

Table of Contents

Preface

Committees

Particle Flow Simulation on the Influences of Property Parameters of Semi-Fixed Abrasive Plate on its 'Trap' Effect

J.L. Yuan, Z.W. Wang, M. Qian and D.Q. Yu 1

Dynamic Numerical Simulation of Mould Free-Form Curved Surface Gasbag Polishing

S.M. Ji, L. Zhang, M.S. Jin, Q.L. Yuan and Y.Q. Shen 6

3D Finite Element Simulation of Hard Turning

C.X. Yue, X.L. Liu, D.K. Jia, S.Y. Ji and Y.S. Zhai 11

Study on the Optimization of Deposition Processing Technology of Diamond Coated Tools

Y.P. Ma, M. Chen and F.H. Sun 16

Study on the White Layer of Hard Turned GCr15 Bearing Steel

D.H. Wen, X.L. Liu and T. Hong 20

Surface Modification of Diamond to Improve Machining Properties of Ultraviolet-Curing Wire Saw

W. Peng, F.Q. Liu and C.Y. Yao 24

Laser and Water-Jet Fiber Coupling Technology for Water-Jet Guided Laser Micromachining

Y. Wang, L.J. Yang, J. Tang, L. Li and Y.B. Chen 29

Research of the Virtual Prototyping and Simulating on Ultra-Precision Double-Sided Planar Polishing Machine

Y.W. Zhao, J.F. Du, S.W. Wen and Y.K. Gui 34

Research on the 3-Axis CNC Ultra-Precision Grinding of Aspheric Mould

L.J. Li, F.H. Zhang and S. Dong 39

Research on Dynamic Optimization and Simulation of Camshaft Grinding Process

Z.H. Deng, J. Wang, D.F. Cao, W. Liu and L.L. Wang 44

Nano-Precision Synergistic Finishing Process Integrated ELID-Grinding and MRF

S.H. Yin, H. Ohmori, W.M. Lin, Y. Uehara, F.J. Chen, Y.F. Fan and Y.J. Zhu 49

Research on Technics of Laser Direct Metal Deposition Forming Technology

W. Zhang and J.H. Yao 54

Cutting Forces and Vibration of Pockets Corner by High Speed Milling

C.Y. Wang, D.W. Tang, Z. Qin, Z.G. Chen, Y.N. Hu and Y.X. Song 59

Study on the Ceramic Grinding Crack Propagation Mechanism under the Ultrasonic Action by Using Nonlocal Theory

B. Zhao, H. Ma and P. Xie 64

Influence of Supporting Characteristics on Sphericity of Ceramic Balls in Rotated Dual-Plates Lapping Process

B.H. Lv, J.L. Yuan, F. Cheng and F. Yang 69

Development and Experimental Study of Multi-Axis Micro-EDM Machine Tool for Small-Hole Based on Linear Motor

Z.L. Wang, M.S. Li, G.X. Chi, Y.K. Wang and W.S. Zhao 74

Microelectrode Array Fabrication by Micro-WEDM

Y.K. Wang, Z.L. Wang, M.S. Li, W.L. Zeng and M.H. Weng 79

Effect of Free Abrasive Particle in Gasbag Polishing Technique

M.S. Jin, S.M. Ji, L. Zhang, X. Zhang and Y.Q. Shen 83

Improvement of Diamond-Cutting Surface by Means of Porous Bearing Laminar Flow

D.X. He, B.H. Sheng, Z.D. Zhou, Q. Suo, Y.F. Li and C.Y. Liu 88

Narrow Beam Machining on Micro-WEDM

X.Y. Chu, S.C. Di, D.B. Wei, Z.L. Wang and Y.H. Dong 93

An Effect Contrast for Chemical Mechanical Polishing with Mechanical Polishing for Tungsten Steel

