Preface

Committees

Technology of Ultra-High Strength / High Performance Concrete Applied to Guangzhou Xita Tower Construction H.W. Ye	1
--	---

I. Preparation of Ultra High Performance Concrete

Technical Features and Countermeasures of High Strength and High Performance Concrete N.Q. Feng and H.W. Ye	7
Improvement of Concrete Durability by Composite Cement N.Q. Feng, Q.L. Niu and C.Z. Li	14
Study on Durability of C100 Concrete in Shenyang Royal WAN XIN Hotel D.L. Zhang, Y. Wang and C.H. Chen	19
Experimental Research of High Performance Concrete with Multi-Elements Mineral Admixtures K.L. Li, X.S. Tang, G.H. Huang and H. Xu	24
Research on Technology and Mechanism of Grouting by Using High-Moisture Quick-Concreting Material J.B. Bai, X.Y. Wang, H. Wang and C.J. Hou	30
Mix Proportion Optimization and Shrinking of New Developed Reactive Powder Concrete H.J. Ba, A.L. Guo and Y.Z. Yan	37
The Study of Mixing for Underground High Performance Concrete in Coastal Environment F. Xing, Z. Huang, B.Q. Dong, H. Yin, J. Liu and M. Zhang	44
Research on High Performance Concrete Used in Concrete-Filled Steel Tube Column Structure Experiments for Guangzhou Xita Project Y.B. Yang, S. Liang, H.H. Mo, Y.W. Chen, J.S. Chen and L.Z. Ba	50
Tensile Properties of Low Shrinkage Engineered Cementitious Composite J. Zhang and C.X. Gong	55
Study on Low-Cost Reactive Powder Concrete and its Application M. Zhang, F. Xing, L.P. Deng, Z.L. Cao and Z. Huang	62
Ultra High Performance Cementitious Hybrid and Flexural Analysis of the UHPCC-NC Hybrid Structure with Full Shear Connection X.G. Wu and S.L. Xu	69

II. Workability of Concrete

Advances in Research on Correlation of Workability and Rheology of Fresh Concrete: A Review G.F. Peng, Z.Q. Guo, P. Stroeve, R. Gao and G.H. Huang	77
Advances in Research on Influence of Raw Materials on Workability of Fresh Concrete: A Review G.F. Peng, Z.Q. Guo, P. Stroeve, R. Gao and J.F. Zhang	83
Experimental Study on Vacuum-Assisted Pumping Technique of Steel Tube-Confined Concrete S.G. Hu, Y.Z. Peng, Q.J. Ding and S.D. Luo	89

Rheological Properties of Fresh Cement Paste and its Relation to Adsorption Behavior of Superplasticizer	
D. Lin, M.M. Fang, X.L. Xi, H.C. Wang, S.H. Yin and Z.Y. Wen	96
Research Progress of Workability Theoretical Research and Simulation Computation of Pumping Concrete	
J.S. Chen, H.H. Mo, H. Cao, T.J. Liu, S. Liang, Y.B. Yang and L.Z. Ba	103
Progress in Study of Concrete Pumping Construction Techniques in Super High-Rise Building	
L.Z. Ba, Y.B. Yang, S. Liang, H.H. Mo, H. Cao, T.J. Liu and J.S. Chen	110
Preparation and Application of High-Rise Building for Pumping Lightweight Aggregate Concrete	
J. Wang, Y.X. Gao, G.F. Hu, J.G. Zhou, W. Yang and H.C. Zhang	117
The Properties of Fresh Cement Paste with Self-Combustible Gangue Powder	
Q.H. Rao and X. Ma	122

III. Chemical Admixtures

Research on Adaptability of Slag-Based Geopolymer with Superplasticizer	
Q. Wang, L. Li, C.P. Wu and Z.T. Sui	129
Synthesis and Property of New Poly-Acrylic Superplasticizer	
H.W. Zheng, Z. Wang, J.S. Qian and C.L. Shi	135
Influence of Mineral Admixtures on Dispersion of Poly Carboxylate Superplasticizers with Different Characteristics	
D.M. Wang, Y.F. Zuo and W.F. Xiong	142
The Research on Composition Design and Hardening Accelerating Effect of Na⁺ & K⁺ Ions-Free Concrete Hardening Accelerator	
Z.G. Gao, B.W. Yao, Y.F. Han and H.L. Qian	149
Influence of Superplasticizer Dosage on Rheological Properties of Fresh Cement Pastes and Properties of Hardened Cement Pastes	
D. Lin, Y.Q. Lin, S.H. Yin and Z.Y. Wen	155
Effect of Adding Electrolyte in Cement Paste on the Dispersing Force of Polycarboxylate-Type Superplasticizer	
J.Y. Lai, X.Q. Qian, S.L. Zhan and M.H. Fang	160
Influence of Superplasticizer and Shrinkage-Reducing Admixtures on Early Age Shrinkage of Concrete	
X.Q. Qian, S.L. Zhan and Y.T. Zhu	166
Performance of a Slow-Release Type Carboxylic Polymer and its Application	
C.Z. Li, Q.L. Niu, G.M. He and N.Q. Feng	174

