

Table of Contents

Preface, Committees and Sponsors

Chapter 1: Vehicle Engineering and Design

Reverse Optimization Algorithm of CVT's Energy Economy M. Zhou	3
Hybrid Mobile Power Supply Using PEMFC and Lithium Battery N.J. Song, W. Qi, J. Fang, W. Liu and D. Xiao	7
The Research and Design on the Electric Vehicles' Centrifugal Automatic Transmission Y. Fan	12
Design on a Collision Warning and Vehicle-Headlights Intelligent Switching System Y. Fan and R.K. Deng	16
Study on the Closed-Loop Control Strategy of Voltage for Pure Electric Vehicle in Limp Mode L. Chu, C. Guo, Y. Yang, Z.C. Fu and Y.J. Zhang	20
Performance Analysis of a Pure Electric Light Off-Road Vehicle Based on the Cruise J.J. Yang	24
FSAE Race Car Engine Options on the Impact of Vehicle Design H. Gong, Y.P. Li and J. Chao	28
Based on CATIA Car Side Welding Fixture Design and Research Z.H. Zhu and H. Cao	32

Chapter 2: Traffic and Transport Engineering, Vehicle and Road Safety

Effects of Traffic Calming Measures on Vehicle Speed Control and Road Safety Y.B. Jiang, L.H. Jiang and Y.Q. Qin	39
Violation Behavior Analysis of Pedestrian and Non-Motorized Vehicle P. Hao and Q.Y. Hao	43
The Study of Traffic Rules Based on Cellular Automata Traffic Wave Model W.B. Liu and Y.Q. Yang	47
The Overall Structure of IOV and the Research of the Unsolved Key Technology of IOV in Intelligent Transportation System F. Li, Y. Jian and R. Zhao	52
Vehicle Routing Problem Based on Heuristic Artificial Fish School Algorithm L. Qin, Y.Q. Li and K. Zhou	56
An Improved Cellular Automaton Model of Traffic Regulations and the Effect of Deceleration Probability L.C. Han	62
Smoke Management System Design for Airport Terminal L.B. Wang and S.P. Zhang	66

Chapter 3: Mechanical and Dynamical Principles and Design, Machinery and Manufacturing Engineering

Influence of Guide Vane Wrap Angle Key Design Parameters on Hydraulic Performance of Nuclear Reactor Coolant Pump W.N. Jin, R. Xie, M.T. Hao and X.F. Wang	73
Numerical Investigation on the Flow in Tip Clearance of the Last Three Stages of Industrial Steam Turbine Z.J. Sha, R. Xie, X.F. Wang, X.D. Ding and Y.F. Sui	78