K.H. Zhang and D.H. Wen 98

Study on the Mechanical Properties of Sapphire by Numerical Simulation and Nanoindentation Technology K.H. Zhang, D.H. Wen, T. Hong and J.L. Yuan	103
Examination to Machining Characteristics of Semi-Fixed Abrasive Plate during the Lapping Process Q.F. Deng, D.H. Wen, J.L. Yuan and F. Chen	108
Investigation to Semi-Fixed Abrasives Plate Lapping SUS440 Stainless Steel Q.F. Deng, D.H. Wen, F. Chen, L. Tao and J.L. Yuan	113
Laser Micromachining of Wide Bandgap Materials Y.T. Dai, G. Xu and W.L. Li	118
Application of High Aspect Ratio Scanning Probe in Microstructure Measurement M.M. Fu, K.K. Guo, Y. Chen, Y.H. Yang and B.F. Ju	123
Research on Prediction Model of Surface Roughness in Ultrasonic Polishing Nano-ZrO₂ Ceramics M.L. Zhao, B. Zhao, Y.Q. Wang and G.F. Gao	128
Development of Elliptical Vibration Cutting Technology and its Application to Ultraprecision/Micro Machining of Hard/Brittle Materials E. Shamoto and N. Suzuki	133
3D Profile Measurement of Nanometer Cutting Edges of Single-Point Diamond Tools for Ultra-Precision Machining Y. Arai, T. Asai, S. Ferdous and W. Gao	138
A New Internal Magnetic Field Assisted Machining Process Using a Magnetic Machining Jig-Machining Characteristics of Inside Finishing of a SUS304 Stainless Steel Tube Y.H. Zou and T. Shinmura	143
Effect of Electrorheological Fluid Assistance on Micro Ultrasonic Machining T. Tateishi, K. Shimada, N. Yoshihara, J.W. Yan and T. Kuriyagawa	148
Preparation of MoS₂/Zr Coated High Speed Steel Tool and its Cutting Performance J.L. Zhao, J.X. Deng and P. Yan	153
Material Removal Mechanism in Vibration-Assisted Finishing Y. Wang, S.H. Yin and T. Shinmura	158
Predicted Rake Face Wear of PCBN Cutting Tools in High-Speed Precision Hard Cutting Y. Wang, Y.S. Zhai, F.G. Yan and X.L. Liu	163
Cutting Force Modeling in Precision Turning 3J33 Alloy for Tool with Nose Radius Y.S. Zhai, Y. Wang and Y.C. Liang	167
Numerical Simulation on Grinding of Advanced Ceramics Y.M. Bao, G.Z. Chai and S.T. Gu	172
Experimental Research of Micro Reversible Electrical Discharge Machining Z.L. Peng, Z.L. Wang, Y.H. Dong and H. Chen	177
Masked and Unmasked Machining of Glass by Micro Abrasive Jet Y.F. Qiu, C.Y. Wang, J. Wang and Y.X. Song	182
Research on Material Removal Characteristics of Nanoparticle Colloid Jet Machining Y. Zhang, X.Z. Song and F.H. Zhang	187
A Survey of the Machining Characteristics and Mechanical Polishing Technology of CVD Diamond Films L. Zhang, D.H. Wen, S.M. Ji, Q.L. Yuan and Z.H. Xu	192
Mould Machining of Structural Surface Based on Liquid-Solid Two Phase Abrasive Flow S.M. Ji, B. Gong, Q.L. Yuan, Y. Pan and L. Zhang	198
Modeling the Minimum Chip Thickness in Orthogonal Micro-Cutting Based on Plastic Strain Gradient J.H. Wu and Z.Q. Liu	203
Investigation of Material Removal and Grain Wear Mechanism in Single Point Diamond Scratching Tests on SiC Q.L. Zhao and J.Y. Chen	209
Experimental Study on Parameter Optimization of Silicon Wafer CMP Using Composite Abrasives Slurry X.F. Xu, H.T. Ma, B.X. Ma and W. Peng	214
Electrochemical Micro Machining of Stainless Steel with Voltage Pulses H. Chen, Z.L. Wang, Z.L. Peng, Y.H. Dong and W.S. Zhao	219

