

# Table of Contents

## Preface

## Chapter 1: Keynote Papers

<b>Tribological Effects in and by Metal Cutting</b> E. Segebade, J. Schneider and V. Schulze	3
<b>Joining by Plastic Deformation</b> L.M. Alves, C.M.A. Silva and P.A.F. Martins	25
<b>Friction and Wear in Metal Forming: 25 Years at LAMIH UMR CNRS 8201</b> L. Dubar, A. Dubois and M. Dubar	42

## Chapter 2: Surface Engineering

<b>Increasing the Adhesive Wear Resistance of Hot Stamping Tools by Modifying the Surfaces</b> F. Neubauer, T. Reil, K. Hofmann and M. Merklein	61
<b>Laser Polishing of Cold Work Steel AISI D2 for Dry Metal Forming Tools: Surface Homogenization, Refinement and Preparation for Self-Assembled Monolayers</b> I. Ross, A. Temmler, M. Küpper, S. Prünke, M. Teller, J.M. Schneider and R. Poprawe	69
<b>Effect of Contact Area on Friction Force in Sheet Metal Forming Operations</b> A. Mousavi, T. Sperk, T. Gietzelt, T. Kunze, A.F. Lasagni and A. Brosius	77
<b>Influence of Surface Texturing Sequence on Fatigue Life and Tribological Properties of Coated Tool Steel</b> M. Sedlaček, B. Podgornik and D. Česnik	85
<b>Friction and Wear Analysis of Deep Rolled and Vibrorolled Specimens in Lubricated Contact</b> F. Klocke, A. Shirobokov, R. Hild, A. Feuerhack, D. Trauth and P. Mattfeld	93

## Chapter 3: Galling

<b>Towards the Numerical Prediction of Galling Onset in Cold Forming</b> O. Filali, A. Dubois, L. Dubar and M. Dubar	103
<b>Galling Generation Mechanism in Upsetting-Ball Ironing Test</b> Z.G. Wang and S. Komiyama	111
<b>The Galling Behavior of Advanced Coating Contacts with Aluminium Alloy during Sliding Wear</b> Y.R. Hu, M.M. Gharbi, V. Liang, Y. Zheng, D.J. Politis and L.L. Wang	117
<b>Lubricating Performance of Residual Zinc Phosphate Coating on Forged Specimen in Bowden-Leben Sliding Test</b> O. Kada and Z.G. Wang	124
<b>An Insight in Friction and Wear Mechanisms during Hot Stamping</b> J. Venema, J. Hazrati, D. Matthews and T. van den Boogaard	131

## Chapter 4: Lubrication

<b>Experiment and FE Analysis of Compression of Thick Ring Filled with Oil</b> Y. Tatematsu, M. Morimoto and K. Kitamura	141
<b>Lubrication in Hot Forging with Pulsed Ram Motion</b> R. Matsumoto, H. Utsunomiya and S. Ishigai	149
<b>Effect of Workpiece Surface Topography on Friction in Cold Forging Using Environmentally-Friendly Lubricant</b> K. Hayakawa and T. Nakamura	157

<b>Experimental Investigation of Endogenous Lubrication during Cold Upsetting of Sintered Powder Metallurgical Components</b> B.A. Behrens, K. Brunotte and D. Bohr	163
<b>Lubricant Influence on the Ejection and Roughness of In-Die Electro Sinter Forged Ti-Discs</b> E. Cannella and C.V. Nielsen	171

## **Chapter 5: Simulative Testing**

<b>A Study on DLC Tool Coating for Deep Drawing and Ironing of Stainless Steel</b> E. Üstünyagiz, M.H. Sulaiman, P. Christiansen, C.V. Nielsen and N. Bay	181
<b>Investigation of Friction Conditions in Dry Metal Forming of Aluminum by Extended Conical Tube-Upsetting Tests</b> M. Teller, I. Ross, A. Temmler, R. Poprawe, S. Prünte, J.M. Schneider and G. Hirt	189
<b>Microstructure and Heat Treatment of Hot Work Tool Steel: Influence on Mechanical Properties and Wear Behaviour</b> B. Skela, M. Sedlaček and B. Podgornik	196
<b>High Temperature Friction and Wear Testing for Closed-Die Steel and Aluminium Forgings</b> B. Buchmayr and J. Elser	204
<b>Tribological Behavior of Different Tool Steels and Surface Properties under Hot Stamping Conditions</b> P. Schwingenschlögl, J. Tenner and M. Merklein	212

## **Chapter 6: Tribology of Metal Forming Processes**

<b>Multi-Scale Contact Modeling of Coated Steels for Sheet Metal Forming Applications</b> M. Shisode, J. Hazrati, T. Mishra, M. de Rooij and T. van den Boogaard	223
<b>Design of Progressive Die Sequence by Considering the Effect of Friction, Temperature and Contact Pressure</b> E. Üstünyagiz and T. Altan	232
<b>On the Mechanism by which Chromium Improves Strip Surface Cleanliness in Steel Strip Cold Rolling</b> P. Montmitonnet, N. Bouadjadja, L.P. Luong, J.J. Bertrandie and H. Dietsch	240
<b>Estimation of Frictional Coefficient between Punch and Billet at Back-Stroke in Backward Can Extrusion Test of Steel</b> K. Asai, K. Kitamura, K. Goto and N. Hayashi	248

