Yan, J.H. Mao and C.H. Lu	703
Experimental Study on Seismic Behavior of Cold-Formed Thin-Walled Steel R.C. Shear Wall M. Xu, Y.Q. Yao, L. Chen and Z.F. Chen	708
Finite Element Analysis of Excavation of Shallow Tunnels under the Existing Road Z. Wang, Z. Wang and S.F. Xu	714
Flexural Strength and Stiffness of High Strength Concrete Beams with Exposed Main Steel H.R. Azizipesteh Baglo and M. Raoof	718
Experimental Investigation of the RC Columns Strengthened with Outer Closed SCC under Cyclic Loadings J.L. Zheng and W. Fan	728

Computer Modeling and Parametric Study of Thermal Effects in Integral Abutment Bridge M. Awad and T.L. Yu	733
Damage Assessment of RC Frame Structures under Multi-Earthquake Sequences W. Huang, J. Qian, B.B. Zhuang and Q.S. Fu	739
A Concise Finite Element Model for the Analysis of Simple Wire Strand with a Broken Helical Wire W.G. Jiang and L.J. Yan	745
Analysis of the Seismic Response of Long-Span Tube Shell Structures under Multi-Support Excitations M.H. Wang, F.D. Song, P. Zhuang and S.S. Shi	751
A Model for Predicting the Carbonation Depth of SCC with Massive Fly Ash in the Loading State S.R. Luo and L.P. Huang	756
New Rock Burst Prediction Method L. Deng, Y. Lv and R.G. Deng	762
Influence of the Opening's Position on Seismic Performance of Autoclaved Aerated Concrete Composite Wall with Core Columns H.G. Wu, J.H. Chen and J. Gu	767
Comparison of Mechanical Properties between Grid Frame Core-Tube Structure and Tube Structure Q.M. Wang, K.J. Ma, Z.H. Chen and T. Sun	771
Joint Construction of Assembled Integrally Floor Q.N. Li, H. Huang and W.S. Jiang	775
Determination of Fatigue Load for Light Rail Support of Caiyuanba Yangtze Bridge in Chongqing Z.L. Wu, S. Jing and J.M. Liu	780
Creep Properties of ASTM A992 Steel at Elevated Temperatures M.A. Morovat, J.W. Lee, M.D. Engelhardt, E.M. Taleff, T.A. Helwig and V.A. Segrest	786
Creep of the Plane Steel Frame at Elevated Temperature H. Zhu and Y.C. Wu	793
Analysis of Crack Interaction Problem by the Numerical Manifold Method H.H. Zhang	797
Research on Peak Stress of CFRP Confined Concrete Columns under 2 Times Compression W.H. Ma	802
Numerical Analysis on Bending Deep Beams with Different Moduli in Tension and Compression J.Y. Sun, Z.H. Cai, Z.L. Zheng and X.T. He	807
Nonlinear Analysis of Full-Scale Beam-Column Joints of RC Frames E.W. Guo, Z.B. Li, H. Ma, H.Y. Zhou, X.L. Du and G.H. Luo	811
A Novel Approach for Evaluation of Stress Intensity Factors Using X-FEM L. Wu, L.X. Zhang and Y.K. Guo	816
Dynamic Time History Analysis of the Effect of Infilled Walls on the Steel Staggered-Truss System Q.S. Guo and Q.S. Yang	824
Nonlocal Dynamic Model of Doubly Clamped Initially Tensioned Beams Accounting for Small Size Effects C. Li and W.G. Huang	829
Dynamic Characteristics Analysis of Two Adjacent Transmission Towers X.M. Yan	833
Dynamic Analysis of Large-Scale Power House Y. Zhao, S.F. Yuan and J.W. Zhang	837
Cracking and Temperature Control in Mass Concrete Construction Z.Q. Xu, Y.G. Ding, C.Y. Zhai and Q.J. Li	841
Simplified Second-Order Analysis of Semirigid Connected Steel Frames W.L. Xu and J. Xu	846
Influences of Beam Type Strengthened Storey on Horizontal Displacement in Super High-Rise Structure X.P. Liu	853

Simplified Analysis of Second-Order Effect on Staggered Truss Structure Q.S. Zhou, X.H. Zhou and L.M. Yang	857
Interfacial Shear Calculation of Concrete Beams Strengthened with FRP Plate under Temperature and Creep Effect J. Yang, L.G. Wang and B.L. Chen	863
Initial Stiffness Analysis of Steel Portal Frame End-Plate Connections Based on Finite Element Method H.W. Liu and J. Li	867
Study on Equivalent Damping Ratio of Shenzhen Baoan International Airport T3 Terminal Y.C. Yang, L. Gu, Z.Y. Zhu, K. Qin and L. Zhang	871
Estimation of Dynamic Wind Pressure for Multi-Span Greenhouse Structural Design D.F. Sun	878
Application of Fly Ash and Coal Gangue for Preparing High-Class Solid Insulating Brick by Roasting at Low Temperature Conditions Z.F. Xu, M.X. Zhang and J.B. Zhu	883
An Integrated Model to Design Earthquake Resistant Structures M. Nourbakhsh, S. Zolfagharian, M.Z. Rosli, M.A. Nekooie, R. Taherkhani, M. Navazandeh Sajoudi and M. Kasraei	890
Experimental and Simulation Study of a Hybrid Frame Structure with Viscous Dampers H.M. Zhang, X.L. Lu and C.G. Meng	894
Dynamic Simulation of Sluice Foundation Piping Using Variable Grid Method X.Y. Zhang and J. Yan	900
The Analysis of Structure Deformation Using DDA with Third Order Displacement Function T. Huang and Y. Liu	906
Occlusal Cast-in-Place Piles of Whole Casing Soil Grab Z.S. Zou, Q.H. Kong and W.Q. Zhang	917
Numerical Analysis of Square Steel Tubular Columns Filled with Steel Reinforced Concrete Subjected to Eccentric Load G.F. Yu, X.D. Zhao and H.Y. Sui	922
Research on Denoising of GPS Data Based on Nonlinear Wavelet Transform Threshold Method D.B. Yuan, X.M. Cui, G. Wang, J.J. Jin and W.Y. Xu	926
Reduce, Reuse, Recycle and Recovery in Sustainable Construction Waste Management M.A. Kazerooni Sadi, A. Abdullah, M. Navazandeh Sajoudi, M.F.M. Kamal, F. Torshizi and R. Taherkhani	937
A Research on the Change Law of Small Wastewater Amount M.Y. Shi and Y. Gao	945
Stress Analysis of Cement Concrete Pavement under Overweight Loads Y.N. Lu and T.L. Xiao	949
Influence of Permeated Crystalline Waterproof Materials on Impermeability of Concrete K.L. Wang, T.Z. Hu and S.J. Xu	954
The Seismic Analysis of Cooperative Grid with Prestressed Upper and Lower Chord Cables S.D. Nie, G.X. Dai, G. Xiong, W.F. Zhang, X.H. Sun and W.Q. Feng	961
Analysis on the Seismic Response of Hangzhou Metro Tunnel in Soft Soils G.C. Wang, J. Yao, L. Sha, L.C. Yu and X.W. Zheng	966
The Test of Nitrogen and Carbon Removal by Leachate, Fecal Sewage and Municipal Wastewater M.Y. Shi, Z.J. Feng, K.S. He and J.P. Li	970
Reflections on Narrative of Contemporary Western Landscape Space T.Y. Qiu and S.F. Liu	975

Chapter 2: Bridge Engineering

Experimental Study on Axial Compression Performance of Full-Scale Square Columns of Reinforced Concrete Confined by High-Strength Reinforcement Hoops Z.B. Li, W.J. Wang, W.J. Zhang, Y.D. Shao, B. Zhang, M.G. Fan and S.P. Lin	981
--	-----

The Research on the Application of Soil-Rock Mixture Material in Rammed Earth Buildings	
T.G. Zhou, Y. Xu and C. Zhang	989
Based on the Series System Initial Tunnel Lining Supporting System Reliability Analysis	
S.Y. Chen, Z. Li, Y.P. Zhu, T.Y. Zhang and H.W. Ou	995
Developing an Executive Information Site Monitoring System	
W.Z. Zakaria, M.Z. Abd. Majid and M. Nourbakhsh	1002
Experimental Study and Theoretical Analysis on Seismic Performance of RC Shear Wall with STRC Columns and Embedded Steel Plate	
W.L. Cao, H.Y. Dong and J.W. Zhang	1006
Research Development and Key Technical on Floating Foundation for Offshore Wind Turbines	
R.Y. Zhang, C.H. Chen, Y.G. Tang and X.Y. Huang	1014
Experimental on the Service Behavior of Large-Span Steel-Concrete Box Beams	
L. Li, G.C. He and L.Y. Zhou	1020
Analysis of Importance of Concrete Bridge Configurations Based on AHP	
X.X. Tang, Y.P. Zhu, X.Z. Tang and Y. Xu	1030
A Simplified Model and Experimental Response of Self-Centring Bridge Piers with Ductile Connections	
J. Guo, K.G. Xin, W.P. Wu and M.H. He	1036
Numerical Simulation and Calculation Analysis of Suspension Bridge Anchorage System	
H.J. Wu and W.L. Qiu	1042
Mechanical Behavior of Composite Girder with Perfobond Shear Connector under Hogging Moment	
J. He, Y.Q. Liu, C. Zhao, A.R. Chen and T. Yoda	1046
The Influence of Technical Factor and Ingredient Design on Crystallization Behavior of MgO-SiO₂-Al₂O₃-B₂O₃-KF Glass-Ceramics	
X.L. Zhang, J.W. Fan and P. Fan	1054
Research on Gradient Law of Beam Height in Long-Span Continuous Rigid Frame Bridge	
G.D. Zheng and H. Zhang	1059
The Influence of Concrete Creep on Deflection of Box Beam with Sectional Joints in Continuous Rigid Frame Bridge	
R.X. Wang, F. Li, R. Guo and S.W. Zhao	1063
Study on the Influence of Beam Rigidity on Continuous Rigid Frame Bridge with Moving Vehicle	
R.X. Wang, X.S. Chen, F. Li and S.W. Zhao	1067
Study on the Properties of Fiber Reinforced Sulphoaluminate Cement Mortar	
Z.M. Ye, Q.Y. Wu, P. Du and X. Cheng	1071
A Research on Prediction and Control of Welding Distortion and Residual Stress for an All-Welded Steel Bridge	
X.F. Yan, L. Shi and L. Zhou	1076
Seismic Risk Analysis of Bridge Structures Based on Total Probability Theorem	
G.L. Wang and J.M. Wang	1085
Research on Lifting Techniques of Large Segments of Steel Box Girder of Chongqi Bridge	
H. Zhang and R.Z. Zhou	1094
Reliability-Based Optimization Design of Variable Cross-Section Component	
T.X. Zhang and X.H. Liu	1099
An Experimental Study on Fire Resistance Performance and Evaluation of Asymmetric Slim Floor Beam	
H.J. Kim, H.Y. Kim and S.Y. Park	1103
Chaos Behavior and Control of Stay-Cables	
J.H. Li, Q.L. Yan and J.S. Liu	1109
The Impact of Cold Wave Strike on Thin-Walled Concrete Structure	
Z.H. Wang, Z.G. Wang, G.X. Zhang and Y. Liu	1115
Dynamic Performance and Seismic Analysis of Tied Arch Bridge	
H.J. Wu and W.L. Qiu	1119
The Research of Pile Load Test on Permafrost Regions	
X. Wang, L.F. Wang, Z.Q. Wang and Y.H. Feng	1123