A Simplified Model of Semi-Open Impeller Stage and Analysis of its Effects on the Transient Flow	82
M.T. Hao, R. Xie, L. Guan and Z.F. Lu	
Dynamic Analysis and Optimization of Pivot Points of Telescopic Jib Based on Genetic Algorithm	87
T. Liu, W.H. Wang, R.W. Yuan and F. Lu	
Development of Testing Machine for Measuring Unsteady State EHL Film under Heavy Load	91
N.M. Miao, J.N. Ding and J.C. Yang	
Finite Element Analysis of Z-Shaped Pipe in the Directly Buried Heat-Supply Pipeline with Large Diameter	96
M.Q. Li, F. Wang, G.W. Wang and Y.G. Lei	
Multiple Weibull Statistical Model of Random Censored Data of NC Machine Tools and Optimal Estimation of Parameters	100
T. Fu, D.Z. Wang and Q.Z. Gong	
Controllable of Underwater Towing Tension Passive Compensation Device Design Research	104
J. Meng, Z.X. Chen, T. Jiang and Z.Q. Xu	
Engineered-Based Machining Parameters Analysis for Aircraft Structural Parts	109
F. Zhu, X.F. Huang and L.J. Meng	
Parametric Design of Deep Groove Ball Bearing Based on Pro/Program and Family Table	113
N.M. Miao	
Parameter Study of Opposite Tape-Spring Flexure Hinge	118
H. Yang, R.Q. Liu, Y. Wang and J.G. Tao	
Research on the Methods for Common-Rail Pipe Holes Abrasive Flow Machining	122
L.F. Zhu, K. Wang, H. Wu, D. Xiu and L.Z. Sun	
Intermediate Slabs and Optimization in Forging Process of Balance Elbow by FEM	127
B.J. Xiong, K.L. Wang, J. Fang and Y. Huang	
Analysis of Hydroelectric Unit's Upper Bracket Based on Test and FEM	131
M.M. Xia and Y.G. Li	
The Optimization Method of Tailor Welded Blank Forming Process Based on Numerical Simulation	135
Y. Gan, J.X. Li, Y. Chen and H.Z. Li	
Research on Gear Mesh Misalignments under the System Deformation	140
X.H. Deng	
Applying Multi-Objective Particle Swarm Optimization to Maintenance Scheduling for CNC Machine Tools	144
Z.H. Yao and M. Zhou	
On the Axisymmetrical Dissemination of Glycerine Driven by Shock Wave	149
L. Yang, X.L. Yang and Z.W. Huang	
Static Stiffness Analysis of High Stiffness Rotary Hinge Locking Mechanism for SAR Antenna	153
Q. Cong, Y. Wang, C.F. Zhang, R.Q. Liu and J. Wang	
Research on the Variable Ratio Gear Modeling and Transmission Ratio Test Method of Rack and Pinion Variable Ratio Steering Gear	157
Z.R. Niu, G.Y. Li, S. Zeng, T.L. Yan, S.Y. Zhang and W. Wang	
Calculative Method for Critical Condition of Fire Liftoff Caused by Man-Made Interfering Jet Flow	162
X.G. Jiang, W. Chi and L.G. Jin	
Trajectory Reconstruction Using Paper Target Experiment Based on UKF	166
L.L. An and L.M. Wang	
Performance Analysis of a Novel Compression Refrigeration System	170
Z.W. Cheng	
Numerical Study of Flow and Heat Transfer of Heat Exchanger with Louver Baffles	174
H. Lai	
Control and Analysis on Shot Peening Process to Aeropropeller Pitch Change Knob	178
Z.P. Fan and C. Zhang	
A New PANS Model for Unsteady Separated Flow Simulations	182
D.H. Luo, C. Yan, W.L. Zheng and W. Yuan	

FSAE Racing Gear Selection and Shifting Agencies Choose to Discuss the Impact of Car Drivers	
J. Chao and H. Gong	187
Modeling and Simulation of a New Type Intelligent Gas Pressure Regulator	
Y.T. Wang and J.G. Ma	191
Calculation on Fracture Parameter of Model I Crack Tip Based on ANSYS	
K. Song and B.C. Yang	195
Three-Dimensional Numerical Simulation of the Flow around Two Side-by-Side Cylinders of Different Diameters	
Z.X. Bi and Z.H. Zhu	199

Chapter 4: System Modeling and Algorithms for Intelligent Automation and Control Systems