Study on Semi-Fixed Abrasive Lapping of Ultra-Thin Silver Electrode Layer X. Lv and J.L. Yuan	225
Fabrication of Micro-Structures by Micro-ECM M.H. Wang, Q.F. Zhang, C.Y. Yao and W. Peng	229
Study of Good Yield and Efficiency in TFT-LCD Module Process Z.L. Chen, C.Y. Wang and Z.Q. Tang	234
Test Research on Grinding Performance of the New Grinding Fluid in Power Ultrasonic Honing X.J. Zhu, Z.M. Lu, X.D. Sun and H. Gao	238
Experimental Research on UV Laser and High-Pressure Water-Assisted YAG Laser Dicing SiC Wafer L.J. Yang, H. Huang, N. Cai, Y. Wang and J. Tang	243
Cathode Design of Aero-Engine Blades in Electrochemical Machining Based on Characteristics of Gap Distribution J. Hua and Z.Y. Li	248
Observation in the Surface Roughness of Silicon Wafer during Semi-Fixed Abrasive Machining with Large Grains P. Zhao, J.J. Chen, F. Yang, K.F. Tang, J.L. Yuan and X.H. He	253
Optimization Design of Electrical and Magnetic Characteristics of an Ultra-Precision Machine Tool Motorized Spindle L. Lv, W.L. Xiong and J.L. Yuan	258
Simulation and Analysis of Planetary Precise Ball Lapping Mode W. Hang, Y. Dai, Z.Q. Li and J.F. Feng	265
A Method of Parameters Estimation of Water-Lubricated Hybrid Journal Bearings for Ultra-Precision Machine Tool Spindle X.B. Yang, W.L. Xiong, Z.Q. Hou and J.L. Yuan	270
Processing of WC-Co Cemented Carbide Balls by Rotated Dual-Plates Lapping Machine D.S. Chen, F. Yang, K.F. Tang, J.J. Chen, J.L. Yuan and X.H. He	277
Study on the Finishing Process for the Aluminum Nitride Substrates Z.Z. Zhou, J.L. Yuan and B.H. Lv	282
Lapping of WC-Co Cemented Carbide Ball by Eccentric Dual-Rotating V-Groove Lapping Mode J.L. Yuan, K.F. Tang, Z.W. Wang, B.H. Lv and X.H. He	287
On the Characteristic Parameters of the Semi-Fixed Abrasive Plate P. Zhao, K.F. Tang, Z.W. Wang, J.J. Chen, J.L. Yuan and X.H. He	291
Simulation of Temperature Field of Oil Film in Super-High Speed Hybrid Journal Bearing Based on FLUENT S.C. Xiu, P.B. Xiu and S.Q. Gao	296
Cutting Force Empirical Model of High-Speed Precision Hard Cutting GCr15 J.S. Hu, Y.S. Zhai, F.G. Yan, Y.F. Li and X.L. Liu	301
2D FEM Estimate of Tool Wear in Hard Cutting Operation: Tool Wear and Simulation of Hard Cutting Process under Steady State F.G. Yan, C.X. Yue, X.L. Liu, Y.F. Li and S.Y. Ji	306
Polishing Robot: Status and Outlook Y.H. Wan and G. Wang	311
2D FEM Estimate of Tool Wear in Hard Cutting Operation: Extractive of Interrelated Parameters and Tool Wear Simulation Result C.X. Yue, X.L. Liu, H.M. Pen, J.S. Hu and X.F. Zhao	316
The Slurry for Glass Polishing by Micro Abrasive Suspension Jets Y.P. Liao, C.Y. Wang, Y.N. Hu and Y.X. Song	322
The Diamond Wire Saw with a Nonmetallic Core C.Y. Yao, W. Peng, M.H. Wang and F.Q. Liu	328
Numerical Simulation on the Temperature Field of Water-Jet Guided Laser Micromachining L.J. Yang, M.L. Wang, Y. Wang, J. Tang and Y.B. Chen	333
The Design of Powder Feeding System for Laser Remanufacturing X.D. Hu, Y. Zhang, J.H. Yao and Z.J. Chen	338
Research on Modeling of Cutting Wire Deflection of Multi-Wire Saw R. Tang, Y.X. Dai, Y.B. Zhang, J.L. Yuan and W.L. Xiong	343