Research the Weathering Characteristics of Tertiary Silty Mudstone along Chengnan Freeway S.M. Wan, Q.H. Wu and Y.L. Yang	1127
Seismic Response Analyses of Isolated Bridges with Different Isolation Bearings S. Wang, L.H.W. Heisha, F. Yu and G.X. Wang	1132
Key Technology of Construction Control of the Middle Pylon of Taizhou Bridge N. Yang, X.P. You and Y.T. Zhang	1138
The Security Study of Train Derailment on High-Speed Railway Bridge Y.S. Lin and L.H. Xin	1144
Full-Scale Segment Model Test and Stress Analysis of Abnormally Shaped Anchorage Zone of Cable-Stayed Bridge Pylon Y. Li and Q.F. Cai	1148
Analysis for the Influence of the Admixture on the Solidification Rate of Expansion of the α-High-Strength Gypsum Plaster X.H. Meng, Z.Q. Jin, Q. Li and J.X. Zhang	1153
Technologies on Replacement of Structural Members in Prestressed Concrete Cable-Stayed Bridges H.J. Li	1158
Settlements of Existing and Widened Embankments over Soft Soils W.P. Cao and Q.C. Shi	1167
Static Analysis of Prestressed Concrete Bridge with Slant-Legged Rigid Frame X.K. Li, X.J. Liang and S.M. Liu	1172
The Impact Analysis of Temperature on the Line Shape in Cantilever Construction D.M. Zhang, C. Zhao and Y.B. Chi	1176
Study on Diseases of Multi-Box Girder Bridge W.L. Qiu, C.L. Huang and Z.Y. Chen	1182
Study on the Development of Bridge Detection Vehicle Test J.B. Song and Z. Xu	1186
Determination of Transverse Amplitude of Microbeam Vibrating Accounting for Nonlinear Effects C. Li and W.G. Huang	1190
Analysis of Eccentric Load Causing Torsion Effects of Variable Cross-Section Continuous Box Girder during Cantilevered Casting M. Xiang and C.J. Yang	1194
Stability Analysis during Concrete Pumping for a CFST Arch Bridge Rib Y.J. Chen, X.Q. Ren, J.J. Wang and D.P. Gu	1199
Reliability Analysis and Sensitivity Design of the Uniform Strength Component Q.L. Liu, H.F. Xing and T.X. Zhang	1203
Seismic Response of Baihua Viaduct during the Wenchuan Earthquake and Methods of Reducing Seismic Damage X.D. Yang, W.M. Yan, Y.J. Chen and Y. Li	1207
Stress Monitoring on Cantilever Construction Stage of the Main Bridge of South-to-North Water Transfers Canal Q. Du, Y.P. Yang and X.H. Li	1213
Research on Horizontal Scheme for Multi-Pylon Cable-Stayed Bridge Y. Qiang, L. Li, P.C. Li and H. Jian	1217
Study on Bridges' Global Flexibility Index for Ambient Vibration Q. Du, H.Y. Jiang and X.H. Li	1221
Research on the Modal Analysis and Reinforcement of Suspension Line Old Bridge H.Z. Luo, J.J. Xu, J. Liu, K.Y. Wang and Y. Zhang	1225
An Experimental Study on the Thermal Properties of Concrete under the Load Ratio Condition in a Fire H.Y. Kim, H.J. Kim, J.S. Lee and K.H. Kwon	1231
Study on Optimizing Design of Structural Rigidity of Super-Large Span Continuous Rigid Frame Bridge Using ANSYS X.W. Xue, H. Yuan and S.Q. Li	1243
Ultimate Bearing Capacity Analysis of Concrete Filled Steel Tubular Arch Considering the Initial Defects' Influence J.L. Hu, Q.S. Yan, X.L. Yu and H.B. Zheng	1248

Construction Monitoring of Dukeng Bridge X.L. Yu, B.Y. Jia, J.L. Hu and Q.S. Yan	1252
Longitudinal Vibration Control of Floating System Bridge Subject to Vehicle Braking Force with Viscous Dampers M.G. Yang and Z.Q. Yang	1256
Interpolation Technology and its Application in Damage Analysis of Bridge Structure K. Ding	1261
Effect of Cooling Pipe in Thin-Walled Hydraulic Structure during Construction Z.H. Wang, G.X. Zhang, Z.G. Wang and Y. Liu	1266
Spatial Numerical Analysis Method of Coupled Vibration between Whole Vehicle Model and Curved Bridge Caused by Bridge Deck Roughness Y. Shi, S.T. Fang, Q.Y. Tian and W. Chen	1270
Mechanical Analysis on Anchorage Structure of Self-Anchored Suspension Bridge J.X. Zhou, Q.T. Su, C. Wu and G.T. Yang	1277
Study on Pretensioning Force of Wrapping Wires for Suspension Bridge Cables S. Zhang and Q.S. Sun	1283
Analysis of Bridge Dynamic Load Tests J.X. Chen, T. Xia, J. Huang and G. Zhang	1289
Constitutive Model of Saturated Structural Clays Based on SMP Failure Criterion M. Yu	1293
An Experimental Study on the Fire Behavior of CFT Columns under the Constant Axial Loading Condition in Fire H.J. Kim, H.Y. Kim and I.H. Yeo	1298
Research of Self Pre-Stress Test of Concrete-Filled Steel Tube Arch Rib F.W. Huang and H.T. Yang	1307
Research on the Technology of Defects Detection in Prestressed Pipe Grouting X.Y. He, J. Liu and Y.L. Guo	1312
Influence of Reinforcement on Temperature and Stress of Hollow Pier Y.F. Wu and Y.Y. Sun	1319
Discussion on the Sound Radiation Coefficient of Building Materials Y. Yang, X.F. Huang and J. Liu	1325
Influence of Cross Beam on the Stress of Joints in A-Type Pier of a Bridge C.P. Tang and L.L. Zhang	1329
Effect of Side-Web Slope on Loading Properties of Prestressed Continuous Box-Girder Bridge with Changed Sections F.L. Li, S.M. Zhang and S.M. Liu	1333
Parameters Analysis with Regard to the Hollow Floor Based on the ABAQUS Secondary Development C.T. Huang, Z.J. Wang and Y.Y. Qu	1337
Numerical Research on Relationship between Displacement and Ground Overloading of Soil Nailing with FLAC J.P. Sun, G.B. Shao and Z.B. Jiang	1343
Long-Term Bonding Strength between Flue Gas Desulfurization Gypsum and Polymer Cement Mortar R. Mu, L. Wang, W.L. Tian and W. Cao	1348
Damage Localization of Output-Only Frame Systems Using Stochastic Subspace Identification Y.P. Wang, Y.T. Lin and G. Huang	1352
Design and Damping Force Analysis for Turbine Composite Regenerative Damper Y.Q. Gao, J.Q. Zhang, J. Yue and Z.Z. Peng	1360
Study on Optimum Mixing Ratio and Properties of Lightweight Soil Using Recycled Sludge G.C. Wang, F.L. Jin, L. Sha and L.P. Huang	1366
The Elastic Solution for Internal Force and Deformation of the Muti-Bracing Sustaining Structures D.Z. Kong, J.J. Wei and Y.X. Song	1370
The Experimental Study on Reinforced Concrete Short-Columns Restrained by Corroded Stirrups Q. Li, D.T. Niu and L. Liu	1376

The Study for the Critical Moment of Arches in the Action of Endmoment Considering Shear Lag	
Y.J. Chen and Q.Z. Luo	1380

Chapter 3: Geotechnical Engineering

Finite Element Analysis of the Vertical Bearing Capacity of Single Piles in Tianjin Soft Soil Areas	
S.L. Feng, Y.M. Zhou, J. Li and P.L. Li	1387
Study on the Pore Distribution Characteristic of Sandstone	
J.Y. Zuo, L. Zhou, H.D. Yu and Y.Q. Liu	1391
Experimental Study on Dynamic Elastic Properties of Gas Hydrate Bearing Sediments	
L.D. Li, Y.F. Cheng and X.J. Sun	1396
Selection Analysis of Enclosure Structure for Deep Foundation Pit under Complicated Geological Conditions	
Q. Hu, S.M. Luo and Z.J. Jiang	1400
Simplified Models to Evaluate Site Characteristic Period	
L.W. Chen, W.M. Wang and X.M. Yuan	1404
Reserch for Anchor Mechanical Character of Fully Grouted Bolt	
X.K. Bao and Y. Li	1408
Creep Property of Reticulate Red Clay under Stepped-Load Creep Tests	
J.Z. Li, Y.F. Cao and Y.J. Qing	1412
Application of BP Neural Networks in Damage Prediction of Multilayer Medium Penetration and Blasting	
X.L. Liu, T. Lei and Y. Yao	1417
Shaking Table Tests on Chinese Ancient Tenon-Mortise Structure Strengthened by Iron Hook	
Q. Zhou and W.M. Yan	1421
Settlement Calculation and Analysis of Ground Improved by Dynamic Compaction at RSGT Project	
Z.G. Qin, Y. Luo and Y.X. He	1426
Study on the Prediction Method of Tunnel Surrounding Rock Pressure Based on the Theory of Progressive Destruction	
S. Wang	1432
Fatigue Life Analysis of Reinforced Retaining Wall under Cyclic Loading	
Y. Li	1437
The Experimental Study on the Performance of the Reinforced Red Mudstone Using Triaxial Tests	
S. Zhuo, N. Wang, P. Lu and Y. Yao	1445
Research on Coarse-Grained Soil Collapsibility in Gobi Region	
Z.H. Nie, K. Li and J. Xia	1450
Undrained Behavior of Unsaturated Bentonite-Sand Mixture	
W.J. Sun, D.A. Sun and J.Y. Zhang	1454
Research on the Prevention of Shaft Lining Fracturing in the Special Strata Based on the Monitoring Information	
P.L. He and C.R. Liu	1458
Normalized Numerical Analysis for Load-Displacement Curve of Uplift Pile in Soft Soil	
X.B. Li, J. Wei, Y.P. Li and B. Zhu	1462
Centrifuge Modeling of Vertical Bearing Behavior of Bolt-Shotcrete Supported Slope	
W. Li, J. Cao and R.H. Zheng	1468
Predict Model for Water Content of Dredged Sludge under the Aeration-Vacuum Condition	
Y.F. Gao, Q.Y. Zhang, Y. Zhou and Y. Zhang	1472
Conductors Vibration Model Improved and Nonlinear Vibration Analysis	
L. Qin, W. Li and B. Ai	1476
Study on Yield Surface under Different Load Directions for Sekiguchi and Ohta Model	
Z.H. Dong, Y.B. Gao and J.Y. Yuan	1481