Particle Swarm Optimization of $PI^{\lambda}D^{\mu}$ Control of Heating Furnace Temperature Control System	
P.G. Wang, L. Zhang and X.P. Zong	205
Self-Scheduled and Robust Control for Tilt Rotor Aircraft	
Y.Y. Cao, X.M. Wang and C. Peng	210
Mathematical Model of Obstacle Avoidance Shortest Time Path for Robot	
L.L. Duan, P. Wang and N. Ruan	214
Synchronization Control of Chaotic Systems with Different Orders	
Y.F. Yang	218
Research on Carrier-Attacker Control before Launching Air-Ground Guidance Weapons	
H.Y. Zhang, L. Zhang, Z.Q. Liu, Y.G. Ji and W.D. Zhang	222
Control of Channel Power Compensation Based on Genetic Algorithm to Impairment Aware in Optical Network	
D.Y. Zhao, K.P. Long, Y.C. Zheng, Z.Y. Du, J.F. Shi and S. Cheng	226
Study on Parametric Reverse Modeling	
S.X. Hu	230
Chaos Synchronization of Systems via Accelerated Factors	
J.P. Jia	234
Cooperative Output Regulation for a Class of Nonlinear Uncertain Multi-Agent Systems Using the Backstepping Method	
D.C. Huang, X.K. Wang and Y.F. Niu	238
Simulation of Valve Position Feedback Mechanism Based on Pro/E and ADAMS	
Y.J. Fan, F. Li and H.T. Zhao	244
Study on Single-Phase Grid-Connected Inverter Based on PI Control	
L.J. Hou, C.Q. Zhu, Y.F. Zhao and X.F. Yan	249
Intelligent Control of Time-Delayed System	
C.J. Zhang, H.P. Hu and Y.Q. Zhang	253
Applying LESO for Disturbance Rejection of Space Station	
P. Liu and W.J. Sun	257
Developing Fuzzy Control Irrigate System Based on PLC	
L. Xiao, L. Li and X.L. Wu	261
Greenhouse Moisture and Temperature Fuzzy Control System and PLC Program Design	
M.Q. Huang, J.H. Ke and X.L. Wu	265
Anti-Synchronization Control of the Complex Lu System	
F.D. Zhang	269
The Design of the Tiny-Skin Transplanter's Pneumatic Control System	
T.T. Deng	273
An Improved Purging Control Algorithm for Small Power PEMFC	
J. Fang, W. Qi and D. Xiao	277
The Research of Stamping Springback Compensation Algorithm Based on the Improved Fourier Transform	
W.J. Liu, Z.Y. Liang, X.Y. Zhu and X.Y. Zhang	281

Design and Simulation about Linkage of Caterpillar Beach Cleaner's Graps Y.K. Zheng, X.H. Ge and L.G. Ouyang	285
Research on Big Data Consistency Algorithm of Multi-Sensor Fusion J.X. Duan and H.S. Wang	291
The Research of Loyalty Model Based on the PN (Petri Net) Algorithm R. Xu	295
The Research of Rapid Construction Method of Kinematics Coordinate System from a Kind of Mobile Robot C.H. Lu and M.J. Song	299
Study on the Energy Management System of Electric Vehicle Charging Station Based on Multi-Agent System Y.H. Tao, S.J. Wang and X.S. Zhang	303
Research on Drive Control and Safety Management Strategy for Electric Vehicle H.W. Liu, L.J. Wang and J.H. Tian	308
Study on Control Strategy for Electric Starting up of Pure Electric Vehicle L. Chu, C. Guo, P.Z. Zhang, Z.C. Fu and Y.J. Zhang	313
Study on the Control Strategy of Slope Starting for Pure Electric Vehicle L. Chu, C. Guo, P.Z. Zhang, Z.C. Fu and Y.J. Zhang	317
Research on the Design and Manufacture of Steam Cleaning Machine Based on PLC D.M. Zhang and S.B. Li	322
The Design Method for Sequence Function Chart in Drilling Machine Control System S. Jin	326
The Control Design of the Chain Magazine Test Bench M.Z. Rao	330
Design of Foil-Making Machine Based on Motion Controller D.H. Zhang and X.Q. Wu	334
Optimization Research on the Circuit Breaker Instantaneous Characteristic Experiment Based on Neural Network X.J. Jia	338
Analysis on Composite Action Control Strategy of Separate Meter-In Separate Meter-Out Control System W.R. Wu and J.C. Yao	342
A Design and Implementation for the Auto-Booting of Baseband Board with ARM, DSP and FPGA L.W. Hu	349

Chapter 5: System Test, Diagnosis, Detection and Monitoring, Instrumentation and Measurement, Optimization and Algorithms, Numerical Methods and Simulation