Research on On-Line Control Strategy for the Wearing Compensation of Polishing Wheel H.X. Yu, H. Xu and J.L. Yuan	348
Analytical and Experimental Investigation of the Nickel Based Superalloy Using Cryogenic Cooling Grinding C.H. Li, Y.C. Ding, B.H. Lu and G.Q. Cai	354
Research Progress of Advanced Machining Technologies for Engineering Ceramics X.L. Tian, J.F. Yang, C. Liu and B.G. Zhang	359
Optimization of Ti-6Al-4V Flank Milling Parameters Using Taguchi Method C.Y. Liu, J.J. Yi, W.H. Zhou and C.L. Chu	364
Study on an Open CNC System of 3-Axis Micro Milling Machine Tool L. Huang, N. He and L. Li	369
Experimental Study in HSM of Hardened Steel AISI D2 B.Y. Qi, N. He and L. Li	374
A Compound Vibratory Mode in High Speed Vibratory Tapping L. Wang, G.C. Wang, J.H. Zhu, H.J. Pei and L.F. Lin	379
Influences of End Surface Angle of Workpiece on Burr Formation in High Speed Machining Q.X. Shen, G.C. Wang, H.J. Qu and Y.M. Zhu	384
Heat Conduction Analysis of Coated Cutting Tools with Temperature-Dependent Properties S.J. Zhang and Z.Q. Liu	389
Effect of Helix Angle and Normal Rake Angle on Stability in End Milling A.J. Tang and Z.Q. Liu	394
Damage Analysis of Cemented Carbide Tool in High Speed Milling Induced by Thermal Stress with Laser Shock Y. Wan, Z.Q. Liu, J.Y. Pang and X.F. Zhao	399
Correlation between Cutting Forces and Tool Wear in High Speed Milling of Graphite L. Zhou, C.Y. Wang, X.J. Wang and Z. Qin	403
Determination of Minimum Uncut Chip Thickness in Micromachining Z.Y. Shi and Z.Q. Liu	408
Study on Cutting Forces in High-Speed Milling of LF21 Aluminum Alloy and Regression Model of Cutting Forces Z.H. Wang, J.T. Yuan, X.Q. Hu and X.W. Xiong	413
Cutting Forces in High Speed Milling of Hardened Steel by Coated Tool L.D. Wu, C.Y. Wang, D.H. Yu and Y.X. Song	418
TiAlSiN Coatings Prepared by Hybrid PVD Technology for High Speed Milling of Hardened Steel D.H. Yu, C.Y. Wang, X.L. Cheng and Y.X. Song	423
Stability Prediction during Thin-Walled Workpiece High-Speed Milling Q.H. Song, Y. Wan, S.Q. Yu, X. Ai and J.Y. Pang	428
Study on 5-Axis Machining Key Technology of High-Precision Aluminum Alloy Integral Impeller X.J. Wang, S.L. Li and C. Zhao	433
Process Parameters Selection in NC Camshaft Grinding Based on Uniform Design and GA-NN Z.H. Deng, X.H. Zhang, W. Liu, D.F. Cao and H. Cao	437
Study on Parameters Optimization in Ultra-Precise Processing of Germanium Substrate X. Lv, J.L. Yuan, Y.Y. Wang and Q.F. Deng	442
Research on the Adaptive Machining Technology of Blistk D.H. Zhang, Y. Zhang and B.H. Wu	446
Experimental Study on High Speed Machining of a Titanium Alloy G.S. Geng and J.H. Xu	451
Structural Design Method of High Speed Face Milling Cutter Based on Theory of Axiomatic Design B. Jiang, M.L. Zheng, W.C. Xu and L. Jiang	456
Real-Time NURBS Interpolator with an Optimal Feed for High-Speed Machining J.C. Feng, Y.H. Wang, M. Chen and J.S. Wang	461