Research on the Construction Technique of Super-Large Diameter Rock-Socketed Piles in Karst Areas	
H.F. Xing, M.H. Meng, W.X. Long, G.B. Ye and W.Y. He	1486
Research on Shear Failure Criterion for Layered Rock Mass	
Z.Z. Zhang, L.L. Zhou, Z.X. Yuan and Z.H. Sun	1491
The Study of Large Vibration Compaction on Soil-Stone Mixture Poisson's Ratio with Wave Velocity	
Y.H. Zhang and X.M. Zhang	1497
Characteristics of Fouling in Urban Sewage Source Heat Pump System	
C.H. Zhang, Z.G. Yang and D.X. Sun	1502
Stability of Geotechnical Material by Safety Factor of Rock Mass Element	
X.G. Xie, Z.Y. Yu and Z.Y. Dai	1506
Study on Pore Water Pressure Model of Soft Clay	
Y. Zhang, L. Wan, Y. Huang and J. Fu	1510
The Engineering Accident Analysis of Cast-In Situ Bored Pile	
B. Tang, T. Wang and Z.N. Shan	1514
Design Method for the Base Beam Connected to Single Pile Cap	
C.H. Ding	1520
Non-Linear Hoek-Brown Shear Strength Reduction Technique Considering the Effect of Dilation	
T. Ai, R. Zhang, L. Ren and W.X. Fu	1524
Correlation Analysis Between the Treating Depth of PVD and the Subsidence of Soft Ground Foundation of Expressway	
J.B. Chen, Q.H. Zhao, S.Q. Peng and P.H. Xiong	1531
Research on the Weathering Problems of Longmen Grottoes	
T. Xu and W.X. Ding	1537
Research on Analysis and Design Method of the Pile-Raft Foundation with Post-Cast Concrete Strip	
Z.W. Shen, Z.M. Yang and Y.M. Zhang	1541
Application of Cusp Catastrophe Model to Predicting of Water Inrush from Mine Floor	
C.L. Zhang and G.S. Zhong	1546
Frequency Response Characteristic of a Flexible FBG Sensing Beam for Measuring Dynamic Lateral Displacement of Soil in Shaking Table Tests	
Y.L. Wang, X.M. Yuan, Y.R. Li and L.W. Chen	1551
Study on Safety Factor of Loess Cave Dwellings with Pitted Courtyard in Different Rainfall Infiltration	
J.M. Han	1555
Research on the Feasibility of Shape-Stabilized Phase-Change Materials at Lower Temperature Used in the Phase Change Wall	
Q.Y. Yan, R. Huo and L.L. Jin	1559
Comparison of Dynamic and Static Triaxial Test on the Soil-Rock Mediums	
J.C. Wang, M.J. Zhao, W. Chen and K. Wang	1563
Strength Reduction Technique for Non-Linear Failure Criterion	
L. Ren, T. Ai, Z.M. Zhu, L.Z. Xie and R. Zhang	1568
Study on Stress-Strain Behavior of Cohesive Soil Mixing with Gravel by Triaxial Test	
Y.L. Wang, J.G. Zhu and J.F. Zhou	1573
Study on the Disturbed Zone of High Red Bed Accumulation Slope by Numerical Simulation	
H.L. Wang, X.N. Li and R.C. Wang	1577
Numerical Analysis for the Excavation of Geotechnical Material in Tunnel and Grouting Effect	
K.J. Cai	1581
Mechanical Properties Analysis of Heat Insulation Structure in High Temperature Circular Roadway	
Y.W. Liu, Y.P. Chen and G.F. Li	1585
Geology Analysis and Support Scheme Design in Soft Rock Coal Mine	
C.L. Li and Z.Y. Li	1591
The Determination of Foundation Force Modulus Coefficient in the Pile and Soil Interaction	
Q.J. Meng	1596

Coulomb-Cam Model for Dilatancy and Work-Softening of Sand Z.J. Jiang, W.J. Cai and D.S. Ling	1602
Contrastive Studies of the Testing Method for the Bearing Capacity and Deformation Modulus of Dynamic Consolidation Backfill Foundation Y. Gui, H. Tao, P.N. Zhu, H.H. Yang and T.F. Deng	1606
Statistical Analysis of Deep <i>In Situ</i> Stresses Field Characteristic in Huainan Mining Area H.B. Cai, H. Cheng and C.B. Wang	1615
A Practical Saturated Sand Elastic-Plastic Dynamic Constitutive Model and Application Y.M. Zhang and D.H. Ruan	1621
Influence of Matric Suction on Shear Strength Behavior of Unsaturated Silty Sand Q. Dong, L. Liu and L. Hou	1627
Study on Mine Shaft Liner Breaking Mechanism and Application of Monitoring System in Deep and Thick Overburden P.L. He and C.R. Liu	1633
Stability Analysis of Landfill Liner System Based on Numerical Simulation J.L. Gao and M.X. Zhang	1637
Analysis of Dilatancy Effect when Mortar Bolt Interface Destroying Z.F. Song, J.H. Lei and S.G. Sun	1641
Analysis of Monitoring and Measurement for Heishan Tunnel W.L. Tian, Q. Li and C.Z. Xiao	1645
Study the Application of PHC Piles to Treat Collapsible Loess Soils H.X. Liu	1649
Lateral Load Distribution of Articulated Hollow Slab Beam Bridge Strengthened by Transverse Prestressed Force Y.Q. Xiang, C. Xing, L.H. Shao and Y. Xing	1653
Research on Supporting Technology of Roadway Driving along Next Goaf of Second Mining Strip Pillar W.D. Lv and N.N. Zhao	1657
Pullout Tests Study on Performance of Interface between Geogrid and Soil J.C. Sun, Z. Jia and C.Z. Xiao	1661
Behavior of Cemented Reticulate Red Clay J.Z. Li, L.C. Zhuo and X. Ni	1666
Test Study on Dewatering Effect of Sewage Sludge by Vacuum Method Y.F. Gao, G.Q. Du, Y. Zhou and S.M. Wang	1670
Study on Consolidation Mechanism of Debris Flow Deposit H.K. Chen, X.Y. He, Y. Zhong and H.M. Tang	1674
Research on Stability Analysis of the Hinge Joint Concrete Block Slope under Seepage Function Y.Q. Zhang, Y.N. Mi, L. Zhao, K. Liu and G.L. Wang	1685
The Relationship between Retaining Wall Deformation and Earth Pressure in Deep Excavation S.Q. Peng, Q.H. Zhao and Z.Y. Chen	1690
Mechanical Behavior of Broken Stone Fills under Dynamic Consolidation Z.G. Gao, Y.L. Du, X.B. Huang and X. Huang	1696
The Mathematical Foundation of Rock Electrochemical Impedance Spectroscopy H.F. Wang, J.C. Hu and Z.X. Yuan	1703
The Deformation Characteristics of Soft Clay under Cyclic Loading Y. Zhang, L. Wan and X.W. Li	1709
Semi-Active Vibration Control Structure with MR-TLCD under Wind Load H.X. Sun and X.Y. Wang	1713
Numerical Analysis of MMP Piling with Wet-Jetting Method Y.Y. Chen and D.A. Sun	1718
Studies on the Index of Energy Momentary Change Rate for Sliding Base-Isolated Structures on Different Level of Friction Coefficient M. Sun and L.P. Tong	1723
Optimal Design of Post-Processing Technology Based on Bearing Capacity Control H.F. Tong and B. Xie	1731

The Study of Field Effect through Uniaxial Compression Experiment on Marine Recycled Concrete Specimen Based on DPDM Technique W.B. Liu, C. Shen, X. Li and H.M. Jiang	1735
<i>In Situ</i> FT-IR Studies on the Urethane Reaction Kinetics of 3-Methyl-1,3-Butanediol in Nitrogen-Contained Solvent P.F. Yang	1743
Seepage Analysis for Dashiban Landslide Applied Typical Rainfall Q. Feng and F.H. Fang	1747
Upper Bound Solution for Ultimate Bearing Capacity of Foundation Based on Unified Strength Theory Y. Tang and P. Tang	1751
General Slice Method Based on Rigorous Equilibrium to Solve the Factor of Safety M.C. Yang	1755
Numerical Simulation of Pumping Well-Underground Concrete Wall-Recharging Well in Dewatering of Deep Foundation Pit J.X. Wang, P. Wang and D.C. Sui	1764
Numerical Simulation of the Interfacial Behaviour of Grouted Rockbolts in Tunnel Support Based on a Tri-Linear Bond-Slip Model F.F. Ren, Z.J. Yang and C. Xu	1769
Application of Comprehensive Evaluation Method to Foundation Pit Engineering J.X. Zhang, J.L. Dai and B. Liu	1775
Numerical Simulation of Geostress and Support of Roadway Crossing Strata in Complex Stress Condition T.X. Wang, L.Y. Li, W.H. Zheng, Y. Liu, T. Hou and H.Y. Qu	1781
New Construction Method of Marine Cofferdam on the Soft Ground in Tideland A.M. Liu and S.W. Yan	1785
Stability Analysis for Bedded Rock Slope with Effect of Contact X.D. Li and C. Su	1791
Study on the Deformation of Supporting Structure for Foundation Pit in Strata with Rock-Soil Combination A.J. Yao, X.D. Zhang and X.J. Zou	1797
Model Test Study on the Effect of Vertical Lode on Horizontal Bearing Capacity of Disk Pile F.L. Meng, G.Y. Sun and C.Y. Lu	1804
Study on the Influence of the Shield Tunnel Deformation Due to Excavation of Foundation Pit with Field Data J.S. Ding, Y.Q. Xian and T.J. Liu	1808
Numerical Simulation of Dynamic Compaction at Dredger Fill Silty Y. Liu and D. Zhang	1813
Dynamic Risk Evaluation of Deep Excavation Based on Monitor Indexes of Support Structure J. Zhang and G.L. Yang	1817
Inside and Outside Earth Pressure Research of Steel Sheet Pile Cofferdam B.L. Xiong, J.S. Tang and W. Chen	1822
Thermal Effect on Consolidation for Saturated Porous Solid S.H. Guo	1827
Study on the Election of Construction Schemes for the Entrance Segment of Tunnel with Unsymmetrical Loading through Large-Span Thin-Dover F.J. Zeng, J.Y. Yan and T.F. Deng	1831
Basic Analysis of Homogenous Slope Stability by Finite Element Method Based on Plaxis J.Y.T. Li, K.B. Shi and X.J. Yan	1838
Centrifuge Model Tests of Embankment on Soil Foundation X.Y. Wang, J. Cao and R.H. Zheng	1842
Use of PFC^{2D} for Simulation of Triaxial Compression Test for Reinforced Earth and Analysis of Sand Particle's Movement W.B. Liu, L.J. Su, Z.Y. Chen and H.M. Jiang	1846
Non-Working Wall's Slope Stability Analysis with the First Mining Area in Weijiamao Open-Pit Mine C. Peng, P.F. Chen and Z.Y. Ti	1853

Study on Durability of Cement Soil under Brine Erosion Z.P. Liu, Q.S. Liu, J.W. Qu and J. He	1858
The Analysis of Seepage Characteristics and Stability of Carbonaceous Mudstone Embankment Slope in Rainfall Condition L. Zeng, H.Y. Fu, T. Li and Y.Q. Qin	1864
Characteristics of Settlement and Assessment Methods of Engineered Structures under Certain High-Speed Railway Tracks in China S.G. Xiao, Q.R. Yan and W. Chen	1869
Strain Softening Behaviors of Clay under Fast Ring Shear Conditions Y. Hong and J.G. Wang	1880
The Application for Reinforced Concrete Piles of Chamber on Soft Foundation Treatment Y. Du, T. Chen, S. Li and Y. Wang	1884
The Analysis of Soil Slope Transient Seepage Consider the Change of Permeability Coefficient in Rainfall Condition Z.M. He, Y.Q. Qin and Z.X. Cai	1888
Liquefaction Macro-Characteristics in Chengdu Region in Wenchuan Ms8.0 Earthquake W.M. Wang, L.W. Chen and X.M. Yuan	1893
Icon, Archetype and Symbolic Meanings of Dragon: An Interpretation of Design Theme and Image Y.F. Wen	1897
A Comparative Study on Locating Critical Slip Surface in 2D and 3D Limit Equilibrium Stability Analysis of Slopes M.W. Xie, Z.F. Wang, X.Y. Liu and N. Jia	1905
Field Test Research on Soil Compacting Effect of Cast-<i>In Situ</i> Concrete Pipe Pile Z.T. Ma, H.L. Liu, Y.P. Wang and J.M. Zhu	1914
Validation of the Volume Change Behavior in SFG Model Using a Soil Consolidation Test and a Soil Water Characteristic Curve Experiment Y.Y. Zhou, J. Li and W.H. Li	1918
Three-Dimensional Numerical Analysis of Excavation and Support of Deep Foundation Pit C.Z. Zhu and X.L. Zheng	1922
Contact Force Distribution and Induced Anisotropy in Granular Materials under Biaxial Test M.Y. Hu, Q.H. Chen, Y. Shen and X.W. Tang	1927
Analysis of Large-Size Flexible Shallow Foundation Settlement Basing on Foundation-Soil Interaction H.S. Qiu, S. Shi and M. Li	1935
Vibro-Stone Column Reinforcement Mechanism and Numerical Analysis Y. Liu and H.X. Yan	1940
A New Architectural Design Method based on Web3D Virtual Reality F. Bi and B.S. Zhu	1944
Development of Slope Stability Evaluation Process of Frozen Soil in Coupling Temperature Field Z.Y. Liu, J.B. Chen, L. Jin and J. Xu	1948

