Preface, Scientific Committee and Conference Organizer

Chapter 1: Statics and Stability of Civil Structures

| | |
|--|-----|
| Sensitivity Analysis of Stress State of Welded Tanks Z. Kala, J. Gottvald, J. Stonis, S. Vejvoda and A. Omishore | 3 |
| Effect of Inclination of Columns on the Change of the Stiffness of a High-Rise Building S. Medvecka and O. Ivankova | 9 |
| Problems Connected with the Application of Lamella Flanges in Steel Bridge Construction V. Kristek, J. Kunrt, M. Skaloud and S. Urushadze | 13 |
| Specific Aspects of Tensile Structures R. Lang, I. Nemec and J. Martinasek | 19 |
| Historical Timber Structures with Selected Joints P. Fajman and J. Maca | 25 |
| Influence of the Load-Bearing System of a High-Rise Building on its Stiffness O. Ivankova and L. Konecna | 29 |
| Elastic Critical Force for Torsional-Flexural Buckling of Metal Members with Mono-Symmetric Cross-Sections M. Kovac | 36 |
| Effect of a Bending Stiffness on the Load-Displacement Path of Von Mises Truss M. Psotný and J. Havran | 43 |
| Elastic Buckling and Post-Buckling of Von Mises Planar Trusses M. Kalina, Z. Kala and P. Frantík | 49 |
| Comparison of Analytical and FEM Solutions of the Contact Tasks of Foundation - Subsoil Interaction L. Hrustinec, J. Sumec and J. Kuzma | 55 |
| Bended Pile and the Layered Subsoil L. Prekop | 61 |
| Effect of Non-Uniform Temperature Distribution over the Cross-Section in Steel Frame Structure L. Lausova, I. Skotnicova, V. Michalcova and P. Konečný | 65 |
| Static Analysis of Load-Bearing Structure of a Transparent Roof O. Ivankova, L. Konecna and E. Vojtekova | 69 |
| Design Optimization and Modal Analysis of 3-D Lattice Plate K. Tvrdá and M. Stiglic | 77 |
| Foundation Plate Optimization K. Tvrdá | 81 |
| Effect of a Nonlinear Term in a Strain-Displacement Relationship on the Load-Displacement Path of Von Mises Truss J. Havran and M. Psotný | 85 |
| Application of Fuzzy Set Theory to the Serviceability Limit State of a Steel Beam under Bending J. Vales, Z. Kala and J. Melcher | 91 |
| Analysis of Reinforced Concrete Slab Structures O. Sucharda and J. Kubosek | 97 |
| Integral Representation of Constitutive Equations in Linear Theory of Viscoelasticity I. Veghova and J. Sumec | 101 |
| Stiffness of Reinforced Concrete Frame Joint I. Veghova | 107 |
| Stability Prediction of Intensification of the Lime Sludge Impoundment I. Slavik | 112 |

| | |
|---|-----|
| Effective Areas of Internal and Outstand Elements under Compression Stress Lower than the Yield Strength I. Balaz and Y. Kolekova | 118 |
| Probability Analysis of a Composite Steel and Concrete Column Loaded by Fire J. Kralik, M. Klabnik and A. Grmanova | 126 |
| Numerical Analysis of the Influence of the Parameter of Ductility of Reinforcing Steel on the Behaviour of Narrow Three-Span Reinforced Concrete Slabs from the Point of View of Experimental Investigations M. Wieczorek | 133 |
| Numerical Analysis of the Influence of the Parameter of Ductility of Reinforcing Steel on the Behaviour of Single-Span Reinforced Concrete Beams from the Viewpoint of Experimental Investigations M. Wieczorek | 139 |
| Experimental Investigation and Theoretical Analysis of Polystyrene Panels with Load Bearing Thin-Walled Cold-Formed Elements M. Al Ali, M. Tomko and I. Demjan | 145 |
| Investigation of Residual Stresses in Thin-Walled Structure and Slender Web L. Snirc and J. Ravinger | 153 |