Reliability Evaluation for Distribution System Considering the Access of Distributed Generations H.S. Zhao, S. Chen, Y.Y. Wang and Y. Wang	355
Transformer Fault Diagnosis Based on Online Sequential Extreme Learning Machine L.L. Wang, F. Pei and Y.L. Zhu	360
Analysis of a Nonlinear System with a Random Parameter H.G. Dang, X.Y. Yang and W.S. He	366
The Research on Flow Calculation Method of the Ball Solenoid Valve Y. Yang, L. Chu, D. Fan and Y.T. Huang	370
Reflection Plane Precision Measuring Methods Research of Shipborne Measurement and Control Antenna Y.J. Sun, X.L. Lu, H.S. Jin and J.C. Yu	374
Echo Doppler Fidelity's Verification of Radar Simulator Y.H. Xu, F.Z. Wang, C.C. Chen and D.Z. Zeng	378
About Several Kinds of Probe on the Impact of Different Failure Modes on Inspection Speed Analysis Y.K. Ji and F.N. Liu	382

Design of Light Moisture Tester and its Application in Tiefa Coal Industry Group H.L. Su	386
Numerical Analysis of Buried Heating Branch Junctions Y.L. Liu, F. Wang, L.P. Li and G.W. Wang	393
Fault Prediction of Pitch Actuator for Wind Turbines H.S. Zhao, S.S. Lian and L. Shao	397
Vivid Algorithm of Scene Simulation for URAV G.D. Jin, L.B. Lu and X.F. Zhu	402
A New INS/VNS Integrated Navigation Model for Planetary Rovers Y.Z. Xu and X.L. Ning	406
Optimum Sensor Array for Passive Localization from Time Differences of Arrival C. Zhou, G.M. Huang and J. Gao	411
Smoke Detection Alarm System Based on NRF401 and FPGA T. Wang and W.B. Liu	416
Road Flatness Detection Using Permutation Entropy (PE) Q.C. Wang, W.Q. Song and J.K. Liang	420
Analysis of Natural Pollution Deposit on Optic Sensor for Monitoring of Insulator Contamination J. Xu and Q. Wang	424
Comprehensive Evaluation of the Designing Scheme of AUV Platform Performance by AHP Method T.T. Wang, S.L. Yang, Y. Chen, J. Li and Q. Yu	428
Data Prediction Algorithm in Wireless Sensor Networks for Oil and Gas Pipeline Monitoring H.P. Yu and M. Guo	434
The Research on Central Monitoring System for Wind Farm Y. Tang, Z. Yang, C.C. Wang and Y.Q. Zhang	438
Ultrasonic Transceiver-Based Structural Deformation Monitoring with Location Ability W. Zheng, C.X. Wu and R.R. Cui	442
Lunar Soft - Landing Trajectory of Mechanics Optimization Based on the Improved Ant Colony Algorithm M.F. Qu	446
Chaos Research of Asymmetric System Based on Melnikov Method A.K. Hu, Y.C. Liu, F.L. Han and C.H. Wang	450
The Design and Experiment of Levelness-Adjustable Clamping Device for Cable Gland Y. Ke, Z.H. Jiang and S.G. Li	455
Large-Scale Virtual Simulation of the Solar System Based on Java3D X.L. Chen, J.X. Chen and H. Liu	459
The Effect of Different Optimization Methods on Robustness for Robust Optimization Design T. Fu, Q.Z. Gong and D.Z. Wang	464
Modeling and Simulation Research of Lidar Tomography Imaging F.Q. Qu, C. Shu and J.H. Tu	468
Researching on Characteristics of Rayleigh Waves X.F. Zhu and B. Yan	472
Evaluation Framework and Method of the Intelligent Behaviors of Unmanned Ground Vehicles Based on AHP Scheme X. Zhang, Y.A. Zhao, L. Gao and D.H. Hao	476
Fracture Research on Preheating Installation of Directly Buried Heating Return Water Pipe with Large Diameter Y. Fu, F. Wang, G.W. Wang and Y.G. Lei	481
The Electric Monitoring System Application Based on ZigBee Wireless Technology Y. Li, X.D. Ding and Y.T. Li	486
Research on Magnetometer Positioning Technology Based on a Variable Magnetic Source S. Zhang, D.M. Liu, H. Zhang and S.N. Zhou	490
A Method of Order Determination for ARX and ARMA Models Based on Nonnegative Garrote G.D. Jin, L.B. Lu and X.F. Zhu	496