Chapter 4: Geological Engineering

Research on Detecting Multi-Passage Leakage in Dam by Temperature in Bores X.J. Wang and R.R. Li	1959
The Stability Analysis of Over-Dip Stratoid Structure Rock Slope S.Q. Lu and M. Xu	1963
Study on the Reliability of Loess Cutting Slope Considering the Variability of Soil-Water Characteristic Parameters Y. Liang, L.J. Huang, X.L. Xing, P. Li and T.L. Li	1967
Seismic Geological Disaster Characteristics in MS 5.3 of Luhuo Z.C. He, Y.S. Li and G.P. Cao	1973
Experimental Study of Shear Strength of Unsaturated Silty Clay of Yellow River Levee C.R. Liu, L. Wang and J.J. Guo	1979

Properties of Emulsification and Recycling of Reclaimed Asphalt Pavement in Room Temperature	
Z.S. Ge, X. Li and X.Q. Hu	1984
Engineering Geological Condition Analysis of some Beijing Engineering	
Y.L. Shangguan, Q. Wang, C.C. Niu, K. Wang and Y.G. Zhang	1989
Study on the Calculation Method of Plum Blossom-Shaped Steel Roof Pre-Set Deformation Value in Construction	
Q.R. Tang and J. Zhou	1993
Crucial Geo-Qualities and Predominant Defects Treatment on Foundation Zones of Sino Mainland Xiluodu Arch Dam	
Y.J. Wang, Y. Hu, Z. Zuo, L.P. Zhi and H.X. Gao	1997
Application Study on Technology of Closure by Curtain Grouting in Mine Two of Dongfeng Coal Mine	
X.J. Zhu, X.L. Wen, J. Peng, L.H. Gao and D.M. Qu	2002
The Stability Research and Evaluation of Jiuzi Collapse Accumulation	
K. Wang, C.M. Wang, C.C. Niu, D.H. Ma and R. Lin	2007
Research on the Spacing of Structural Plane Used in Rock Mass Structure Classification	
A.G. Han, M. You and D.X. Nie	2011
A New Method to Quantify Morphology of Pyrite, and Application to Magmatic-Hydrothermal Gold Deposits in Jiaodong Peninsula, China	
Y.T. Yan, S.R. Li, B.J. Jia, N. Zhang, L. Jiang and L.N. Yan	2015
Basic Mechanics Characters of Recycled Fine Aggregate Concrete	
J. Geng, Y.Y. Chen, J.Y. Sun and W. Chen	2028
Application of Geological Modeling in Carbonate Reservoirs	
X.T. Li, Q.F. Lin and C.S. Lin	2033
Study on the Seismic Damaging Effects of Mountainous Towns in Wenchuan Earthquake	
H.C. Zhang, Y.S. Li and J. Bao	2041
Rock Slope Stability Study for Yujian River Dam Site Based on Kinematic Analyses	
L.Q. Wang, P.H.S.W. Kulatilake, H.M. Tang and Y. Liang	2048
Review on the Mesomechanical Compressive Strength Model of Single-Directional Fiber Composites	
X.J. Ma, L. Chen and Y. Ding	2056

Chapter 5: Tunnel, Subway and Underground Facilities

The Correlative Analysis of Testing Results of Dynamic Compaction Gravel Clay Foundation	
T.F. Deng, Z.M. Wu, Y. Gui and S.H. Luo	2063
Study on Criterion of Vibration Stability for Tether of Submerged Floating Tunnel	
X.J. Zhou, Y.G. Qin and G. Luo	2071
The Failure Model of the Subway Station under Blast Loading	
L.X. Li, M. Li and X.L. Geng	2075
Analysis of Mode III Collinear Periodic Cracks-Tip Stress Field of an Infinite Orthotropic Plate	
X.X. Zhang, C. Li, X.C. Cui and W.B. Zhao	2080
A Variable Stiffness Method Application to Tunnel Support	
Y.C. Zhao, Z. Liu and M.Y. Liu	2085
Dynamic Response Analysis of Underground Rock Tunnel under Earthquake Load	
P.S. Zhang and W. Yan	2089
Simulation Analysis of Metro Station Construction Fire Based on FDS	
H.D. Wang and T.J. Cui	2093
Study on Structural Development of Universal Segment Lining	
W. Li	2097
The Field Ultrasonic Test of the Disturbance of Surrounding Rock by the TBM Construction	
Y.S. Wang, Z.Q. Wu, M.H. Li and Q.X. Yang	2101
Study on the Equivalent Width Coefficient of Tunnel Entrance in Metro Station	
J.M. Chen, S.T. Lin, X.L. Yao and H.B. Ye	2105

Analysis on Seismic Damage Mechanism and Anti-Seismic Measures of Tunnels in Fault Fracture Zone T.C. Li, Y.T. Yin and J.Z. Liu	2110
Impact of Broken Rock behind Expressway Tunnel Lining on Structure Safety C.S. Zhu, X.H. Yang and H.P. Lai	2118
The Study of the Triaxial Rheological Test of the Argillaceous Siltstone in Malin Mine Q.S. Bai, Y.Y. Xia, X.X. Liu and Z.H. Yang	2125
Bending Behavior of Segmental Joint Structure of Under-River Shield Tunnel K. Feng, C. He, J. Wang, C. Qi and S.J. Liu	2132
Numerical Analysis of Foundation Soil Displacement to Adjacent Buildings Caused by Running Subway Z. Ding, G.B. Ge, X.J. Wei and T. Zhang	2139
Smoke Propagation in an Inclined Semi-Circular Long Tunnel J.C. Leong, C.L. Chang, Y.C. Chen and L.W. Chen	2143
Simulating and Testing Study on Construction Temporal-Spatial Effect of Six Lanes Multi-Arch Tunnel X.G. Jin, B.W. Cui and M.J. Wu	2149
Research on High Ground Stress and Soft Rock Roadway Supporting Technology of Bide Coal Mine Y.D. Jiang, L. Xiong, W.X. Zhou, X.J. Han, S.X. Mei and J. Hu	2156
Application of the Evidence Theory in the Safety Evaluation of Tower Cranes S.P. Huang	2162
Study on Reliability of Submerged Floating Tunnel with Single Span under Vortex-Induced Vibration X.J. Zhou, J.H. Wang and G. Luo	2168
Analysis of Main-Structure of Deck Unit Erection Gantry for Suspension Bridge J.L. Lu and C. Wu	2172
A Study on the Influence by Karst on the Stability of Surrounding Rock in Neighborhood Tunnel C. Wang and X.Q. Pi	2177
Field Investigation on the Stability of the Tunnel Surrounding Rock and the Support Measures under TBM Construction Y.S. Wang, M.N. Wang, Z.Q. Wu and Q.X. Yang	2182
Construction Process Numerical Simulation and Experimental Research of Parallel-Adjacent Loess Tunnel J. Guo, Q.C. Wang, R.L. Zhang and Z.G. Yang	2186
Study on Failure of Soft Overburden of Fully Mechanized Top Coal Caving J.S. Wang and Z.C. Wang	2192
Discussion on Structure Design of Shaft Lining Built in Porous Rocky Aquifer with High Water Pressure X.M. Zhou, B. Deng and C.X. Ma	2196
Technology of Joint Support on Large Pump House in HS Soft Rock X.L. Wen, L.H. Gao, X.S. Li and Z.P. Liu	2202
Finite Element Analysis of Resisting Explosive Loading for Mine Escape Capsule J.L. Wang	2206
Transverse Free Vibration Analysis of Buried Pipeline under Simply Supported Restraint T.Y. Hao	2210
State of the Art on the Prediction of Tunneling-Induced Ground Deformations Y. Zhao and M. Zhao	2214
Stability Analysis on Rectangular Transition Section Tunneling in Beiwan Horsehead Region of No. 7 Subway W.H. Tan, H.B. Sun and R.J. Li	2224
Application of Stress Wave Reflection Method in Nondestructive Testing of Bolt X.K. Bao and Y. Li	2229
Subway Ventilation and Air Conditioning System Operating Mode of Study S.J. He, H.L. Xu, X.C. Zhong and L. Wang	2234
The Research of Backfill Grouting Pressure in Shield Tunneling J.L. Qiao, Y.L. Fan, B. Liu, Y.P. Zhang and Y.Y. Li	2240

Risk Analysis on the Accident of TBM's Cutterhead Jamming Caused by Collapse of Tunnel	
S. Wen, H.Z. Liu and L.M. Zhao	2246
Analysis on the Characteristics of Displacement Field Distribution around the Deep Buried and Great Complex Section Tunnel	
S.X. Lei, B. Gao and Q.H. Xiao	2251
Crack Propagation Detection and Simulation Research of Jiulong Tunnel	
N. Wang, P.H. Chen, J.C. Wang and W.H. Liu	2256
Optimization of Double-Ring-Pipe Freezing Scheme for Tunnel Cross-Passage Construction	
X.D. Hu and B.Y. Ji	2262
The Analysis of Government Re-Regulation Caused by Externality of Building Energy-Saving	
T. Wang, Q. Li and H.L. Ma	2267

