

Table of Contents

Preface, Committee and Acknowledgement

Chapter 1: Cleaning for FEOL Applications

Necessity of Cleaning and its Application in Future Memory Devices	3
G.M. Choi	
Removal of Interfacial Layer in HfO₂ Gate Stack by Post-Gate Cleaning Using NF₃/NH₃ Dry Cleaning Technique	11
M.S. Lee, H.J. Oh, J.H. Lee, I.G. Lee, W.G. Shin, S.Y. Kang and D.H. Ko	
Catalyst Assisted Low Temperature Pre Epitaxial Cleaning for Si and SiGe Surfaces	16
S.K. Dhayalan, A. Hikavyy, R. Loo, K. Wostyn, K. Kenis, Y. Shimura, E. Rosseel, H.B. Profijt, J.W. Maes, B. Douhard and W. Vandervorst	
HF-Last Wet Clean in Combination with a Low Temperature GeH₄-Assisted HCl <i>In Situ</i> Clean Prior to Si_{0.8}Ge_{0.2}-on-Si Epitaxial Growth	20
K. Wostyn, S.K. Dhayalan, A. Hikavyy, R. Loo, B. Douhard, A. Moussa, D. Rondas, K. Kenis, P.W. Mertens, F. Holsteeyns, S. De Gendt and H.B. Profijt	
Retardation Phenomenon of Oxide Removal during the Formation of Dual Gate Oxide via PR-Mask Wet Etching	24
K.H. Ko, M.G. Song, B.K. Cho, B.U. Yoon, Y.J. Cho and T. Kim	
Aluminum Reduction in SC1	28
S.J. Kweskin and L.W. Shive	
Metal Removal Efficiency in Deep Submicron Trenches by Wet Chemicals	32
P. Garnier, N. Drogue and R. Duru	
Impact of Surface Treatment of Si₃N₄ on Subsequent SiO₂ Deposition	36
F. Milanesi, S. Vendrame, E. Ravizza, S. Spadoni, F. Pipia and L. Livellara	
Operation of a New Electrolyzed Cell Using Boron Doped Diamond Electrodes	40
M. Fryda, T. Mathée, J. Oshinowo, D.H. Baek, H.J. Förster and G. Heinze	

Chapter 2: Cleaning for FEOL Applications: Beyond-Si Active Area

InGaAs (110) Surface Cleaning Using Atomic Hydrogen	47
T. Kent, M. Edmonds, R. Droopad and A.C. Kummel	
Surface Chemistry of GaAs(100) and InAs(100) Etching with Tartaric Acid	52
P. Mancheno-Posso and A.J. Muscat	
Nanoscale Etching and Reoxidation of InAs	56
D.H. van Dorp, S. Arnauts, D. Cuyvers, J. Rip, F. Holsteeyns and S. De Gendt	
Passivation of InSb(100) with 1-Eicosanethiol Self-Assembled Monolayers	59
Y. Contreras and A.J. Muscat	
Cross-Contamination Risk Evaluation during Fabrication of III-V Devices in a Silicon Processing Environment	63
M.C. Roure, S. Vialle, M. Rebaud, H. Fontaine and P. Besson	
Surface Cleaning of Graphene by CO₂ Cluster	68
H.M. Choi, J.A. Kim, Y.J. Cho, T.Y. Hwang, J.W. Lee and T. Kim	

Chapter 3: Wet Etching for FEOL Applications

Process Control Challenges of Wet Etching Large MEMS Si Cavities	73
I. Kashkoush, J. Rieker, G. Chen and D. Nemeth	
Wet Etch Rate Behavior of Poly-Si in TMAH Solution at Various Ambient Gas Conditions	78
E. Lin, T. Guo, C.C. Chien, M.H. Chang, W. Yu, N.H. Yang, J.F. Lin, J.Y. Wu, K.M. Robb, A. Baldaro and A.N. Other	

