

Table of Contents

Preface

Chapter 1: Tribotechnics

Prediction of the Frictional Behavior of Sealing Assembly for Mass Production by Surface Roughness Analysis V. Sári-Barnácz, B. Fazekas and T.J. Goda	3
Experimental Study of Severe Abrasion "GOUGING" Using Structural Steel and Tool Grade Steel M. Vite-Torres, I.A. Salazar-Velázquez, O. Figueroa-García, E.A. Gallardo-Hernández, J.R. Laguna-Camacho and J.A. Frías-Flores	13
Tribology Application of Unpreloaded Mechanical Seal in Presence of MGS-1 Regolith M.P. Kiss, G.Z. Kalacska and R. Keresztes	25
Abrasion between Rotary Shaft/Seal Pairs under Extremes of Lunar Highland Regolith Exposure B. Turapov, G. Kalacska and R. Keresztes	33
Numerical Analysis of an Electro-Viscoelastic Frictional Contact Problem with Damage M. Chegaar	45

Chapter 2: Next-Generation Photovoltaics

Optimization of a High-Performance Cu₂NiGeS₄ Solar Cell with an SnS Back Surface Field K. Ben Abdelmalek, R. Boussetta, O. El Abouti, O. Mommadi, A. El Moussaouy and C.A. Duque	61
Structural, Electronic, and Optical Properties of Br-Substituted Halide Perovskite KGeBr_{3-x}Cl_x (x = 0, 1, 2, 3): A DFT Study H. Bochaoui and M. El Bouabdellati	75
Numerical Modelling of a Perovskite Solar Cell: Optical and Electrical Properties O. El Fatri, M. El Hadi, R. Boussetta, O. Mommadi, A.K. El Miad, A.K. El Miad, A. El Moussaouy and A. Oukaira	85

Chapter 3: Materials and Technologies in Mechatronics

Comparative Numerical Investigation of SrTiO and PbTe Thermoelectric Materials for Medical Cooling Applications A. Kharmouch, H. Bouali, M.K. Hasan and S. El Yatim	97
A Comparative Study of Al, B, Ga Encapsulation in c-Based Nanomaterial in Li-Ion Batteries: Functional Analysis by DFT Computations F. Mollaamin and M. Monajjemi	109
Structural Characterization of Yttrium-Substituted Lead Phosphate Apatite Synthesized at 825°C: A Systematic XRD Investigation M.A.B. Abdul Jabar and R.A. Mohammed	127
Numerical Investigation of Fatigue Crack Propagation in High-Performance Aluminum Alloys M.A. Hossain, M.U. Siddiq, J. Javed and M.M.E. Musa	141