Chapter 6: Seismic Engineering

Study on the Unload Interval Time of Thin Plate Penetration Test	
Y.F. Gao, S. He, Y. Zhou and S.M. Wang	2275
Comparative Analysis of the Influence of Slope Terrain on Characteristics of Horizontal and Vertical Ground Motion Response Spectrum	
L.P. Wang and Y. Zhao	2279
Investigation of Steel Plate Damper with Transverse Slits	
Z.J. Li, Z. Huang, C.Z. Wang and J. Wang	2285
Seismic Response Analysis of Cable-Stayed Bridges	
W.L. Qiu, M. Jiang and X.B. Zhang	2290
Feasibility of SPT to Evaluating Bachu-Jiashi Earthquake Liquefaction	
Z.Y. Li and X.M. Yuan	2295
Numerical Analysis on Adjacent Highrise and Multistoried Buildings-Pile-Soil Dynamic Interaction	
P.Z. Li, P. Xu, Z.H. Pan and X.L. Lu	2299
Experimental Study on Seismic Behavior of High-Rise RC Shear Wall with Diagonal Web Reinforcement	
G.Q. Zhou, Q.Y. Liu and D.Y. Zhou	2305
Application and Implementation of Ecological Design for Single Building	
Z.H. Ye	2309
Seismic Fragility Analysis of Reinforced Concrete Frames with Service Life	
L.L. Yuan, J.M. Wang, N.J. Wang and W.T. Jiang	2313
Dynamic Stress Concentration of Underground Lined Cavities in Different Distance under Incident Plane SV Wave	
M. Huang and B.Y. Pan	2317
Seismic Reliability Analysis of Complex Structure	
Z.Y. Zhang, W.B. Huang, Y.F. Zhou and T.S. Song	2321
Seismic Damage Analyses of Staircases in RC Frame Structures	
H.J. Jiang, H.Y. Gao and B. Wang	2326
The Seismic Performance Study of Steel Pipe Concrete Column in the Absence of Beam Floor System	
L.J. Ma, J.Y. Zhang and S.J. Wang	2331
Study on Blasting Seismic Effect of Tunnel in Fault Formation	
F.Q. Gao	2336
Study on Mechanical Behavior of the Key Components of High-Level Transfer Frame-Shear Wall Structure with Steel-Lead Viscoelastic Dampers	
L. Yi and C.X. Wu	2340
Experimental Study on the Seismic Performance of Macro-Synthetic Fiber- Reinforced Concrete Ductile Columns	
H. Ma, H.H. Wang, Z.B. Li, X.Y. Sun and X.W. Zhang	2345
Probabilistic Seismic Risk Assessment for Transportation Network	
Z.Z. Wang and Y.X. Zhang	2351

Seismic Performance Evaluation of a Super-Tall Building Structure Y. Zhou and L. Hong	2357
Study on Accuracy of CCFS Method for Calculating Seismic Response of Pipeline System Multiply Supported on Building W. Guo, Z.W. Yu and L. Wu	2361
Response Characteristics of Large Span Structures Subjected to Non-Uniform Vertical Excitations F. Liu and L. Wang	2365
Study on Records of the Wenchuan MW 8.0 Strong Earthquake in 2008 E. Guo, X.Y. Zhou, Z.Z. Zhao and H. Sun	2371
Comparative Analysis of Seismic Records of Wenchuan in 2008 and other Domestic and International Earthquakes E. Guo, Z.Z. Zhao and X.Y. Zhou	2375
Study on the Simulation of Spatial Variable Seismic Ground Motion Considering Local Site Convergence Z.M. You and Z.X. Cao	2379
Research on Applications of Wavelet Transform Threshold Method to Strong Motion Signal Processing W. Li, S.Y. Li, Z. Zhao and Z.X. Sun	2387
Seismic Response Analysis of Interaction for Tall Building's Superstructure, Foundation and Ground Base Z.G. Zhang and X.M. Yang	2392
Mechanics Analysis of Asphalt Pavement with Crumb Rubber Modified Cement Stabilized Macadam Base H.M. Guo and H. Zhu	2397

Chapter 7: Road and Railway Engineering

Influence of Cracked Size of Old Concrete Pavement on Asphalt Overlay Stress Y.H. Wang, X.J. He, H.S. Qiu and X.M. Tan	2405
Research and Application of Warm Recycled Asphalt Mixture L.Y. Yang, Y.Q. Tan, H. Liu and E.G. Li	2412
Analysis of Thermal Stress of Asphalt Pavement on Lean Concrete Base L.J. Suo and B. Yang	2418
Evaluation on Driver's Mental Tenseness under the Condition of Snow Pavement S.M. Wu, G.Z. Cheng and Y.L. Pei	2422
The Assessment to Environment Influence for Moving Vibration of Subway in a City of China W.H. Yao, J.W. Kang, B.Y. Ding, X.D. Pan and M. Ouyang	2426
Evaluation of Low Temperature Performance of Asphalt Mixtures with an Analog Experiment Y.Q. Tan, D.Q. Wang, L. Zhang, Z.H. Li and Y.X. Qi	2434
Research on the Purification Ability of Porous Asphalt Pavement to Runoff Pollution Y. Zhao and C. Zhao	2439
The Application Research and Discussion on a Viaduct Artificial Excavated Pile Technology D.G. Li and G.M. Shi	2449
Influence of Damaged Pavement on Saturated Headway and Average Travel Speed of Urban Road Section L.X. Wu and G.Z. Cheng	2453
Research on Evaluation Model and Application of Highway Alignment in Mountainous Area Based on Operating Speed X. Feng, Y. Wang, J.Z. Ling and C.X. Yu	2457
Safety Control of Blasting Construction in New Austrian Metro Tunnel H.D. Wang and X.F. Shen	2462
Application of Fault Tree Analysis Method on Hazard Identification in Highway Construction C.F. Yang, Y.B. Jia, J.S. Sun and J. Zhou	2466

Analysis of Rock Slope Stability Using Anti-Slide Pile R. Gao and L.Q. Yang	2470
Test for TG Soil Stabilizer Used in Pavement Base Z.Y. Hou and X.Q. Guo	2474
The Research of the Lime Soil Properties on the Road in Jilin Area D.G. Li and G.M. Shi	2478
Evaluation, Analysis and Optimization of Rigid Pavement Seams of Joints and Effect of Several Types of Dowel Bars on it E. Safa, A. Safa, A. Hasani and A. Mansourkhaki	2482
Analysis of Thermal Stress for Asphalt Surface on Porous Concrete Base L.J. Suo and H.F. Tong	2488
Micro-Analysis of Railway Ballast Bond Effects G.Q. Jing, L. Shao, Y.D. Zhu and L. Gao	2492
Analysis on Adhesion Coefficient of Ice and Snow Pavement C.X. Liu, G.Z. Cheng and Y.P. Zhang	2497
Research on Cooperative Working Performance of Cold-Formed Steel Stud Wall - Steel Frame Structure H.H. Wu, T.H. Zhou and Y. Shi	2501
Application of Cluster Algorithm for Travel Speed Classification Based on Cell Phone Handoff Location F. Yang, Z.Y. Liu and N. Zhang	2507
Evaluation on Damaged Pavement and Its Influence on Capacity of Urban Road Section L.X. Wu and G.Z. Cheng	2514
Application of CFG Piles in Treatment of a Large Oil Tank Foundation Z.Q. Xie, C. Jun, H.B. Xiao and Z.Y. Li	2518
The Composite Asphalt Pavement Structure Service Life Analysis which Setting the Graded Gravel between the Asphalt Surface Layer and the Semi-Rigid Base Layer G.M. Shi and D.G. Li	2523
Study on Vehicle's Arrival Rule and Relation between Traffic Flow Parameters on Snowy Pavement L.X. Wu and G.Z. Cheng	2528
Analysis of Temperature-Dropping Characteristics of Warm Mix Asphalt and Hot Mix Asphalt S.G. Hou	2532
Research of the Characteristics of the Transmission Matrix of the Absorption Material of the Automotive Body C.Y. Zhu, C.Y. Jiang, S.F. Yang and L. Hui	2537
Vehicle Parameters Influence on Railway Double-Track Pre-Stressed Concrete Continuous Bridge Vertical Load-Carrying Natural Frequency J.Y. Ren, M.B. Su and W.P. Li	2544
Damage Condition Assessment of Expressway Asphalt Pavement Based on RBF Neural Network Y.X. Huang, F. Shao and Y.W. Liu	2548
Concrete Strength and Deformation Property under Sea Water Erosion Environment J.J. Cai, F. Zhang, W. Cui, S.S. Chen and P.L. Liu	2554
Research on Fractional Derivative Viscoelastic Constitutive Relation of Asphalt Mixture H. Yin, Y. Li and N.Z. Wang	2560
Mechanism Research on Water Damage of Asphalt Mixture Based on Chemical Thermodynamics Q.Y. Xiao, Y.H. Lin, H.X. Hu, N.L. Li and C.L. Zhang	2567
Characteristics of Liquefaction Resistance for the Saturated Silty Soil Ground Treated by Compacted Gravel Pile Composite Foundation Y.X. Zhan, H.L. Yao and G.L. Jiang	2573
Optimal Design of Small Pile Composite Foundation Based on Settlement Control H.F. Tong and L.J. Suo	2577
Analysis on Effect of Tunnel Crossing Underneath Foundation of Tall Buildings on Anti-Seismic Mortar Anchor in Weathered Rock Area X.B. Shi, K. Wei, B.L. Wang and D.W. Huang	2581

Investigation into Shear Coefficient for Circle Shear Test Method of Asphalt Mixture T. Huang, G.P. Qian and J.L. Zheng	2590
Study on Freeze-Thaw Performance of Polypropylene Fiber Reinforced Cement-Stabilized Aggregate Y.H. Ma and J.Y. Gu	2595
Parent Asphalt Mixture Design of Semi-Flexible Pavement Based on Method of Main Mineral Aggregate Void Filling G.L. Yang, K.H. Wu, W.M. Wang, F.B. Meng, Y.F. Li and X.N. Bao	2599
Design and Implementation of Hydraulic Torque Converter's Performance Test System G.F. Tian, G.W. Zhang, Y.Y. Qiao and X.F. Liu	2603
Numerical Simulation of the Bending Creep Test for Asphalt Mixture L.H. Zhao	2608
Vehicle Parameters Influence on Vertical Load-Carrying Natural Frequency of Railway Double-Track Steel Truss Continuous Bridge J.Y. Ren, M.B. Su and W.P. Li	2613
Evaluation of External Noise Produced by Transverse Rumble Strips on Rural Roadways M.H. Othman, H. Zaiton, M.B. Mohd Yusof, M.R. Hainin, K. Yahya, H. Yaacob and S. Azman	2617
Stable Analysis of CWR Track by its Vibration Characteristics L. Li and Y.Y. Luo	2624
The Questionnaires Design of Lane-Changing Behaviours by Union Method H.Z. Xu and G.Z. Cheng	2633
Comparison of Skid Resistance and Noise between Transverse and Longitudinal Grooving Pavements in Newly Constructed Concrete Pavement B. Li, H.W. Kang and Z.W. Zhang	2637
Influence of Material Properties on Hydraulic Conductivity and Strength of Aggregates Used for Pavement Base F.M. Liu and D.Y. Wang	2641
Dynamics Model of Vehicle in Two-Dimensional Collision Y.L. Pei, L.Z. Wang and C.Y. Fu	2646
Dynamic Model Rupture Tests of Concrete Dams on Shaking Table M.M. Wang, Q. Xu, J.Y. Chen and S.L. Lv	2650
Development of Passive Energy Dissipation Device with U-Shaped Steel Damper Based on Quasi-Linear Motion Mechanism J.H. Gao and H. Tagawa	2656

Chapter 8: Hydraulic Engineering

Analysis of Numerical Simulation of Micropiles Reinforcing Shallow Landslide H. He and Y.B. Liu	2663
The Application of Fuzzy Variable Sets Theory in Eutrophication Evaluation for Urban Lake X.P. Zhang, W.G. Chen and W.J. Xu	2667
New Construction Technique of Soft Soil Foundation Consolidated by Plastic Drainage Slab S.L. Tao, Z.F. Zhao, Z.H. Zhang, Y.H. Yu and X.G. Lian	2673
Damage Analysis of Freeze-Thaw Processes in Hydraulic Structure Concrete Y.Q. Gong, J.H. Cui, H.D. Su and L. Shan	2681
Arch Dam and Rock Base Cracking Processer Analysis Y.M. Chen	2685
Optimal Design Analysis and Research of Technical Parameters of Four-Side and Six-Edge Permeable Frame Group Used for River Control and Bank Protection Engineering Y.Z. Zhang, X.L. Cheng and S.L. Yang	2689
New Boundary Treatment in the Finite Element Model Using the Shallow Water Equation T.H. Jung	2694
An Analysis of Two-Dimensional Steady Seepage Flow of Earth Dam Based on FEM C.C. Wu	2699
City Optimal Allocation of Water Resources Research Based on Sustainable Development W. Sun and Z.J. Zeng	2703

