

Table of Contents

Preface

Chapter 1: Materials Processing

Destruction Aspects of the Surface Layer of Metal Surfaces during Shot Blasting O. Goryk, S. Koval'chuk, O. Brykun and S. Kamyshov	3
Experimental Analysis of the Mechanical Behaviour of 3D Printed Elements: The Role of Fibre Orientation in the Material Structure S. Kutsyk, O. Mikulich and Y. Feshchuk	13
Increasing the Durability of Cutting Tools through Additional Low-Temperature Heat Treatment after Sharpening T. Chumachenko, A. Bespalova and O. Knush	25

Chapter 2: Building Materials

Combined Reinforcement as a Means of Increasing the Durability of Rigid Pavement O. Polishchuk, Y. Ziatyuk, M. Fursovysh, V. Supruniuk and V. Romaniuk	39
Decorative Dolomite Brick Based on Raw Materials from the Poltava Region V. Taranenkova, P. Korekian, O. Myrgorod and O. Pirohov	45
Strength and Deformation Properties of Concrete and Structures on Porous Aggregates of the South of Ukraine I. Stolevich, O. Posternak, A.I. Kostiuk and N. Urazmanova	53
The Effect of Ultraviolet on the Change in the Structural and Mechanical Properties of Polyurethane Foams O. Mikulich, T. Furs, V. Shemet and O. Bondarskii	65
Prospects of Using Road Clothing with Reinforcement of Asphalt Concrete Surfaces K. Krayushkina and I. Osovskii	71
Research of the Process of Microbiological Destruction of Wood - Polymer Composite Y. Tsapko, I. Kasyanchuk, O. Bondarenko and O. Tsapko	81
Topological Modeling of Characteristic Features of Structure Formation Kinetics in Disperse Systems L. Trofimova	91
Modelling the Effect of Short-Term Repeated Loading with Plastic Deformations on Foam Materials O. Mikulich, T. Kradinova, O. Huda and N. Komenda	97
Non-Stationary Nonlinear Problem of Moisture Transport in Porous Building Materials M. Riabchykov, O. Alexandrov, M. Alexandrov and Y. Sychov	105
Experimental Research of Gypsum Concrete with Organic Filler O. Horb, Y. Avramenko, K. Omelchenko and I. Mashkov	115

Chapter 3: Structural Mechanics

The Influence of a Finite Element Mesh on the Reliability of the Results of Dynamic Processes of Armor Penetration of a Steel Plate by a Bullet S. Sidnei, I. Nozhko, V. Rotar and M. Grygorian	127
Exact Analytical Solution of the Problem of Elastic Bending of a Multilayer Circular Arch under the Action of a Normal Uniform Load S. Kovalchuk, O. Goryk, S. Yakhin and O. Brykun	139
Dependence of the Elastoplastic Properties of Compressed Concrete on its Strain Rate O. Romashko-Maistruk and V. Romashko	153
Formulating a Calculation Methodology for Assessing the Strength Characteristics of Building Structures Constructed with a Construction 3D Printer O. Soshinskiy, N. Rashkevich, S. Shakhov and A. Melnychenko	161

Variant of the Mathematical Theory of Multilayer Nonlinear Elastic Plates of Non-Symmetric Structures of Arbitrary Constant Thickness A.G. Zelensky and S. Slobodyanyuk	171
Calculation of Cross-Laminated Timber Panels Using the Theory of Composite Rods and Rod Approximation T. Azizov, D. Kochkarev and O.F. Maistrenko	185

Chapter 4: Particle System Mechanics

Application of Information Technologies in Modeling Multi-Component Systems with Particles of Various Geometry V. Pasternak, A. Ruban, V. Popovych and M. Khramov	197
Modeling the Behavior of Spherical Particles Using the Discrete Element Method (DEM) V. Pasternak, A. Ruban, V. Matukhno and T. Oliinyk	209
Using Numerical Methods in Scilab to Simulate Particle Trajectories under the Action of Various Forces (Gravity, Electromagnetism, Friction) V. Pasternak, A. Ruban, V. Andrii and O. Lymar	221