Research on Jamming Resource Scheduling Based on Multi-Target and Fuzzy Multi-Stage F.L. Wang, S.J. Rao, N. Jiang and D. Wang	500
The Design and Implementation of a Certain Type of Information Machine Simulator Based on ARM J.H. Tu, Z.C. Shao, X.L. Tan and F.Q. Qu	505
PSO Based Feature Extraction Method for Analog Circuits Fault Information H. Liu and S.Z. Sun	509
A Precision Resistance Generator for the Calibration of RTD-Based Temperature Instruments P.H. Chen, L.F. Guo, G.B. Lu and C.X. Jin	513
Research on Identification of Induction Motor Parameters Based on Nameplate Data X.W. Wang, Z.Y. Zhang and Y.J. Lin	517
Research on Wireless Temperature Measurement System for Electrical Equipment X.L. Wang, Y.G. Nian and D.D. Cai	523
The Design of Mobile Phone Multimeter Based on the Android Platform Z.T. Cheng, M. Yang and W.P. Wang	527
Application of the Bat Algorithm to Optimize the BP Neural Network H.H. Xiao and Y.M. Duan	531
An Algorithm to Find the First K Spanning Trees with Minimum Weights G.M. Sun, H. Li and P. Wang	535
The Multi-Site Joint Operation Method Based on Discharge Gate Ant Colony Algorithm C.C. Liu, Y.C. He and C.P. An	539
A Novel and Improved Apriori Algorithm D.J. Gu and L. Xia	543
Algorithm for Computing Attribute Reduction Based on Radix Sort of Optimized Linked List Structure L. Zhang and G.J. Ding	547

Chapter 6: Electrical and Electronic Technology, Power System Engineering

Impact of DLC on Distribution System Reliability H.S. Zhao, Y.Y. Wang, S. Chen and Y. Wang	555
Doherty Power Amplifier with Dynamic Power Dividing Network for Enhanced Efficiency W. Xi, Y. Shi, S.L. Yang and J. Li	560
The Design of the Minimum CPU System of TMS320VC54x A.L. Qu, C.L. Ma and B.B. Qu	564
Research on Simulation of Electronic-Protection Circuit of Chopper Cascade Speed Control System Z.Y. Zhang, X.W. Wang and Y.G. Ma	569
A Kind of Electric-Corona-Prevent Paint X.Y. Zhao	575
Research on High-Power, High-Speed Laser Modulation and Enlarge Experiment H. Liu and W.D. Zhan	579
PV Grid-Connected Inverter Islanding Detection Algorithm Improvements C. Lu, X.M. Sun and Y. Jin	583
Summary of Research Status of Active Power Filter H.Y. Wang	587
Based on Class D Amplifier Magnetic Resonance Wireless Transmission Technology X.P. Yu, G. Yang and W.H. Song	591
Application Research of Electrical Automation Technology for Power Plant H.J. Xie and W.L. Li	595
Research on the Key Factors of Mis-Operations and Correct Operations of the Residual Current Operated Protective Device L.M. Shao, M. Zhang and S.H. Du	599
Research and Application of UPS-CAN Protocol in Parallel System H.Y. Zhang, K.D. Zhu and J.Z. Wan	603