IV. Mineral Admixtures and Raw Aggregate

Characteristics of Zeolite Plasticizer	
N.Q. Feng, Y.X. Shi and Q.L. Niu	183
Research on Some Properties of Fly Ash Concrete with Nano-CaCO₃ Middle Slurry	
K.L. Qian, T. Meng, X.Q. Qian and S.L. Zhan	186
Research on Performance of Cement with Kiln Dust-Activated Coal Gangue	
C.M. Wang, J. Wang and L.R. Yang	191
Influence of Lightweight Aggregate on Durability of High Performance Concrete	
B.S. Zhang, L.J. Kong and Y. Ge	197
C60 High Performance Concrete Prepared from Manufactured Sand with a High Content of Microfines	
B.X. Li, J.L. Wang and M.K. Zhou	204
Internal Curing of Saturated Lightweight Aggregate in High Performance Combined Concrete	
J. Zha, B.X. Li, J.H. Li, H. Gao and G. Cui	212
Effects of Fly Ash and Ground Granulated Blast-Furnaces Slag on Properties of High-Strength Concrete	
J.L. Wang, K.M. Niu, Z.F. Yang, M.K. Zhou, L.Q. Sun and G.J. Ke	219

Study on the Influence of Admixture on Chemical Shrinkage of Cement Based Materials K.T. Xiao, H.Q. Yang and Y. Dong	226
Review on Selecting Raw Materials of Crack-Resistant Concrete S.H. Zhou, Y.C. Wang and H.Q. Yang	234
Early-Age Heat Evolution and Pore Structure of Portland Cement Blended with Blast Furnace Slag, Fly Ash or Limestone Powder J. Zhou, G. Ye and K. van Breugel	242

V. Durability of Concrete

Experimental Studies on the Volume Change of the Super High Strength and High Performance Concrete F. Xing, H. Yin and C. Wang	249
Research on the Volume Stability of Ternary Cementitious Systems Incorporating Fly Ash and Slag Powder H.Q. Yang, S.H. Zhou and Y. Dong	256
Effects of Limestone Powder in Manufactured Fine Aggregate on Early Hydration Process and Types of Cement Hydrates J.W. Cai, S.B. Zhang, M.K. Zhou and B.X. Li	262
Hydration and Expansion Properties of Novel Concrete Expansive Agent P.W. Gao, F. Geng and X.L. Lu	267
Evaluation of Concrete Permeability by Monitoring Alkali Saturated Conductivity of Concrete Incorporating Mineral Admixtures Q.L. Niu and N.Q. Feng	272
Effect of Different Mineral Admixtures on Sulfate Attack to Mortars Q.L. Niu and N.Q. Feng	278
Effect of Aggregate Volume Fraction on the Charge Passed of Mortar and Concrete Q.L. Niu and C.Z. Li	283
Investigation of the Ability of Alkali Binding by C-S-H and C-A-S-H Gels L.R. Yang, X.X. Feng, C.M. Wang and J.W. Cai	289
Technology of Chloride-Resistant High Performance Concrete W. Chen, H.H. Mo, Y.B. Yang, S. Liang, Y.W. Chen, L.Z. Ba, J.S. Chen and W.Y. Guo	296
Relation of Permeability by High Hydraulic Method and Chloride Ion Diffusion Coefficient of Concrete Y. Ge, J. Fan, J. Yuan, W.C. Yang, B.S. Zhang and J.S. Yu	303
Assessment of Concrete Permeability by a Nondestructive Method T.Y. Hao and Z.G. Wu	309
Deterioration of Concrete Freezing-Thawing in Different Salts Solution Y. Ge, W.C. Yang, J. Yuan, B.S. Zhang and A.L. Xiong	315
Simulation Analysis Procedures on the Damage by Fire to High-Performance Concrete J. Zhao, G.F. Peng, Z.Q. Guo and X.W. Chen	322
Influence of Polypropylene Fiber and Silica Fume on the Chloride Penetration of High Performance Concrete with Fly Ash J. Liu, D.H. Deng, M. Yin and X.L. Hu	329

VI. Mechanical Properties and Others

Experimental Study on Flexural Performance of Corroded RC Beams Strengthened with AFRP Sheets Z.C. Deng, J.H. Li and H.F. Lin	343
Effect of Hydration of Unreacted Cement in Hardened Mortar with Low W/C on the Long-Term Strength X.X. Feng, X.H. Sun, X.Y. Wang and Q.M. Wei	350
Research on the Strengthening Effect of Phosphorus Slag Powder on Cement-Based Materials D.M. Liu, K.H. Fang and H.S. Yang	356

Study and Application of Salt-Scaling Resistant Admixture in Concrete Y. Wang, D.L. Zhang and C.H. Chen	361
Cracking Appraisal and Anti-Crack Measures Research of Cross Sea Bridge Concrete J.Y. Sun, H.Q. Jiang and S.F. Sui	367
Experimental Study on the Characteristics of GGBS Concrete Bending Specimens J.W. Xia and H.F. Chang	373
Effect of Inorganic Salts on Pore Structure of Cement Paste W.C. Yang, Y. Ge, J. Yuan and B.S. Zhang	378
Fractal Theory Used in Pore Structure of Cement-Based Materials Incorporated Phosphorus Slag Y. Shi, J.Z. Li and D.M. Liu	384
Design on the Concrete Structure Durability of the Relocation of Shougang and the Steel Project Construction of Caofeidian H. Ding	390
Research on Creep Performance of C60 High Performance Concrete J. Yin, Y.J. Li, K.R. Zheng, S.D. Luo, A.G. Yan and Z.B. Liu	400
Behavior of Densified Normal Strength Concrete under Elevated Temperature B.M. Zhao, G.F. Peng and T.Y. Hao	405
Lessons Learned from Wenchuan Earthquake: Building Materials B.M. Zhao and J. Chen	409