Research on Mechanism of Architectural Wastes Solidified by Alkali-Activated Cement and Fly Ash	
Q. Li, X.J. Zhou, Z.Y. Jiang and K.W. Sun	2708
Progressive Slide Analysis of Arch Dam Abutment	
Y.M. Chen	2714
MUSLE Evaluation of Soil Loss on a Construction Site by Using Gauging Weirs	
S.I. Hani Ismail and H.M. Yee	2718
Analysis on Factors Influencing Deformation of the Underground Cavities during the Construction Period	
C.Y. Gao, J.H. Deng and F.L. Meng	2722
Similarity Analysis of Chloride Penetration Experiment for Hydraulic Concrete	
Z.Q. Fu, J. Huang, J.Z. Zhang, L.J. Wu and Y.D. Zhu	2727
Design of Pressure Tunnel with Reinforcement Concrete Lining under Consolidation Grouting	
K. Su and Y. Li	2731
Study on Cracking and Strengthening Measures in the Sluice Piers of a Overflow Dam	
H.Y. Jiang, H.Y. Zheng and H.J. Hu	2736
Study on the Air Pressure and the Backwater in the Cavity of Aerator on the Chute with an Anti-Arc Section	
Y.M. Xu, H.X. Yang, W. Zhao and C.Y. Shen	2740
Catastrophic Analysis of Nonlinear Response of Arch Dams under the Horizontal Earthquake	
D.B. Sun and Q.W. Ren	2745
Resistance Analysis and Experiment of Excavator during Digging Operation	
L.D. Liao, Q.H. He, D.Q. Zhang and H.H. Zheng	2750
Analysis on the Seismic Torsional Response of Large-Scale Aqueduct Body	
P. Gao, D.M. Wei and M.H. Xu	2755
A New Technique of Low-Pressure Long-Distance Soft Clay Pipeline Transportation	
S.L. Tao, X.G. Lian, Z.H. Zhang, Y.H. Yu and Z.F. Zhao	2763
Fuzzy Comprehensive Evaluation for Water Resources Sustainable Utilization of Ningxia	
L. Tang and W.J. Zhang	2770
Deep Anti-Sliding Stability of Wudu RCC Gravity Dam	
F. Feng and G.X. Zhang	2776
Numerical Analysis of Concrete Arch Bridge on the Situation of Seismic Damage	
H.K. Chen, T. Hu, X.Y. He and R.C. Liu	2783

Chapter 9: Water Supply and Drainage Engineering

Development of a New Reclamation Material by Hazardous Waste Solidification/Stabilization	
B. Vacenovska and R. Drochytka	2793
Optimization and Characteristics of Copper Pickling Wastewater Treatment in a Single Reactor Using Bio-Electrode Process	
G.J. Yang, S.S. Chen, W.H. Wu and J. Zhou	2800
Enzymatic Saccharification of Cellulose Pretreated from Lignocellulosic Biomass: Status and Prospect	
Y.X. Wang, M.J. Dong and W.C. Zhuang	2809
Experiments on Evaporation of High-TDS Phreatic Water in an Arid Area	
X.W. Li, J.L. Zhou, M.G. Jin, Y.F. Liu and Q. Li	2815
Progress and Perspectives of Microfauna as a Powerful Method for Excess Sludge Reduction in Wastewater Treatment	
L.M. Zhao and S. Wen	2824
A Study on Water-Saving and "Trend Zero" Emission Measures in Nylon Chemical Company	
J.F. Wu and G.Z. Yang	2829
Research Progress on Velocity Model of Iron Release in Water Supply Pipe	
S. Wu, L. Yang and D. Zuo	2833

The Characteristics of the Aerobic Granular Sludge on Nitrogen and Phosphorus Removal Simultaneously	
J.S. Liu, Y.J. Ni, G.Y. Jia and J. Li	2840
Influence of Surface Properties of Carbon Fibers Biofilm Carriers on Immobilization of Different Microorganisms	
Z.K. Ma, J. Liu and H.H. Song	2844
Rainwater Harvesting and Reuse in Sustainable Building: A Design Case Study of DSM (China) Limited Company	
J. Zhai, Y.W. Luo, H.W. Xiao and Q. He	2848
PAC Addition on Immersed Ultrafiltration Membrane for the Treatment of Raw Water Containing Taste and Odor Compounds	
S. Liang, X. Li, Y.L. Yang, L. Liu, Y.W. Liu, Z.J. Cheng, B. Li and G.B. Li	2855
Analysis of Circumferential Cracking Due to Wire Breaks in PCCP	
R. You	2860
On Water-Saving Design of Buildings	
S.M. Cao and J.H. Li	2866

Chapter 10: Heating, Gas Supply, Ventilation and Air Conditioning Works

Investigation on a Novel PV/T Solar Collector	
P. Wei and H.B. Chen	2873
Numerical Simulation on Local Ventilation in the Mine Tunnel	
E. Dong and L. Guan	2879
Experimental Study of Spring Wire Enhancement of Air Heat Transfer inside TIEC Tubes	
Y.G. Wang, J.P. Liu, H. Xiang and S.H. Yang	2884
Comparative Study on Hybrid PV/T Heat Pump Systems Using Different PV Panels	
H.B. Chen and P. Wei	2888
Parameters Analysis of a Cascade Ethylene-Propane Rankine Cycle with Cold Energy Recovery of LNG	
H.M. Zhu, H. Sun and H.W. Liu	2895
The Experimental Research on the Variable Loading System of LM18.20 Coal Mill	
X.B. Ji, X.Y. Qi, X.M. Ji and L. Wang	2900
Effect of Skylight Width on Natural Ventilation in Industrial Workshop	
Y.X. Su, X. Wan and A.L. Su	2904
Evaluation of Positive Pressure Ventilation for High-Rise Buildings in Compartment Fire Situation	
X. Feng and Y.F. Li	2908
A Cost Analysis of Wall-Hung Mounted Gas Boiler Using in Residential Buildings of Beijing	
T. Yang, W. Na and D.Y. Li	2914
Research on Effective Factors of Heat Transfer of Thin Heating Floor	
Q.Y. Yan, L.L. Jin, R. Zhou and S.L. Wang	2920
A SWOT Analysis of Wall-Hung Gas Boiler Utilized by Indemnificatory Housing in Beijing	
L. Zhou, W. Na and D.Y. Li	2924
Numerical Simulation on Fracture Formation on Surfaces of Bi-Layered Columnar Materials	
T.H. Ma, C.A. Tang, L.C. Li, Z.Z. Liang and Y.B. Zhang	2929
The Influence of Industry Analysis Value to Combustion Characteristics for Pellet Fuel	
M.N. Ren, Y.Z. Cui, X. Li, Y.X. Qu and L.H. Zhang	2934
Study on Damaged Reinforced Concrete Beams Strengthened with Basalt Fiber Polymer Sheets	
H.N. He and W. Dong	2941

Chapter 11: Disaster Prevention and Mitigation

Development of Monitoring Open Mining Slope on TM30	
F.Y. Yang, W. Zhao and M.L. Xu	2947

Overview of Experimental Study and Theoretical Analysis of Concrete Beams after High Temperature D.F. Zhao, Z.K. You and D.D. Liu	2951
Study on Physical and Mechanical Properties of Clink-Free Cement Stabilized Macadam D. Li, F.D. Chen, C.C. Che and L.P. Kong	2955
Kinetic Study and Equilibrium Isotherm Analysis of Cationic Dye Adsorption onto Attapulgit and Rectorite J.Y. Song and J. Yang	2960
Earthquake Damage Prediction of Base-Isolated Structures Based on Fuzzy Comprehensive Evaluation Method Y.H. Ma, G.F. Zhao and R.H. Chen	2964
The Study on Land Reclamation Technology and Ecological Control for Coal Mining Subsidence Area Q. Yang and W.S. Liu	2973
Forest Coverage Prediction Based on Least Squares Support Vector Regression Algorithm F. Xiao	2978
Study on Several Issues of the Infrared-Thermography Method on Detecting the Defects of External Wall J.T. Jiang, J. An, X.Y. Fan, D.R. Du and S. Yang	2983
Risk Assessment and Control Measure of Debris Flow in Chunyashu Gully of Seismic Disastrous Area of Sichuan Province J.H. Chen, H.G. Wu, H.H. Zhou and H.L. Zhang	2988
Optimization Analysis of Mining Sequence to Danhou Coal Mine under Complicated Hydrogeological Conditions S.R. Wang, H. Wang, Y. Li and C.W. Liu	2992
Structure and Deflection Analysis of a New Assembled Floor Q.N. Li, L.J. Li and W.S. Jiang	2998
The Physical and Mechanic Properties of the Loess Landslide L.H. Li, M. Dang, H.L. Xiao and H.M. Tang	3003
Research on Load Transferring and Sharing Law of Anti-Sliding Piles under Different Isosceles Trapezoid Cross-Section C.D. Li, H.M. Tang, X.L. Hu, L.Q. Wang and Q.T. Liu	3007
Synthetic Risk Assessment of Catastrophic Failures in Power System Based on Entropy Weight Method J. Feng, Y. Wang and X.Y. Xiao	3015
Dynamic Calculation of MDOF Systems Based on GIS P. Qiang, E.L. Chen and X.D. Zhao	3019
The Application of ULRR-Rainfall Coupled in Forecast Prediction on Debris Landslide J. Zhang, K.Q. He, S.Q. Wang and W. Wang	3023
The Optimization Models of Selecting Central Emergency Shelter Based on Ideal Point J.Y. Chu, D.X. Ma and Y.P. Su	3027
Measurement and Analysis of Horizontal Vibration of Standing Human Body J.B. Ji, Y.Y. Du, Z.W. Ni and F.F. Li	3032
Forest Fire Disaster Area Prediction Based on Genetic Algorithm and Support Vector Machine F. Xiao	3037
Study on First-Floor Isolated Structure with Metallic Damper J.B. Ji, Z.W. Ni, Y.Y. Du and Y.Q. Fu	3042
The Risk Assessment of Urban Flood Disaster Based on Elevation Ladder Data X. He and A.J. Zou	3046
Composite Structure Stress Analysis of Row Posture Micro-Piles on Slope Protection X.L. Xu, Q.C. Wang, H. Wang and Q. Wu	3051
Fuzzy Matter-Element Evaluation Method for Analysis of Debris Flow Risk Assessment C. Tan, J.P. Chen, Y.Z. Pan, C.C. Niu and L.M. Xu	3058
Finite Element Analysis on Flexural Fatigue Behavior of RC Beams Strengthened with CFRP Y. Wang, Y.N. Shen and X. Fan	3062

Torsional Vibration Control of High-Rise Building with Large Local Space by Using Tuned Mass Damper B. Zhao and H. Gao	3066
Analysis on Causes of Crack in Multiple-Arch Tunnel Q. Qin	3072
Study on the Dynamic Interaction between Steel Primary Structure and Cable Curtain Walls Secondary Structure under Wind Load D.X. Gao, Y.L. Fan and X.L. Cui	3076