Selective Harmonic Elimination PWM Technique with Walsh Functions for Nine-Level Cascade Inverter	
C.F. Zheng, X.M. Xu, B. Zhang and D.Y. Qiu	607
An Active Equalization Technique Based on Flyback Converter Topology	
H.W. Liu, H. He, Y. Gui and X.W. Hao	612
Development and Research of MEMS	
S.C. Wang, Y.P. Hao and S.J. Liu	618
Capacitive Touch Sensing Principle and Application in the Car	
Q.X. Tao	622
Microcomputer Interface Experimental System Design	
W.J. Cai and H.S. Peng	626
The Model of Estimating MTL Crosstalk in Inhomogeneous Medium	
Y.H. Gao, Z.Y. An, T.H. Wang, K.Y. Yang and J.X. Wang	631
Research on Four Water-Filling Power Distribution Schemes in MU-MIMO System	
Y.B. Zhang, J.X. Li and W.M. Wen	635
Design of Electronic Control System for HCCI Optical Engine and Optical Testing	
Y.H. Gao, M. Si, P. Cheng and J.C. Chi	639

Chapter 7: Communication for Vehicles and Transportation, Signal Processing

Discussion on the Technology Application of OFDM in the Ad-Hoc Network of Unmanned Aerial Vehicle (UAV)	
Z. Yuan, S.D. Yang and H.W. Liu	645
A Novel Anti-Collision Algorithm of Tags in RFID System	
X.P. Zong, R.K. Lu, P.G. Wang, T. Zhang and S. Liu	649
Design Method of an Intermediate Transcoding Structure Based on XML	
A.M. Pu	653
An Effective Multiple-Receiver SAS Range Doppler Algorithm Based on the Modified Range History Approximation	
Z. Tian, J.S. Tang and H.P. Zhong	657
The Study on DFS Algorithm of Unmanned Aerial Vehicle Platform Communications Relay System	
H.W. Liu and W.B. Luo	662
Method of Common View Based on Digital Satellite Television	
X.L. Liu, Y. Hua, Y. Xiang and H.Q. Liu	666
Modulation Type Recognition of OFDM Signals Based on EMD	
A.M. Gong, B.H. Wang, Y. Qu and Y.R. Zheng	670
Network-Coding-Based Mutually Cooperative Transmission in Deep Space Communications	
X.L. Yao, X.R. Zhu and P. Yu	674
Research on Near Space Optical Communication Transmitting and Receiving Technology	
W.D. Zhan, D.Y. Xiao, Z.Q. Hao and H.Z. Li	678

Chapter 8: Information Technology and Networks Applications

Software Defined Networking: A New Trend of Networking	
Y.R. Zheng, G.W. Shi, W.B. Luo and A.M. Gong	685
Integrated Avionics Network Dynamics Analysis	
D. Li, J.D. Zhang, Y. Wu and G.Q. Shi	689
High Performance Start Node of Edge Ordering for Infrastructure Networks	
B. Xie, X. Liu and Y.C. Mo	693
The Design of the Power Energy Management System Based on Wireless Sensor Network	
W.L. Li and H.J. Xie	699
The Applications of Information Visualization in Power Systems	
X.L. Wang, M.X. Lu, D.D. Cai and Y.G. Nian	703

The Application of Communication Network in Distribution Automation Y.W. Ding, D.D. Cai, Y.G. Nian and Y.C. Wang	707
The Application of Distribution GIS in Regional Distribution Network Z. Yang, Y. Tang, Y.Q. Zhang and C.C. Wang	711
Multi-Objective Programming Model for Joint Scheduling of Ships in the Complex Water Network Y.C. He, C.C. Liu and C.P. An	715
Research on Energy Saving in Cellular Networks Based on Dynamic Load Balancing J.B. Xue, F.J. He and B. Liang	720
Application of Process Migration in Intelligent Router Based on BLCR T.X. Wang, M.H. Jiang, J. Liang, C.L. Zhou, F. Yu and X. Wu	724
Channel Assignment Algorithm in Centralized WLAN D.W. Dong, X.G. Liu and T. Jing	728
Integrity and Privacy Preserving Data Aggregation Algorithm for WSNs H. Zhang	732
A Study of the Model which Can Improve LEACH Protocol C.G. Wang, X. Zhang and K. Han	736
Power Control Optimization for Position Tracking in Vehicle Network Z. Yang, G.Z. Tan and F.X. Zhang	740
An Optimized Design of Safety Messages' Communication Sub-Layer in Vehicle Ad-Hoc Network X.Y. Song, G.Z. Tan, M.J. Liu and F.X. Zhang	744
RETRACTED: Visualizing Interrupts and Replication with Timer J.S. Pan and S. Cheng	750