## **Chapter 7: Tribology of Machining Processes and Wear**

<b>Analysis of the Tribological Conditions in Grinding of Polycrystalline Diamond Based on Single Grain Friction Tests Using the Pin-Disk Principle</b> F. Vits, D. Trauth, P. Mattfeld, R. Vits and F. Klocke	259
<b>Novel Polishing Method of Cutting Edge Using AC Electric Field for Controlling Flank Wear</b> H. Tanaka, Y. Kawase and Y. Akagami	268
<b>A Simple Model Linking Surface Roughness with Friction Coefficient and Manufacturing Cost</b> L. De Chiffre, Ö.C. Kücüküldiz and N. Bay	275
<b>Wear Prediction for Oscillating Gear Forming Processes Using Numerical Methods</b> W. Schmidt and P. Groche	283
<b>Quantitative Evolution of WC-Co Cemented Carbide Tool Surface during the Cold Forming of Steel Parts</b> L. Dubar, C. Debras, M. Dubar and A. Dubois	290

## **Chapter 8: Solid Phase Welding I**

<b>A New Coupled Thermal Stress FE-Model for Investigating the Influence of Non-Isothermal Conditions on Bond Strength and Bonding Status of the First Pass in Roll Bonding</b>	
Z. Liu, A. Kraemer, K.F. Karhausen, H. Aretz, M. Teller and G. Hirt	301
<b>Brushing for High Performance Cold Pressure Welded Bonds</b>	
C. Gerlitzky, S. Volz and P. Groche	309
<b>Influence of Stacking Sequence and Intermediate Layer Thickness in AA6082-IF Steel Tri-Layered Cold Roll Bonded Composite Sheets</b>	
S.M. Arbo, I. Westermann and B. Holmedal	316
<b>Finite Element Modeling of Bond Formation in Cold Roll Bonding Processes</b>	
K. Khaledi, S. Wulfinghoff and S. Reese	323
<b>Induction Pre-Heated Linear Friction Welding</b>	
M.R. Kelly, S.R. Schmid, D.C. Adams and J. Fletcher	331

## Chapter 9: Solid Phase Welding II and Mechanical Joining I

<b>Thermomechanical Modelling of Direct-Drive Friction Welding Applying a Thermal Pseudo Mechanical Model for the Generation of Heat</b>	
M.R. Sonne and J.H. Hattel	343
<b>The Influence of Ultrasound Enhancement during Friction Stir Welding of Aluminum to Steel</b>	
M. Thomä, G. Wagner, B. Straß, B. Wolter, S. Benfer and W. Fürbeth	351
<b>Temperature Control for Friction Stir Welding of Dissimilar Metal Joints and Influence on the Joint Properties</b>	
M. Krutzlinger, R. Marstatt, G. Costanzi, A. Bachmann, F. Haider and M.F. Zaeh	360
<b>Mechanical Joining of Glass and Aluminium</b>	
S. Veenaas and F. Vollertsen	369
<b>Numerical Analysis of the Scalability of Roller Clinching Processes</b>	
M. Hiller, S. Vitzthum, M. Hacker, T. Benkert and W. Volk	377

## Chapter 10: Mechanical Joining II

<b>Shear-Clinching of Multi-Element Specimens of Aluminium Alloy and Ultra-High-Strength Steel</b>	
D. Han, R. Hörhold, M. Müller, S. Wiesenmayer, M. Merklein and G. Meschut	389
<b>Numerical Investigation of the Tool Load in Joining by Forming of Dissimilar Materials Using Shear-Clinching Technology</b>	
S. Wiesenmayer, M. Müller, P. Dornberger, D. Han, R. Hörhold, G. Meschut and M. Merklein	397
<b>Joining by Die-Less Hydroforming of Profiles with Oval Cross Section</b>	
M. Müller, S. Gies and A.E. Tekkaya	405
<b>Parametric Study of Hybrid Metal-Composites Clinching Joints</b>	
A. Dean, R. Rolfes, B.A. Behrens, S. Hübner, A. Chugreev and N. Grbic	413
<b>Joining by Forming of Tubes to Sheets with Counterbored Holes</b>	
L.M. Alves, R.M. Afonso, C.M.A. Silva and P.A.F. Martins	421

## Chapter 11: Unconventional Joining Processes

<b>Parameter Identification for Magnetic Pulse Welding Applications</b>	
J. Bellmann, J. Lueg-Althoff, S. Schulze, S. Gies, E. Beyer and A.E. Tekkaya	431
<b>Electromagnetic Joining of Thin Sheets by Adapted Pulses</b>	
L. Langstädtler, M. Herrmann, C. Schenck and B. Kuhfuss	439
<b>Proofs and Contradictions for Wave Formation Theories in Collision Welding</b>	
B. Niessen, A. Franceschi and P. Groche	447
<b>Influence of Lubrication on Manufacturing of Multicomponent Gear Wheels by Lateral Extrusion</b>	
R. Meissner and M. Liewald	456