Chapter 12: Monitoring and Control of Structures

Cost Estimation Method of Post-Earthquake Rehabilitation of Power System Y.R. Wang, J.W. Dai and M.Y. Zhang	3083
Research of City Bridge Passed through by Subway Construction in Health Monitoring and Safety Warning Y.L. Guo and J. Liu	3087
The Test Study of Shape Coefficient of Low-Rise Buildings Roof with Different Positions of Openings J. Zhou, Y.M. Dou, X.Y. Liu and J.S. Sun	3092
The Response Surface Method of Quadratic Polynomials for Reliability Analysis of Plate on Elastic Foundation X.G. Kong and J.Q. Liu	3096
State of the Art on the Monitoring Methods of Offshore Wind Energy Conversion System M. Zhao and X. Wang	3100
The Study of SCF about Cross Shaped Board - Welded Hollow Spherical Joints J.F. Jiao and H.G. Lei	3108
The Analysis of Indoor Formaldehyde Pollution Based on Model House Acceptable of a Finished Residence X.L. Luo	3115
Experimental Study on the Recovery Stress of Shape Memory Alloy Strands and Wire D. Cui and P. Guan	3119
Modal Test on an External Prestressed Steel Beam J. Zhang, Z.W. Zhou, X.L. Ni, H. Chen and P.C. Zhu	3123
Fatigue of Carbon Nanotube-Reinforced Composites Z.H. Zhang and N. Yu	3128
Experimental Study on Eccentric Compression Behavior of Timber Columns with Longitudinal Cracks Strengthened by CFRP Sheets Y.J. Cai, W. Zhang and W.P. Zhang	3132
The Practical Formula of Ground Vibration Attenuation Induced by the Parallel Vehicles on a Ring Road W.B. Hu and X.F. Li	3137
Numerical Simulation on Multi-Direction Splitting Test and Crack Process of Concrete S. Zhang and Y. Liu	3141
Experimental Study on Behaviour of RC Column Confined by CFRP and Steel Fibre X.X. Li	3146
Research into the Method of Accuracy Optimization in Survey Programming of MATLAB Y.S. Gong, L.P. Zhang and Q. Han	3150
Test Research of Chloride Ion Penetration in Concrete Tunnel Lining Structure Z. Li, Y.P. Zhu and X.Y. Cui	3155
Test Study on Size Effect of Flexural Capacity of RC Cantilever Beams H.Y. Zhou, Z.B. Li, E.W. Guo and L.F. Liu	3160
Bond-Slip Constitutive Behavior between Fiber-Reinforced Polymer and Masonry Y. Zheng, J.Q. Jia, L. Li and S.K. You	3165
Structural Damage Identification Using Improved Particle Swarm Optimization H.Y. Guo, J.S. Yuan and Z.L. Li	3171
Effects of Coating/Electroplating on Corrosion Resistance of Steel Bar in Reinforced Concrete Q. Zhou, Z.H. Shui, Y.D. Xiao and C.S. Xu	3176

The study on Elevation Control Survey for Ancient Architecture Protection C.Z. Lv, X.H. Liao and Z.D. Zhan	3180
Stress Analysis of Asphalt Overlay on Old Cement Pavement by Impact of Rolling Technology C. Bian, J.H. Song and Z.W. Liu	3185
Study on Topology Optimization Design of Steel Frame Bracing System Based on Discrete Model J.N. He and Z. Wang	3191
Study on the Application of Semi-Active Variable Stiffness Fuzzy Control System to a Residential Building P. Wei, H.B. Chen and Y.Y. Zhang	3197
Fatigue Tests of Overlapping Details for Orthotropic Steel Bridge Decks and Transverse Beams of Stay Cables G.L. Bai and G.W. Tang	3202
Anti-Corrosion of Concrete Structures under Marine Environment and the Durability Design of Pinghai Bridge G.D. Zheng	3207
Study on a New Extraction Method of Statistical Information of Urban Buildings Based on High Resolution Remote Sensing Images in Earthquake Damage Prediction Y.M. Zhai, Q. Zhao and T.Z. Li	3211
Analytical Model for RC Beams with Externally Bonded Laminates Using Strut-and-Tie Method C.K. Ng, A.M.K. Tiong and S.H. Lau	3218
Finite Element Simulation of RC Beam Strengthened with FRP C.J. Fu	3229
Operational Modal Test of an Arch Bridge X. Zhang and X.L. Du	3233
The Rebound Curve Research of Inspection the High Strength Concrete H.B. Chen, H.D. Lu, N. Ge and X.J. Tong	3239
High-Rise Building Standard Floor Strut Frame System Stress Variation Analysis K.W. Ding and L. Wang	3243
An Effective Hybrid Approach for Processing Deformation Monitoring Data N. Gao, X.M. Cui and C.Y. Gao	3247
The Reinforced Concrete Durability and Rebar Erosion Monitoring J.Y. Zhang, D.M. Cui, L.M. Lv and Z. Yang	3252
Study the Influences of Stud Fittings in Composite Beams under Reciprocating Load W. Xu, H. Wang and X.F. Zhang	3259
Correlation Study on Modal Frequency and Temperature Effects of a Cable-Stayed Bridge Model L.M. Sun, Y. Zhou and X.L. Li	3264
Perturbation Stochastic Finite Element Method for Chloride Diffusion with Time-Dependent in Concrete L.F. Yang, C.Y. Hu, Z. Chen and B. Hong	3273
Dynamic Properties and Seismic Responses of the Masonry Structure Model Strengthened with BFRP Laminates L.H. Xu, S. Zhang, X.B. Hu, M.J. Zhang, F. Yang and Y.L. Cai	3279
The Random Response Analysis of Structure Subjected to Non-Stationary Seismic Excitation H. Wu and X.A. Zhang	3287
Numerical and Experimental Studies on the Seismic Retrofit of Simply Supported Bridges Using Superelastic Restrainers D. Cardone and S. Sofia	3291
Application of Surfer 8.0 in Earthwork Calculations and Accuracy Analysis H. Zhang, L. Li, Z. Liu and L.F. Fu	3295
Research on the Effect of Combined Seismic Isolation System X.S. Fan and T.L. Tian	3299
Research on the Apparent Thermal Expansion Coefficient of Concrete Subject to Freeze-Thaw Cycles and Chloride Salt Attack Z.D. Wang, Y. Yao and L. Wang	3304

Traffic Load of Pavement under the Action of the Finite Element Analysis Viscoelastic Fracture	
H.Q. Liu and G.X. Wu	3311
The Control Study of Mass Concrete Floor Temperature Crack	
W.T. Guo and S.N. Yang	3318
Study on Suspended Mass Pendulums for Vibration Control of Transmission Tower under Seismic Excitation	
L. Tian, W.F. Li and Z.L. Wang	3323
Wind Tunnel Experimental Study on the Evaluation Criterion of Wind Environment at Pedestrian Level Based on Objective Behavior Study	
Y. Chen, C. Chen and X. Wang	3328
The Representative Volumetric Parameter for Dense-Graded Asphalt Mixture	
D.Q. Wang, Y.Q. Tan and H.N. Xu	3334
The Mechanism of TBM Cutter Wear in Mixed Ground	
M.Z. Gao, C. Li and X.C. Shi	3341
The Form and Features of Dispersive-Tube Structure	
J.T. Jiang, P.P. Lu, S. Yang and D.R. Du	3346
Fatigue Analysis of Gantry Crane Based on ANN	
L.H. Xiong and F. Wang	3351
Tests of Mechanical Characteristics of Steel Fiber Reinforced Concrete Wall-Beams Simply Supported	
S. Qi, S.B. Jiang, N. Liu and W. Wu	3355
The Analysing of Coupled Bending Torsion and Shear-Lag of Curved Box Girder Bridge Considering Prestress and Initial Curvature	
J.L. Qiao, Y. Jin, W.L. Tian and F. Li	3360
Modelling of Carbon Dioxide Diffusion into Surface-Biodeposited Concrete	
P.H. Li, W.J. Qu and B. Jin	3365
The Comparison of Coral Concrete and other Light Weight Aggregate Concrete on Mechanics Performance	
L. Wang and Y.L. Zhao	3369
Remediation and Improvement of Concrete by Bacterial Mediated Carbonate Deposition	
P.H. Li, K. Wang and Z.J. Wang	3373
The Strength of the Steel Bar Embedded in the Masonry Wall	
X.S. Ren, W.L. Wang and B. Zhou	3377
The Application of Parametric Design in Landmark Building Creation	
R. Wang and H. He	3381
Test Study on Size Effect of Flexural Performance of RC Free Beams	
H.Y. Zhou, X.L. Du, Z.B. Li and W.J. Wang	3385
The Finite Element Analyses for Beam Strengthen-Bolt Spliced Connection for Steel Moment Frame	
Y.X. Zhang, Q.X. Ye and L.Y. Wang	3390
Temperature Stress Monitor and Computation on Foundation Mass Concrete Construction Process	
J.H. Liu, X.H. Liu and Y.S. Zhou	3394
Research on Digital Image Based Displacement Measurement Method	
N.S. Hong	3399
Preliminary Experimental Results of a Masonry Building Prototype Subject to Harmonic Forces of Different Intensity	
D. Cancellara, F. de Angelis and V. Pasquino	3405
Tensile Strength Test and Analysis for Bolts with Hot-Dip Galvanizing	
Y.L. Peng, J.F. Yang, H.B. Li and X.M. Han	3412
The Optical Fiber Strain Monitoring Technology of Large-Scale Bridge	
S.L. Chen and M.B. Su	3417
A Reliability-Based Early Warning System for Real-Time Monitoring on RC Buildings	
W.S. Liu and M. Zhao	3422
In Situ Study on Reinforced Effect of Silt by Ram-Compaction Gravel Pile with End Expansion	
C.L. Ye, H.P. Feng and Y.J. Liu	3428

The Small Scale Effect on Linear Vibration of Beam-Like Nanostructures C. Li and L.Q. Yao	3432
Analysis and Design of Strengthened Hyperbolic Cooling Tower by Using PDS Module in ANSYS X.X. Wei and Y.B. Wu	3436
Ultimate Behavior of Single Shear Bolted Connections with Thin-Walled Aluminum Alloys(6061-T6) T.S. Kim, Y.H. Jo, S.H. Kim and Y.T. Lee	3441
The Experimental Study of Post-Embedded RC Bending Members with Inorganic Anchoring Material under Repeated Load H.M. Sun, X.G. Zhou and H.Z. Bao	3446
Calculation of Areas of Cultural Relics Surface Defects Based on the Triangular Mesh Model X.Q. Zhang, M.L. Hou, G. Zhu and Y.G. Hu	3452
Design and Analysis of Anchor Group under Eccentric Shear Loading Q.Z. Sheng, Q. Xie and X. Wang	3457
Qualitative Assessment of Chloride and Sulphate Influence on Soil Corrosivity N.M. Noor, S.R. Othman, N. Yahaya, K.S. Lim and A. Abdullah	3462
Anime Sante Church's Dome After 2009 L'Aquila Earthquake, Monitoring and Strengthening Approaches G. Boscato, D. Rocchi and S. Russo	3467
The Control Effect Analysis of the Variable Frequency TMD Applied to the Frame Structure M.Y. Zhang, B. Li and Y.R. Wang	3486
Modeling and Application of TMD for Vibration Control under Wind Load in High-Rise Buildings J.Y. Yuan and Z.H. Dong	3490
Welding Residual Stress of Flange-Plate Steel Reinforced Connections W. Wang, C.H. Zhang, G.F. Wang and J. Zhang	3495
Interface Shear Stress of Concrete Beams Strengthened with FRP in Salt Water C. Zhao, P.Y. Huang and Z.S. Chen	3499
Relative Analysis of Post Anchored RC Column Members with Different Material under Repeated Load H.Z. Bao, X.G. Zhou and H.M. Sun	3503
Influence of Corrosion Inhibitor on Marine Concrete Corrosion Rate X.M. Qin, C. Yan, Y. Li and J. Zhao	3508
The Effects of Geometric Nonlinearity on Elasto-Plastic Analysis of Plane Steel Frames in Fire B. Xia and Y.C. Wu	3513
Accidental Injury Detecting and Warning System for the Maglev Bridge F.Y. Li and P.F. Wu	3517
The Pattern Recognition of Structural Damage Based on Wavelet Kernel Function SVM M.Y. Zhang, B. Li, Y.R. Wang and J.F. Zhang	3523
A GIS-Based Analysis on the Characteristics of Ancient Architectures in Taizhou, Zhejiang Province, China R.Q. Xu, H. Peng, D.R. Zhang, C.D. Huang, Y.H. Li and H.X. Tai	3529
Monitoring and Analysis of Railway Bridge Pier Deformation of Municipal Engineering Crossing underneath Beijing-Shanghai High Speed Railway Y.Z. Zhang, Y.L. Du and B.C. Sun	3534
Strength Attenuation and Post Failure Behaviour of Fine Sandstone J.J. Zhou, H. Fu, Y. Zhang, Y. Li and D. Zhang	3538
Strength Studies of High Performance Concrete with Fly-Ash and Gangue Y.F. Meng, Y.Y. Tan and R. Li	3544