Chapter 2: Dynamics and Wind Engineering

| | |
|---|-----|
| Numerical and Experimental Modelling of an Air Flow Field in the Chamber of a Rectangular Cross-Section Contraction V. Michalcova, S. Kuznetsov, L. Lausova and I. Skotnicova | 161 |
| Different Approaches to Modeling of Proportional Damping V. Sana | 166 |
| Wind Load of a Curved Circular Cylinder Structures P. Szczepaniak and A. Padewska | 172 |
| Analysis of Footbridges under Human Induced Loads O. Kratochvil and J. Krizan | 180 |
| Experimental and Numerical Determination of Wind Pressure Distribution on an Object with Atypical Form O. Hubova, L. Konecna and I. Oleksakova | 185 |
| Experience with Structural Damage Identification of an Experimental Bridge Model M. Sokol, R. Aroch, M. Venglar, M. Fabry and T. Živner | 192 |
| Diagnostics of an Existing Cable-Stayed Bridge by Means of the Dynamic Load Test M. Polak, P. Fajman, J. Maca and T. Plachy | 200 |
| Consideration of Cover Layer of Concrete by Nonlinear Sectional Analysis M. Krchnak and M. Sokol | 206 |
| Modeling of a Filled Cylindrical Tank and the Dynamic Analysis of its Eigenfrequencies N. Jendzelovsky and L. Baláž | 212 |
| Determination of Eigenfrequencies of Steel Cylindrical Storage Tank L. Konecna and L. Baláž | 218 |
| Comparison of Natural Frequencies of Hollow Core Slabs N. Jendzelovsky and K. Zabakova Vrablova | 225 |
| 3-D CFD Simulation of the Airflow over a Gable Roof with Different Elevations J.J. Kralik | 229 |
| Risk Assessment of Safety Analysis of NPP Structures due to Earthquake Events J. Kralik | 235 |
| Influence of Mesh Option "PATTERN" for Fluid Region Using Finite Element Method K. Kotrasova and E. Kormanikova | 241 |
| Numerical Analysis of Reinforcing Bars in the Support Zone of Central Slab-Column Connections Subjected to Eccentric Tension B. Wieczorek | 245 |
| Numerical and Experimental Assessment of the Highway Arch Viaduct J. Bencat, M. Stehlikova and M. Skarupa | 252 |

| | |
|--|-----|
| Efficiency of Dynamic Relaxation Method in Form-Finding Process of Cable-Membrane Structures | |
| M. Huttner, J. Maca and P. Fajman | 260 |
| Influence Imperfections on the Difference between the Numerical and Experimental Investigations of a Punching in the Central Slab-Column Connections of RC Structures | |
| B. Wieczorek | 264 |

Chapter 3: Problems in Material Engineering

| | |
|---|-----|
| Analysis and Recommendations about EN1992-1-1 Formulas for Limiting the Span/Depth Ratio | |
| S.V. Slavchev and S.R. Guglev | 273 |
| Analysis of Durability of High Performance and Ordinary Concrete Mixtures with Respect to Chlorides | |
| P. Lehner and P. Konečný | 281 |
| The Creep of the Cement Mortar with Relation of Cement and Sand in Same Relation | |
| P. Padevĕt and P. Bittnar | 285 |
| Composite Slabs with Prepressed Embossments – Longitudinal Shear Resistance | |
| J. Holomek, M. Bajer, J. Barnat and M. Vild | 289 |
| Influence of Type of Contact of RC Beam and Strengthening Slab on Limit States of Strengthened Element | |
| M. Krizma, J. Petrzala and M. Kiřac | 294 |
| Using Thermo-Steel Panels as Wall Bearing Structure | |
| J. Ravinger and L. Snirc | 302 |
| Effect of Fibre Type in Concrete on Crack Initiation | |
| I. Havlikova, I. Merta, A. Schneemayer, V. Veselý, H. řimonov, B. Korycanska and Z. Kerřner | 308 |
| Composite Laminates under Hygrothermal Environment | |
| E. Kormanikova and K. Kotrasova | 312 |
| Numerical Modeling of Laminated Glass Units | |
| A. Zemanova, J. Zeman and M. Sejnoha | 316 |
| Software Modelling of Composite Steel and Concrete Structures | |
| V. Kvocak, V. Kozlejova and D. Dubecky | 320 |
| Optimal Design of Structures Made of Fiber Reinforced Concrete | |
| M. Holko and J. Dicky | 326 |
| Experiment and Elastic-Plastic Modelling of the IPN160 Beam | |
| J. Vasek and O. Sucharda | 331 |