High Speed Machining of AISI 52100 Steel Y.J. Liu, J.B. Huang, M.Y. Qin, W. Xia and Y. Tang	466
Surface Topography and Roughness Simulations for 5-Axis Ball-End Milling S.G. Han, J. Zhao and X.F. Zhang	471
Numerical Simulation of Adiabatic Shear Behavior in High-Speed Machining of Hardened Steel GCr15 T. Chen, X.L. Liu, G.T. Luo, F.G. Yan and D.K. Jia	476
An Investigation of Heat Dissipation in High Speed Machining Y.M. Quan, J.A. Arsecularatne and L.C. Zhang	480
Machinability and Tool Wear Behavior in Turning High Nickel-Base Alloy-G3 M. Luo, L.Q. Zhang and M. Chen	485
Optimization of Surface Roughness by Uniform Design of Experiments in Milling of 1Cr18Ni9Ti H.Z. Zhang, Q.L. An, Y.S. Zhang, G. Liu and M. Chen	490
Machinability Evaluation of TC11 Titanium Alloy in Finish Hard Turning Based on the Response Surface Methodology M. Liu, W.W. Ming, Y.S. Zhang, H. Xu and M. Chen	495
Study on the Surface Topography and Residual Stress for Dry Turning of GH80A X.D. Guo, Q.L. An, B. Zou and M. Chen	500
Study on the Residual Stress Induced by Dry Turning of Buttress Thread X.Y. Wang, Q.L. An, Y.S. Zhang, H. Xu and M. Chen	505
Study on the Machinability of Two Different Sulfur Free Cutting Steels G.L. Zhang, Q.L. An, Y.S. Zhang, G. Liu and M. Chen	510
Development of Multilayer Composition Thin Film Thermocouple Cutting Temperature Sensor Based on Magnetron Sputtering Y.X. Cui, B.Y. Sun, W.Y. Ding and F.D. Sun	515
Design of Integration Tool-Holder System for Ultrasonic Vibration Machining Using Contactless Inductive Power Transfer J. Pi and X.P. Xu	520
Optimization of Plastic Injection Molding Process Parameters for Thin-Wall Plastics Injection Molding J. Jin, H.Y. Yu and S. Lv	525
Design and Fabrication of the Micro Turbine for Micro Gas Turbine Engine Y.H. Dong, Z.L. Wang, Z.L. Peng, H. Chen and W.S. Zhao	530
Study on Module Encoding Method Oriented Product Configuration Design C.D. Lu, X.H. Chen, S.F. Jiang and G.Z. Chai	535
An Improved Strategy of Automatic Triangular Mesh Generation over 3D Surface H. Jia, Y.H. Wang and Y.L. Lu	540
Error-Prone Business Process Study in Small and Medium Enterprises C.D. Lu, Y. Zhang, S.F. Jiang and R. Xu	545
Research on Remotely Operable PC-Based CNC System via Network Z.H. Hu, J. Liu, H.L. Zhao and J.L. Yuan	550
The Multidimensional Manufacturing Resource Modeling and Integration of Multistage Manufacturing System Based on Meta-Model Y.K. Gui, Q.Y. Dong and S.L. Kan	555
Experimental and Numerical Modal Analysis of Gearbox Casing in a Polishing Machinery Y.Y. Wang, S.M. Ji, D.H. Wen and X. Zhang	560
Design and Fabrication of Silicon Condenser Microphone for Industrial Use J. Dong, W. Wang, S.M. Ji and L.B. Zhang	565
WEB-Based Process Planning System for Hydraulic Disk Brake S.F. Jiang and C.D. Lu	570
Torque Transmission Analysis and Design of a 3-DOF Spherical Parallel Manipulator Y.B. Li, S.M. Ji, Q.L. Yuan, L. Zhang and M.S. Jin	575
Static Analysis for a Novel 6-(P-2P-S) Parallel Robot D.F. Zhang and F. Gao	580
Analysis of Workspace and Rotation Ability for a Novel Humanoid Robot Elbow Joint B.Y. Cui and Z.L. Jin	585