Chapter 13: Computational Mechanics

Numerical Integration Technique in Computation of Extended Finite Element Method F. Wang, D. Zhang, J. Yu and H. Xu	3557
---	------

A Numerical Analytical Method for Singularity Problem in V-Type Notch C. Yang, Z.H. Zhou and X.S. Xu	3561
On Stress Concentration Factor of Perforated Plate Filling with Different Materials W.P. Zhao and C. Yi	3565
A Scientific Problem and Analytical Method for Structure Reinforcement H.Z. Jia, J.B. Sun, Y.F. Wu and X.S. Xu	3569
Spatial Convergence of Crack Prediction on Structured Mesh Based on Distributed Cohesive Element Method M.H. He, K.G. Xin, D.Y. Cui and Y.F. Liu	3573
Viscoplastic Analysis of Mixed Polygonal Granular Material H.L. Chen and Y.C. Wu	3578
A Quasi-Green's Function Method for the Bending Problem of Simply Supported Trapezoidal Shallow Spherical Shells on Winkler Foundation S.Q. Li and H. Yuan	3582
The Finite Element Model Study of the Pre-Twisted Timoshenko Beam C.H. Chen, Y. Huang and J. Shan	3587
Hot Forming Flow Stress Model of Steel 50A1300 X.D. Zhou, X.R. Liu and X.Y. Shan	3591
Large Deformation Geometric Nonlinear Beam Element Based on U.L. Format Y.J. Xia and Q. Miao	3596
Penetration Deep of Non-Deformable Projectile into Concrete Targets W.W. Sun and J. Yuan	3604
The Material Parameter Identification for Functionally Graded Materials by the Isoparametric Graded Finite Element L.X. Huang, L. Wang, Y. Chen, Q. Yao and X.J. Zhou	3609
The Finite Element Model Study of the Pre-Twisted Euler Beam Y. Huang, C.H. Chen and J. Shan	3615
Dynamic Characteristics Analysis of Stepped Circular Plates H.Y. Cai and Y. Zhang	3619
Analysis of Mechanical Behavior of Subway Tunnel Constructed by Cover and Cut Reverse Method T.C. Wang, Y. Gao and H.L. Zhao	3623
Finite Element Analysis of Plane Shear(Mode II) Fracture Mechanism of Brittle Rock at High Temperature Z. Wang, H.W. Sun, S.P. Shang and W.X. Shi	3628
The Study of Meshless Method Simulation of Plate Bending Problem Y.L. Jiao, G.W. Meng and X.X. Qin	3633
Study of Crack Growth Based on Extended Finite Element Method H. Xu, F. Wang and D. Zhang	3639
Effect of High Pressure on Dynamic Compressive Strength of A95 Alumina Ceramics G.W. Yao, Y.J. Li and X.W. Feng	3643
Experimental Study on Temperature Characteristic of Compound Crumb Rubber Modified Asphalt and Mixture L. Wang, Y.M. Xing and C.Q. Chang	3647
Experiment Study on Corrosion Rate of Concrete Specimens Immersed in Sulfuric Acid Z.G. Song, H.G. Min and X.S. Zhang	3652
Study of Mechanical Property of Column with Construction Seam J.M. Dong, X.K. Yan and G.L. Zhao	3659

Chapter 14: Construction Technology

The Study of the Confinement Velocity in the Longitudinal Ventilation Tunnel Fire K.Q. Sun and H. Yang	3665
An Investigation on Bending Capacity of Support Stiffness Wall-Slab Structural System by Using Single Layer and Double Layer of Rebar for Residential Project H.M. Yee and S.I. Hani Ismail	3670

Key Construction Technology of Fair-Faced Concrete on China Qingdao Zhuoting Plaza Project	
Y. Sun, Y.M. Wang, Y.Z. Yu, L. Cheng and P.P. Guo	3674
Heaped Load Experiment Research on Glass Fiber Mat Reinforced Thermo Plastics Formwork Support Unit	
X.F. Cai, J.P. Zhuang and M.B. Tuo	3678
Use of an Accelerated Migration Test to Study Alteration of Backfill in Contact with Concrete	
H.C. Chang, C.Y. Wang and W.H. Huang	3682
Construction Technology and Benefit Analysis of Fair-Faced Concrete in High-Rise Building	
Y. Sun, Y.M. Wang, L. Cheng and X.L. Zhu	3690
Study on Smooth Blasting of Tunnel in Fault Formation	
F.Q. Gao	3694
Upper Cantilevered Scaffold Construction Technology Analysis of Ultra-High Tower	
X.M. Yan	3698
The Study on the Installation Process of Flue Gas Heat Exchanger	
X.T. Li	3702
Introduction of Vertical Mine Shaft Sinking by Full Section Boring Method	
H.L. Jiang	3706
Seismic Response Analysis on Continuous Rigid-Frame Bridges with High Piers Based on Fiber Model	
K.W. Jia, M.Q. Liu, X.M. Song and H.Z. Kang	3710
The Study on 3D Urban Planning Based on VR and GIS	
B.S. Zhu and F. Bi	3714
Fracture Model of the Failure Wave in the Shocked Brittle Materials	
G.W. Yao, Z.J. Zhou and X.W. Feng	3718

Chapter 15: Computer Simulation and CAD/CAE

Experimental Study on Compressive Behavior of CFRP Confined Concrete Columns	
W.H. Ma and H.Z. Kang	3725
Seismic Design Scope of Tower Structures for UHV Transmission Lines on the Zone of Earthquake Fortification Intensity 8	
N.N. Zheng, Y.M. Li, J. Zhao and Z.L. Chen	3730
In-Plane Quasi-Static Crushing of Cissoidal Hexagonal Honeycomb Cores	
D.Q. Sun, M. Liu and Y.X. Zhu	3736
The Analysis and Application of AHP in a Construction Project Evaluation	
D.B. Li, Y. Yao and M. Han	3740
Finite Element Modelling for Characterizing some Dynamical Properties of a Masonry Building Prototype	
D. Cancellara, F. De Angelis and V. Pasquino	3745
Thermal Properties of Vacuum Insulation Panels with Glass Fiber	
W.P. Wu, Z.F. Chen, J.M. Zhou and X.Y. Cheng	3753
Numerical Simulation of Subway Station Constructed Using Top-Down Method	
T.C. Wang, X.H. Du and H.L. Zhao	3757
Applications of Data Mining in CRM Based on Web Log	
J.N. Dang, A.Q. Zhang and W. Jing	3762
Simulation of the Slump Test Based on the Discrete Element Method (DEM)	
H. Hoornahad and E.A.B. Koenders	3766
Numerical Simulation on Penetration Properties of Concrete Based on Random Particle Model	
Y. Peng, Y. Fu, X.L. Liu, J.L. Tao and Y. Yao	3774
An Investigation of Procedures of Change Orders' Control in Roadway Construction Projects	
T. Pourrostam, A. Ismail, A. Soleymanzadeh and M. Gouyouchizad	3778
Forecast on Payback Period of Restaurant Projects Investment by Computer Simulation	
M.F. Zhang, L. Huang and Y.P. Cai	3782

Bounday-Layer Asymptotics on the Contact Interface in the Impact Problem L. Hou, B. Wang, D.Z. Lin, L. Qiu and Y.H. Ren	3787
Research on Constitutive Equation for Steel Wire Wound Reinforced High-Pressure Hose F. Gu, N. Li and L. Sun	3791
The Application of Hyper-Spectral Remote Sensing in Cultural Relic Conservation X. Lu, M.L. Hou and Y.G. Hu	3798
Tracking the Rheological Behavior Change of a Fresh Granular-Cement Paste Material to a Granular Material Based on DEM H. Hoornahad and E.A.B. Koenders	3803
Study on Damage of Rock Samples with Single-Hole under Uniaxial Compression Condition B. Xie, H.F. Tong and X. Xia	3810
Risk Prevention and Control Measures in Highway Design and Construction Turnkey Project J.L. Peng	3814
Path Planning for Crane Lifting Based on Bi-Directional RRT X. Wang, Y.S. Lin, D. Wu, C.W. Zhang and X.K. Wang	3820
Design and Experiment Software Platform of Modern Control Algorithm for High-Order Inertial Object X.P. Liu and L. Tian	3824
Development of Existing Residential Building Energy Saving Renovation Design and Management Systems L. Wang, R. Mu and S.L. Gao	3829
Numerical Simulation and Analysis of Penetrating Concrete Slabs Y. Fu, Y. Peng and Y. Yao	3833
Research on Random Continuous and Cellular Green Concrete B.J. Guan and S.J. Xing	3837
Study on the Risk Management Framework of International EPC Cement Engineering Project Y.B. Wang and H.J. Lou	3842
Research on Establishment and Analysis of the System of Affordable House Supply System H.Y. Liu and J.W. Zheng	3852
Image Mosaic Algorithm Study G. Yang	3857
Effect of the Medical Insurance Decree on Construction Industry in Saudi Arabia A.M. Alsugair	3861
Speedy Design Method for Fluid Viscous Dampers Based on Numerical Simulation by CFD Q. Guo, Y.B. Chen, X.L. Ning and L. Tang	3869
Transient Simulation of a Three-Dimensional Moving Downburst B.F. Ji and W.L. Qu	3875
A Conceptual Model to Assess the Buildability of Building Structure at Design Stage in Malaysia M. Nourbakhsh, S.H. Mydin, M.Z. Rosli, S. Zolfagharian, J. Irizarry and M. Zahidi	3879
Game Analysis of Income Distribution between Public and Private Parties in the PPP Construction Pattern of the Security Housing Y.Q. Zhang and Q.X. Fu	3885
Shake Table Test of Complex High-Rise Building Equipped with Torsional Vibration Control Device B. Zhao, J. He, H. Gao and X.G. Chen	3889
Study on the Relationship between Factor of Safety and Angle of Dip of Bedding Rock Slope when Exposed to Reservoir Water Level Fluctuation Y. Li, S.P. Wang, Z.H. Zhang and S.J. Li	3894
