Preface and Committees

Chapter 1: Uncertainty in Mechanical Engineering

Statistical Consideration of Uncertainties in Bolted Joints of the Drive Train of Sheet-Fed Offset Printing Presses N. Norrick	3
Localized Discrete Modelling of Contact Interfaces to Predict the Dynamic Behaviour of Assembled Structures under Random Excitation A. Sharma, W. Mueller-Hirsch, S. Herold and T. Melz	13
Variability in Composite Materials Properties A. Vanaerschot, S. Lomov, D. Moens and D. Vandepitte	23
Fluid-Structure Interaction Simulation of an Aortic Phantom with Uncertain Young's Modulus Using the Polynomial Chaos Expansion J. Kratzke, M. Schick and V. Heuveline	34
Investigation of Uncertainty Sources of Piezoresistive Silicon Based Stress Sensor A. Palczynska, F. Schindler-Saefkow, P. Gromala, K. Kreyßig, S. Rzepka, D. Mayer and T. Melz	45

Chapter 2: Uncertainty of Structural Dynamic Improvements in Light Weight Design

Comparison of a New Passive and Active Technology for Vibration Reduction of a Vehicle under Uncertain Load P. Hedrich, F.J. Cloos, J. Würtenberger and P.F. Pelz	57
Model Verification and Validation of a Piezo-Elastic Support for Passive and Active Structural State Control of Beams with Circular Cross-Section B. Götz, M. Schaeffner, R. Platz and T. Melz	67
Opportunities and Limitations of Structural Intensity Calculation Regarding Uncertainties in the NVH Design of Complex Vehicle Body Structures T. Stoewer, J. Ebert and T. Melz	78

Chapter 3: Modular Design and Scaling for Reduced Uncertainties in the Design Process

Uncertainty in Product Modelling within the Development Process J. Würtenberger, S. Gramlich, T. Freund, J. Lotz, M. Zocholl and H. Kloberdanz	89
Uncertainty Scaling – Motivation, Method and Example Application to Aload Carrying Structure A. Vergé, J. Lotz, H. Kloberdanz and P.F. Pelz	99
An Approach to Using Elemental Interfaces to Assess Design Clarity T. Freund, J. Würtenberger, H. Kloberdanz and P. Blakaj	109

Chapter 4: Improved Product Quality by Online Monitoring and Closed-Loop Control of Manufacturing Processes

Orbital Forming of Flange Parts under Uncertainty S. Calmano, D. Hesse, F. Hoppe, P. Traidl, J. Sinz and P. Groche	121
Data-Based Support in the Development of Press Systems Using the Example of Sheet Metal Forming J. Sinz, D. Hesse, S. Öchsner and P. Groche	130
Proved Quality by Online Monitoring and Closed-Loop Control of Pin Insertion M. Erhardt, C. Kaschube and M. Menacher	140

Chapter 5: Uncertainty in High Precision Manufacturing Processes

Control of Uncertainty in High Precision Cutting Processes: Reaming of Valve Guides in a Cylinder Head of a Combustion Engine C. Bölling, S. Güth and E. Abele	153
Control of Uncertainty Based on Machining Strategies during Reaming S. Güth, A. Bretz, C. Bölling, A. Baron and E. Abele	162
Uncertainty of Additive Manufactured Ti-6Al-4V: Chemistry, Microstructure and Mechanical Properties D. Greitemeier, C. Dalle Donne, A. Schoberth, M. Jürgens, J. Eufinger and T. Melz	169

Chapter 6: Modelling Uncertainty Information by Means of Semantics

Representation of Human Behaviour for the Visualization in Assembly Design M. Zocholl, F. Heimrich, M. Oberle, J. Würtenberger, R. Bruder and R. Anderl	183
---	-----

Chapter 7: Uncertainty Quantification

Analysis of the Effect of Uncertain Clamping Stiffness on the Dynamical Behaviour of Structures Using Interval Field Methods M. Imholz, D. Vandepitte and D. Moens	195
Methodical Approaches to Describe and Evaluate Uncertainty in the Transmission Behavior of a Sensory Rod C.M. Melzer, M. Krech, L. Kristl, T. Freund, A. Kuttich, M. Zocholl, P. Groche, M. Kohler and R. Platz	205
Using Particle Filters to Analyse the Credibility in Model Predictions P.L. Green	218

Chapter 8: Optimization under Uncertainty

Robust Truss Topology Design with Beam Elements via Mixed Integer Nonlinear Semidefinite Programming T. Gally, C.M. Gehb, P. Kolvenbach, A. Kuttich, M.E. Pfetsch and S. Ulbrich	229
--	-----

Chapter 9: Binary Decisions under Uncertainty

Developing a Control Strategy for Booster Stations under Uncertain Load P. Pöttgen, T. Ederer, L.C. Altherr and P.F. Pelz	241
Multicriterial Optimization of Technical Systems Considering Multiple Load and Availability Scenarios L.C. Altherr, T. Ederer, P. Pöttgen, U. Lorenz and P.F. Pelz	247
