

# Table of Contents

## Preface

## Chapter 1: Waste and Biomass Conversion for Renewable Energy Resource

<b>Gasification of Oil Palm Shells and Empty Fruit Bunches to Produce Gas Fuel</b>	
A. Aktawan, Maryudi, S. Salamah and E. Astuti	3
<b>Utilization of Tea Tree Branches as a Source of Thermal Energy</b>	
R. Firyanto, H. Susanto, R.S.L. Ambarwati, Suherman and Widayat	8
<b>Production of Bio-Crude Oil from Microalgae <i>Chlorella</i> sp. Using Hydrothermal Liquefaction Process</b>	
A.A. Bawono, H. Adhisatrio, L. Prasakti and Y.S. Pradana	14
<b>Potential Application of Sago Pulp Briquette for Electricity Generation Using Gasification Technology in Papua Province, Indonesia</b>	
M. Syamsiro, M.N. Aridito and S. Ma'arif	20
<b>Enhancement of Biogas Production in Anaerobic Digestion from Sludge of Dairy Waste with Fixed Bed Reactor by Using Natural Zeolite</b>	
H. Pampang, C.W. Purnomo and R.B. Cahyono	27
<b>Influence of Natural and H-Beta Zeolites on Yield and Composition of Non-Polar Fraction of Bio-Oil in Slow Co-Pyrolysis of Biomass and Polypropylene</b>	
D. Supramono and S. Tiaradiba	34
<b>Utilization of <i>Casuarina montana</i> Pruning Waste Biomass as Chemical or Energy Resources</b>	
D. Irawati, D. Usman and N.N. Pradipta	40
<b>Bio-Oil Characterizations of <i>Spirulina Platensis</i> Residue (SPR) Pyrolysis Products for Renewable Energy Development</b>	
S. Jamilatun, A. Rahayu, Y.S. Pradana, B. Budhijanto, Rochmadi and A. Budiman	47
<b>A Novel Immobilization Method of <i>Saccharomyces cerevisiae</i> on Fermentation of Nipa Palm Sap for Fuel Grade Bioethanol Production</b>	
Chairul, Evelyn, S. Bahri and E. Awaltanova	53

## Chapter 2: Production of Materials and Chemicals from Waste and Biomass

<b>Physical-Mechanical Properties of Paving Block from Plastic Shopping Bags Waste and Sand</b>	
Iswahyuni, I. Hermiyati, Suharyanto, U.F. Arifin and D.N. Hidayati	61
<b>Quality Improvement of Recycled Paper with Extracted Xylan from Corncobs</b>	
G.I. Budiarti, D. Fajariyanto and O. Hendratno	67
<b>Utilization of Silica from Indonesian Solid Wastes as Catalyst Materials</b>	
F. Kurniawansyah, A.D. Istiqomah, A.J. Malahayati, H.T.B.M. Petrus and A. Roesyadi	72
<b>Silica from Geothermal Waste as Reinforcing Filler in Artificial Leather</b>	
M.W. Syabani, I. Amaliyana, I. Hermiyati and Y.I. Supriyatna	78
<b>Styrene Recovery from the Pyrolysis of Polystyrene Waste Using Bentonite and Natural Zeolite Catalyst</b>	
P.B. Dewangga, Rochmadi and C.W. Purnomo	84
<b>Triacetin Synthesis as Bio-Additive from Glycerol Using Homogeneous and Heterogeneous Catalysts</b>	
Z. Mufrodi, E. Astuti, M. Syamsiro, Sutiman and S. Purwono	90
<b>Improvement of Biocomposite Properties Based Tapioca Starch and Sugarcane Bagasse Cellulose Nanofibers</b>	
M. Asrofi, Sujito, E. Syafri, S.M. Sapuan and R.A. Ilyas	96
<b>Potency of Rare Earth Elements and Yttrium in Indonesia Coal Ash</b>	
W. Rosita, D.A.A. Besari, I.M. Bendiyasa, I. Perdana, F. Anggara and H.T.B.M. Petrus	102

<b>Zinc Oxide Recovery from Solid Waste of Electric Arc Furnace Dust (EAFD) Using Hydrometallurgical Method</b>	
W. Astuti, A. Haerudin, I.N. Eskani, F. Nurjaman, A.P.T. Yuda, J. Setiawan, Isnaeni, Farida and D.W. Lestari	108
<b>Characterization and A Preliminary Study of TiO<sub>2</sub> Synthesis from Lampung Iron Sand</b>	
Y.I. Supriyatna, S. Sumardi, W. Astuti, A.N. Nainggolan, A.W. Ismail, H.T.B.M. Petrus and A. Prasetya	113
<b>Preparation of Calcium Oxide/Zeolite Nanocomposite and its Application to Improve the Quality of Patchouli Oil</b>	
K. Wijaya, M. Utami, A. Syoufian and L. Hidayatullah	119
<b>Esterification of Glycerol with Acetic Acid in Bioadditive Triacetin with Fe<sub>2</sub>O<sub>3</sub>/Activated Carbon Catalyst</b>	
Z. Mufrodi and S. Amelia	125
<b>Synthesis of Zeolite Catalyst from Geothermal Solid Waste for Crude Glycerol Dehydration to Acrolein</b>	
Widayat, J. Philia, T. Farsha and F. Rifaldi	130