Advanced Monitoring of TMAH Solution	81
J.J. Wang, E. Shalyt, C.N. Bai, G. Liang, M. MacEwan and V. Parekh	
Effect of Dissolved Oxygen for Advanced Wet Processing	85
Y. Yoshida, M. Otsuji, H. Takahashi, J. Snow, F. Sebaai, F. Holsteyns, P.W. Mertens, M. Sato, H. Shirakawa and H. Uchida	
Watermark Formation on Bare Silicon: Impact of Illumination and Substrate Doping	89
A.H. Tamaddon, H. Philipsen, P.W. Mertens, F. Holsteyns, M. Heyns, S. De Gendt and D.H. van Dorp	
Selective Nitride Etching with Phosphoric and Sulfuric Acid Mixtures Using a Single-Wafer Wet Processor	93
V. Sih, B. Reimer, A.S. Ratkovich, J.M. Lauerhaas and J.W. Butterbaugh	
Single Wafer Selective Silicon Nitride Removal with Phosphoric Acid and Steam	97
T. Guo, W. Yu, C.C. Chien, E. Lin, N.H. Yang, J.F. Lin, J.Y. Wu, A. Ratkovich, D. Kahaian, J.W. Butterbaugh and J.M. Lauerhaas	
Pt Etching Method at Low Temperature Using Electrolyzed Sulfuric Acid Solution	101
Y. Ogawa, M. Uchida, T. Otsu, T. Nagai and H. Morita	
Nickel Selective Etch for Contacts on Ge Based Devices	105
F. Sebaai, L. Witters, F. Holsteyns, Y. Yukifumi, P.W. Mertens and S. De Gendt	

Chapter 4: Wet Processing of High Aspect Ratio Structures

Study of Wetting of Nanostructures Using Decoration by Etching	
G. Vereecke, X.M. Xu, E. Kesters, I. Simms, K. Nafus, L. Haensel, T.G. Kim, M. Lismont, F. Holsteyns and S. De Gendt	111
Impact of Electrostatic Effects on Wet Etching Phenomenon in Nanoscale Region	
A. Okuyama, S. Saito, Y. Hagimoto, K. Nishi, A. Suzuki, T. Toshima and H. Iwamoto	115
Freeze Drying of High Aspect Ratio Structures	
M.N. Patel, S. Sirard, R. Limary and D. Hymes	119

Chapter 5: Fluid Dynamics, Cleaning Mechanics

Effect of DI-Water Dilution and Etchant Arm Movement on Spinning Type Wet Etch	125
H.H. Lee, D. Ahn, S.T. Lim and T. Kim	
Effect of Nozzle Distance and Fluid Flow Rate in Jet Spray Wafer Cleaning Process	128
K.M. Seo, D.H. Kim, Y.J. Cho and T.H. Kim	
Effects of Chamber Pressure on the Performance of CO₂ Beam Cleaning	131
S.H. Kim, J.H. Lee and H.Y. Kim	
Physical Chemistry of Water Droplets in Wafer Cleaning with Low Water Use	
J.C.J. van der Donck, J. Bakker, J.A. Smeltink, R.B.J. Kolderweij, B.C.M.B. van der Zon and M.H. van Kleef	134
Metal Etch in Advanced Immersion Tank with Precision Uniformity Using Agitation and Wafer Rotation	
S. Tice and C.G. Park	138
Novel Slurry Injection System for Improved Slurry Flow and Reduced Defects in CMP	
A. Philipossian, L. Borucki, Y. Sampurno and Y. Zhuang	143
Effect of Viscoelasticity of PVA Brush on Friction during Post-CMP Cleaning: A Guideline for Nodule Configuration	
Y. Hara, T. Sanada, A. Fukunaga and H. Hiyama	148
Understanding the Formation of Circular Ring Defects in Post-CMP Cleaning	
P. Hsu, R. Luo and P. Berar	153
Particle Measurement with a Liquid-Borne Particle Counter: Analytical Figures of Merit	
S. Liu and B. Liu	157
Fluid Flow and Defect Density Considerations when Drying Bumped Wafers Using Spin and Surface Tension Gradient Methods	
D.L. Goodman, D. Rabideau and M. Sobhian	161