Chapter 9: Recognition, Video and Image Processing

An Effective Program Clustering Algorithm for TV Recommendation System C. Cheng, X.Y. Liu and X.J. Wang	757
The Application of Gaussian Mixture Modeling in Traffic Flow Videos W.Y. Lv, H.Y. Yang, R. Wang and J.Y. Li	762
Research on Locality Preserving Discriminant Projection Algorithm Based on Gabor for Face Expression Recognition W.Y. Gong and F.X. Lu	766
Design and Algorithm Optimization of P2P Mobile Monitoring Network-Based Facial Recognition System X. Li, P. Wang and H. Li	771
Rotation Moment Invariant Feature Extraction Techniques for Image Matching Y.Q. Lai	775
The Application of Improved PSO Algorithm in PMMW Image OSTU Threshold Segmentation P. Chen, T. Zou, J.Y. Chen, Z. Gao and J. Xiong	779
A Robust Line Filter for Automatic X-Ray/CT Image Segmentation S.H. Peng, H.D. Nam, Y.F. Gan and X. Hu	783
The Research Based on H.264 Embedded Video Systems of Optimized Compression Algorithm Y. Liu, Z.J. Cen and J. Liu	788

Chapter 10: Materials for Vehicles and Transportation, Civil Constructions, Fuel Cells and Energy Materials

Effect of Ce on Secondary Extrusion Deformation Microstructure of ZM21 Alloy Q. Li, B. Zeng, W.B. Zhu, S.Y. Wang, X.Q. Jiang and F.S. Pan	795
Effects of Zn on Microstructure and Mechanical Properties of Mg-6.0Zn-0.6Zr-1.0Y Magnesium Alloys Q. Li, B. Zeng, W.B. Zhu, S.Y. Wang, X.Q. Jiang and F.S. Pan	799

Influence of Laminate Scheme on Design of Continuous Fiber Reinforced Composite Turbofan Engine Shaft	
Y.D. Sha, Q.Y. Jia, L. Luo, F.T. Zhao and X.C. Luan	803
Analysis of Tunnel Running through Bridge Pile Foundation Based on the MIDAS/GTS	
J.K. Li and D.J. Tang	809
Influences of Ground Reflection on the Elevated Box Bridge Structure Noise	
X.Y. Zhang, Q. Song and X.A. Zhang	813
Acoustic Properties of Magnetorheological Fluids under Magnetic Fields	
M. Shen and Q.B. Huang	818
Synthesis and Photoelectric Properties of Donor-Acceptor-Donor Molecule Containing Perylene Diimide	
C.M. Jiao, S.L. Yi, G.M. Zhou and Q. Xu	824
Preparation and Properties of SiO₂-P₂O₅-TiO₂ Membrane for Fuel Cell Electrolytes	
L. Zheng, F. Wang, T. Li, Y.S. Li and J.H. Li	829
Analysis of Resistance of Current Collector in Packing-Type Microbial Fuel Cell	
H. Li, L.G. Shao and Y.Y. Jiao	834
Vibrating Rechargeable Battery Design Research Based on the Two Kinds of Charging Ways	
K.L. Shi	838
Collision Simulation and Analysis of Energy-Absorbing Box for Vehicle	
K. Song and B.C. Yang	842