Optimal Design of a Parallel Micromanipulator for Precision Machining Z.F. Wang, G. Wang, S.M. Ji and J.H. Sun	590
Free-Form Surface Reconstruction Based on Interpolate Subdivision C.Y. Jin, R. Lan and W.Y. Zhao	595
Modeling and Analysis of the Structure of Superpave Gyratory Compactor W. Jiang, X.G. Qiu, G.Z. Chai and J.X. Zhou	601
Common Platform Identification for Product Family on Extension Clustering Method W.L. Wang, F.G. Zhao, Y.W. Zhao, N. Su and F. Zhang	606
Double-Workshop Plan Model of Mixed Chlor-Alkali Production Process X.H. Dai, W.L. Wang, Y.W. Zhao and H.X. Teng	611
Extension Case-Based Reasoning for Product Configuration Design Y.W. Zhao, F. Zhang, M.Y. Zhang, J. Chen and N. Su	616
Optimal Design of the Compression Coil Spring in the Tool-in-Use System of the Jade Carving Machine Based on Dynamic Analysis H.R. Shi, R.Y. Rui and Y.F. Wen	621
Research of the Pressure Pulsation within Piston Chamber in Radial Piston Pump W. Jiang, X.G. Qiu, G.Z. Chai and J.X. Zhou	626
Magnesium Alloy Material Substitution Redesign Method for Wheels of Electric Bicycle B.S. Pan, H.L. Gong, T.H. Peng and M. Zhang	631
Design on 3D Complex Groove of Turning Inserts with MATLAB X.M. Feng, G.Y. Tan, G.H. Li and Y.H. Zhang	636
The Simulation Design of the Rotary Valve of Hydraulic Power Assisted Steering System Based on the VB Q.Z. Zhou	641
Review of Gas-Assisted Injection Molding Process S.F. Jiang and C.D. Lu	645
Dynamic Analysis and Simulation of Deployable Planar Truss Mechanism Y. Sun, G.K. Shi, J.H. Shan and M.F. Dong	649
Research of Quickly Dry Equipments about Chinese Herbal Medicine X.R. Nan	655
Multi-Motor Synchronization of Multi-Wire Saw Based on Model-Free Adaptive Control J. Jiang, Y.X. Dai, Y.B. Zhang, R. Tang and W.L. Xiong	660
A Tension Control Approach to the Multi-wire Saw Based on DSP S.Q. Peng, Y.X. Dai, Y.B. Zhang, J. Jiang and J.L. Yuan	665
A Fast Algebraic Grid Generation Algorithm Base on an Improved Kamaugh Map S.D. Xiu, S.J. Ji and Y. Wang	670
Customer Churn Analysis Model in Manufacturing Industry D.S. Liu and C.H. Ju	675
Calculating the Maximum Throughput in the Context of Workflow Execution Y. Xie	680
Study of Active Vibration Control for Flexible Beam's Vibration L. Zhang, S.M. Ji, Y. Xie and Q.L. Yuan	685
On Pneumatic Installation Technology of Modal Testing Suspension System J.H. Sun, Z.S. Gao, X.H. Shan, L. Zhang and Y.Y. Wang	690
An Extended CPM for Resource-Constrained Project Scheduling C.H. Ju and Y. Xie	695
Workflow Simulation Modeling Based on Discrete Event Approach Y.P. Miao	700
Research on the Apple Non-Destructive Selection Technology Based on the Fuzzy Arithmetic Y.L. Wang, S.M. Ji, L. Zhang, Y. Chen and Y. Zhang	705