Characterization of Cavitation in Ultrasonic or Megasonic Irradiated Gas Saturated Solutions Using a Hydrophone

M. Zhao, R. Balachandran, P.R. Madigappu, P. Yam, C. Zanelli, R. Sierra and M. Keswani

165

Detection of HO₂•/O₂• Radicals Formed in Aqueous Solutions Irradiated with Megasonic Waves Using a Cavitation Threshold (CT) Cell Set-Up

Z.X. Han, B. Wu, I. Brown, M. Beck and S. Raghavan

170

Chapter 6: Photo Resist Performance and Rework

Photo Lithography - Surface Preparation Interactions

P. Garnier

177

Study of Etchants' Diffusion into a 248 nm Deep UV Photoresist during a Wet Etch

M. Foucaud, N. Rochat, P. Garnier, E. Pargon and R. Tiron

183

Megasonic Enhanced Photoresist Strip with DiO₃

D. Dussault, J. Fittkau and C. Gottschalk

187

Chapter 7: Cleaning for BEOL Interconnect Applications

Wetting Behavior of Plasma Etch Residue Removal Solutions on Plasma Damaged and Repaired Porous ULK Dielectrics

N. Ahner, S. Zimmermann, N. Köhler, S. Krüger and S.E. Schulz

193

Effect of Downstream Plasma Treatment on Dissolution of Fluorocarbon Polymer in Organic Solvents

Q.T. Le, E. Kesters, J. Devonport, F. Holsteeyns and S. De Gendt

197

Post Etch Residue Removal and Material Compatibility in BEOL Using Formulated Chemistries

E. Kesters, Q.T. Le, D. Yu, M. Shen, S. Braun, A. Klipp and F. Holsteeyns

201

Characterization of Cu-BTA Organic Complexes on Cu during Cu CMP and Post Cu Cleaning

B.J. Cho, J.G. Park, S. Shima and S. Hamada

205

TiN Hard Mask Cleans with SC1 Solutions, for 64nm Pitch BEOL Patterning

L. Brousseau, D. Krejcirova, K. Courouble, S. Zoll, A. Iwasaki, H. Ishikawa, F. Buisine, A. Lamaury and D. Fuard

209

Industrial Challenges of TiN Hard Mask Wet Removal Process for 14nm Technology Node

A. Iwasaki, K. Courouble, S. Lippy, F. Buisine, H. Ishikawa, E. Cooper, E. Kennedy, S. Zoll and L. Brousseau

213

TiN Metal Hardmask Residue Removal Formulation Development for Advanced Porous Low-K and Cu Interconnect Application

H. Cui

217

Prevention of Unexpected Oxidation of Metal Layer by Removing Hydrogen Peroxide from Ultrapure Water and Diluted Hydrofluoric Acid

D. Yaon, M. Murayama, H. Kobayashi and K. Yamanaka

221

Cost-of-Ownership Comparison of Single-Wafer Processes for Stripping Copper Pillar Bump Photomasks

H.S. Sohn, T.K. Hua, D. Liang, S.L.H. Jang, L.W. Leng, H.M. Lin and J. Tracy

225

Chapter 8: Cleaning for 3D Applications

The Role of Mass Transfer in Removal of Cross-Linked Sacrificial Layers in 3DI Applications

M. Sobhian, D.L. Goodman, D. Rabideau and A. Keigler

233

Scaling the 3D Bumps Pitch from 20 to 10 µm, Focusing on the Wet Cu Seed Etch Process Development

S. Suhard, A. Moussa, J. Slakkeboorn, F. Beirnaert, I. de Preter and F. Holsteeyns

237

Adhesion Improvement through Plasma Surface Treatments on Palladium Surface

I. Venegoni, M. Consonni, I. Bianchi, E. Ravizza, S. Grasso, S. Spadoni, M. Pistoni and P. Colpani

241

Chapter 9: Contamination Control and AMC

Control of HF Volatile Contamination in FOUP Environment by Advanced Polymers and Clean Gas Purge	
P. González-Aguirre, H. Fontaine, C. Beitia, J. Ohlsen and J. Lundgren	247
FOUP Material Influence on HF Contamination during Queue-Time	
J. Bounouar, T.Q. Nguyen, O. Le-Barillec, A. Favre, E. Veran, I. Stassen and A. Gettel	251
Effect of FOUP Atmosphere Control on Process Wafer Integrity in Sub20 nm Device Fabrication	
B.H. Kim and J.G. Park	256
Correlation of Cleaning Conditions and Wafer Out-Gassing	
S.H. Han, T.H. Hwang, S.C. Kim, S.H. Park and B.S. Ryu	260
Quantitative Analysis of Transition Metals Penetrating Silicon Substrate through SiN Film by Dopant Ion Implantation and Annealing	
K. Saga, S. Kobayashi and K. Sueoka	265
Collection Efficiency of Noble Metallic Contaminants on Si Wafers with HF-Aqua Regia Mixtures for VPD-DC ICPMS Analysis	
M. Devita, H. Fontaine, N. Drogue, D. Mathiot, V. Enyedi and T. Lardin	268
Backside and Bevel Contamination Removal	
P. Besson, M.C. Roure, R. Kachtouli, M. Jourdan, L. Gabelle, A. Royer and V. Loup	272
Focus Spot Reduction by Brush Scrubber Cleaning	
A. Pacco, E. Kesters, I. Simms, K. Nafus, J. Vandereyken and H. Yonekawa	276
Upside-Down Residual Sessile Droplet: Watermarks on Wafers Backside	
N. Belmiloud, E. Schaffert, R. Steininger, K. Okamoto, M. Grothe and G. Koerner	280
Nuclear Magnetic Resonance Spectroscopy of Trace Organic Impurities Extracted from a Corrosion Inhibitor and a Semiaqueous Residue Remover	
G. Westwood	284

Chapter 10: Cleaning and Wet Etching for Semiconductor Photo-Voltaic Cells

Improvement of Silicon Solar Cell Substrates by Wet-Chemical Oxidation Studied by Surface Photovoltage Measurements	
H. Angermann, A. Laades, J. Kegel, C. Klimm and B. Stegemann	291
Simplified Cleaning for a-Si:H Passivation of Wafers Bonded to Glass	
S.N. Granata, T. Beard, I. Gordon, Y. Abdulraheem, R. Mertens and J. Poortmans	297
Investigation of Silicon Saw Damage Removal and Surface Texturing Using KOH for next Generation Silicon Solar Cells	
M. Haslinger, J. Rip, S. Robert, M. Claes, F. Duerinckx, M. Debucquoy, P.W. Mertens, J. John, D. Pysch, S. Queisser, J. Schreckendiek and A. Hajjiad	300
Impact of Fe and Cu Surface Contamination on High Efficiency Solar Cell Processes	
F. Buchholz and E. Wefringhaus	305
Ozone Base Cleaning: Impact on High Efficiency Interdigitated Back Contact Solar Cells	
B.J. O'Sullivan, M. Haslinger, S. Singh, T. Beard, M. Debucquoy and J. Szlufcik	312
Rapid Determination of Organic Contaminations on Wafer Surfaces	
S. Meyer, S. Timmel and C. Hagendorf	317
Surface Cleaning and Passivation of Chalcogenide Thin Films Using S(NH₄)₂ Chemical Treatment	
M. Buffiere, A.A. El Mel, N. Lenaers, G. Brammertz, A.E. Zaghi, M. Meuris and J. Poortmans	320
